

Vocational Training and Education for Clean Energy

What is VOCTEC?

Vocational Training and Education for Clean Energy (VOCTEC) is a multi-tier program under the leadership of Arizona State University (ASU) to improve the sustainability of renewable energy investments in developing countries by increasing awareness, knowledge and capacity of local stakeholders. VOCTEC training includes modules on design, installation, operation, maintenance, and policy of distributed, renewable energy systems.

The College of Technology & Innovation (CTI) at Arizona State University (ASU) is making a new higher education experience. One that focuses on learning through making things and solving real-world challenges through collaboration. At CTI, we believe how you learn and teach is as important as what you learn and teach.

The University of the South Pacific is the premier institution of higher learning for the Pacific region, uniquely placed in a region of extraordinary diversity. USP is jointly owned by the governments of 12 member countries. The University has set high standards in its research in a number of areas, including renewable energy. Several faculties are involved in renewable energy capacity building efforts in the Pacific region.
