

3. If interested in staying in the halls, complete the Residence Halls Application, and return it with a \$50 refundable security deposit;
4. Submit the Student Aid Report (SAR) upon receipt to the Financial Aid Office (FAO);
5. Take a physical examination and return the Health Form to the college as soon as possible; and
6. Check with the COM-FSM state campus dean for travel arrangements. Tickets are provided for students from Yap, Chuuk, and Kosrae who have completed all of the above.

Admission to Second Associate Degree

Students who have earned an associate degree either from COM-FSM or a regionally U.S. regionally accredited institution with a cumulative GPA of at least 2.0 may formally be admitted into a second associate degree program. The second associate degree program must be in a major different from the first.

Students seeking a second associate degree must file an Application for Second Degree Admission. If the degree was earned from an institution other than the college, the student must also submit to OARR the following:

- Application for Admission and a \$10 admission fee. Printable Application for Admission form may also be downloaded from the College's [website](#).
- Official transcript indicating that a previous degree was earned.

Admission into Third-Year Certificate Programs

Admission to Third-Year Program in Teacher Preparation-Elementary, students are required to:

- complete the AA in Pre-Teacher Preparation -Elementary or other two-year degree in education (excluding the degree in Early Childhood);
- earn a minimum cum GPA of 2.5 at end of two-year program;
- score at least 15 on the essay based on the COMET rubric; and

Admission in to Bacalaureate Program

To enroll in Student Teaching or Internship, students are required to:

- complete all required courses with a cum GPA of 2.75; and
- score a minimum of 70/100 on the Teacher Competency Exam.

Admission Application Deadlines:

Applications for admission to the third-year certificate program, along with entrance essays, must be submitted at least two weeks (10 working days) prior to the start date of an early registration period.

Full Admission:

A Student will be admitted with full status if he/she

1. Possesses an associate degree in education
2. Has earned a CumGPA of 2.75 or above
3. Has a score of at least 20 on the entrance essay with no individual score below a three (3)

Note: Entrance essay is scored based on the COMET Rubric.

Probationary Status:

Student with the associate degree may be admitted on probation if he/she

1. Has a minimum CumGPA of 2.5 and
2. Has a minimum score of 15 on the entrance essay with no individual score below a three (3)

Note: A student is required to take EN 220 Writing for Teachers if he/she has a score of 15-19 on the entrance essay or individual score of three (3) in Syntax and/or Vocabulary.

Pre-requisite Courses:

Students who enter the program without having completed ED 210a, ED 215, and ED/PY 201 need to complete these courses with a grade of 'C' or better during the first semester in the program.

Removal from Probationary Status:

The student may be removed from Probationary Status after the first semester of the third-year program if the student

- 1 .Successfully passes EN 220 Writing for Teachers and

2. Earns a semester GPA of at least 2.75 (with no grade lower than a C) with a minimum of 15 credit hours. Should a student begin the program in the summer when 15 credit hours are impossible to attain, the same stipulation as above applies for the summer and fall semester combined (or the first two semesters in any combination) even if the course load in the respective semesters exceeds 15 credit hours.

A three-member subcommittee will represent the Division to review third-year applications along with the representatives from Admissions Board and RAR.

Admission to Third-Year Program in Public Health: To be eligible for admission to the Third-Year Program in Public Health, a student must have completed an associate degree in public health; or an associate degree in public health or equivalent (as determined by review panel chaired by the division chair of health science, and public health faculty) and significant public health work experience of at least eight years); or satisfactory completion of a health-related research student and significant public health work experience of at least eight years and favorable interview with program faculty.

Admission into the Fourth-Year Bachelor of Science Degree in Elementary Education

A student will be admitted if he/she (a) earns a minimum cumulative GPA of 2.75 by the end of the third-year program in Teacher Preparation-Elementary, and (b) passes the FSM Teacher Competency Exam with a score of at least 53/75.

Admission to other Certificate of Achievement Programs

High school graduates and General Educational Development (GED) certificate holders who are not accepted into or are not interested in a degree program may apply for admission into an entry-level certificate of achievement program.

Applicants must take the COMET, and be accepted by the college's president upon recommendation of the committee on RAR. Acceptance is based on the applicant's score on the COMET, and other criteria as defined by the committee.

Transfer

Students who have earned satisfactory grades from another US regionally accredited college or university may apply for admission, and be given advanced standing at the COM-FSM. Students must submit to the OARR the following:

- A completed Application for Admission form. Printable Application for Admission form may also be downloaded from the College's [website](#) .
- Proof of paying the \$10 admission fee;
- An official copy of his/her high school transcript; and
- An official transcripts from each college or university previously attended.

Credit for previous satisfactory college work can only be given upon receipt of previous college records. Students may also transfer credits earned at the college with grades of "C" or better. To see what courses can be transferred to articulated institutions, see the college's [articulations](#) with U.S. regionally accredited institutions.

Dual Enrollment for High School Students

High school students who wish to be considered for dual enrollment at the college must meet all of the following requirements:

- The student has successfully completed the 11th grade.
- The student provides a certification from the local principal and/or his/her designee, or from a director of a college program working with high school seniors, certifying that the student has a minimum cumulative GPA of 3.50.
- The local principal and/or is his designee, or a director of a college program working with high school seniors, provides a statement of justification describing the student's ability to benefit academically, intellectually, or artistically ready.
- The college's committee on RAR has recommended the student for Dual Enrollment

Students must meet the prerequisites for the course. Credits and grades earned will appear on their college transcript.

Students enrolled in a course under the college's *Dual Enrollment Policy* are not eligible for *Federal Financial Aid assistance*. As such, they must pay all college tuition and matriculation fees assessed to regular students.

All of the above must be submitted together as one packet.

Dual Enrollment does not constitute admission to the college. Dual Enrollment students must follow the policy and procedures for regular admission to obtain full-time admission to the college subsequent to graduation from high school. Students must submit:

- A completed COM-FSM Application for Dual Enrollment to the college's OARR;
- A recommendation letter from the principal or his/her designee, or the director of a college program working with high school seniors;
- Proof of paying the admission fee; and
- Official high school transcript.

Early Admission

The college provides post secondary instructional opportunities to eligible high school students by offering an *Early Admission* Program for academically talented high school students who are ready to benefit from college and want to enter college in advance of high school graduation.

Students are eligible for early admission if they meet all of the following requirements:

- The student provides a certification from the local principal and/or his designee certifying that the student has a minimum cumulative GPA of 3.5, and recommending that the student be admitted under the college's Early Admission Policy.
- The student has successfully completed the *11th* grade.
- The student has satisfied the college's committee on RAR, recommendation via the COMET, and has been placed into college level (100) English courses in both reading and writing

The student enrolled through Early Admission is not eligible for Federal Financial Aid assistance until a high school diploma or equivalent has been achieved. The student must submit:

- A completed College of Micronesia-FSM Application or Early Admission to the college's OARR.
- A recommendation letter from the principal or his designee.
- Proof of paying the admission fee.
- Official high school transcript.

All of the above must be submitted together as one packet.

Leave of Absence Policy

Students may take a leave of absence from the college by:

1. Completing the Withdrawal from COM-FSM Clearance form. Printable Withdrawal from COM-FSM Clearance form may also be downloaded from the College's [website](#).
2. Reading the Leave of Absence policy and signing acknowledgement of the readmission statement; and
3. If a boarding student, formally checking out of the residential hall.

The College is not responsible for transportation expenses for any student taking a leave of absence.

Readmission

Students who are absent from school for at least an academic year (two semesters and a summer session) must apply for readmission. Applications for Readmission must be submitted at least one week before the first day of instruction of the semester in which the student plans to return. Printable Application for Readmission form may also be downloaded from the college's [website](#).

Applications for readmission are considered on an equal basis with students applying for initial admission to the College. Students are readmitted upon the recommendation of the college's committee on RAR.

Open Admission for Non-credit Courses

Non-credit courses are administered by the State Campuses. When offered, information is disseminated through the radio, TV, and printed notices in various public places. These courses are open to the general public.

Unclassified Students

Unclassified students are: (a) individuals taking credit courses prior to applying for admission to the College; (b) students from other universities or colleges taking credit courses at the College of Micronesia-FSM for transfer back to their own institutions; or (c) individuals taking credit courses for personal or professional reasons.

Unclassified students may register in credit courses for which they have the necessary background and in which space is available. Students without the required pre-requisite(s) to a course as listed in the college's Catalog must attain the recommendation of the instructor and the approval of the Vice President for Instructional Affairs or his/her designee to enroll in the course. However, permission of the division chair may also be required in selected courses or academic disciplines. Ordinarily, unclassified students may register for no more than eight credits in an academic semester.

Completing courses while under unclassified status neither constitute nor guarantee admission to any degree program at the college. However, an unclassified student who has completed 24 credits at the college with a minimum GPA of 2.0 may apply for admission on regular status as a student seeking an associate degree. This application for degree seeking status must be made to and processed by the committee on RAR to ensure that the student is officially matriculated into the college. If admitted to regular status, the student may petition the OARR to consider credits earned as an unclassified student be counted toward the degree.

COM-FSM degree students may enroll as unclassified students. However, if degree-seeking status is desired, they should seek formal readmission to degree status at the College since credits earned in unclassified status might not be accepted towards the degree.

Regular application procedures for admission to degree programs apply at all times.

Registration

Registration is the process of officially enrolling in the college, selecting a program of study, and paying all tuition and fees. Assistance will be given by the counselors and other staff members when registering, but final responsibility for completing the registration requirements rests with the student.

Dates for registration of new and continuing students are announced and posted before each term. Students entering COM-FSM for the first time either as freshmen or transfer students will be given an orientation.

Academic Advisement

The objectives of the student advisement program are: (a) to ensure that students are aware of their program requirements; and (b) with the help of their advisor, follow the sequence of courses for their program to insure timely graduation.

The dean of academic programs or her designee assigns students to advisors who are either a faculty member or a counselor.

Classes

Class Schedule

The dean of academic programs and instructional coordinators is responsible for developing the class schedule.

The class schedule contains the semester offerings, as well as the time, instructor, room assignment, and enrollment limit of each course. This schedule is updated periodically during registration until classes begin. Class schedule is accessible online from the college's [website](#).

Changes in Student Class Schedule

Changes should be minimized. However, if a change is unavoidable, students should obtain the proper forms from the Office of Admissions, Records and Retention (OARR). A change will become official only after the proper forms have been signed and returned to said Office.

Adding/Dropping a Course

Courses may be added or dropped by students through the first three days of instruction during semester and first day of instruction during summer by completing the [add/drop form](#) that is available from OARR. Printable add/drop form may also be downloaded from the college's website.

Students who fail to officially add a course will not receive credit for the course. Students who fail to officially drop a course will be charged the full amount for the course.

Withdrawing from a Course

Students who are planning to withdraw from a course must see their academic advisors before withdrawing from the course.

The academic advisors will assist the students in completing the withdrawal card, and sign it before returning it to the student who then secures the instructor's signature; thence submits the form to OARR. If the advisor is not available to assist the student, the vice president for instructional affairs or his/her designees can assist the student in completing the withdrawal card. Printable withdrawal form may also be downloaded from the college's [website](#).

However, instructors may withdraw a student from a course by submitting to the Office of Admissions, Records and Retention a completed withdrawal card (instructor use). Printable withdrawal card for instructor use may be downloaded from the college's [website](#).

Withdrawing from all Courses

Students who are planning to withdraw from all courses must see their academic advisors before withdrawing. The academic advisors will assist the students in completing (a) withdrawal from COM- FSM clearance form, and (b) a drop form if the withdrawal is on or before the last day to drop courses, or a withdrawal form per registered course for post-drop period withdrawal. The completed forms are then submitted to OARR.

Students should be aware of the following timeline and charges for withdrawing from a course:

- Withdrawals within the first week of classes will not be recorded on the student's transcript.
- A grade of "W" will be recorded on official transcript for withdrawals from course beginning the second through the tenth week of instruction.
- A semester grade of "F" will be given for withdrawals from a course after the tenth week of instruction.
- Tuition will not be charged for withdrawals during the add/drop period.
- For withdrawals after the add/drop period, full tuition (100%) will be charged for the course.

Summer session deadlines for these changes are noted on the calendars at the beginning of this catalog and are posted each session.

Students should understand that withdrawing from a course may prolong their time at the College. Courses in degree programs are offered in sequence and some courses are not offered every semester.

Classification and Identification of Students**Freshmen**

Students in a degree program who have earned less than 30 semester credits.

Sophomores

Students in a degree program who have earned from 30 to 70 semester credits.

Full-time Students

Students who register for 12 or more semester credits in a regular semester or six credits in a summer session. For financial aid purposes, the full-time credit load is 12 semester credits for the fall and spring semesters and six credits for the summer session.

Part-time Students

Students who register for less than 12 semester credits in a regular semester or less than six credits in a summer session.

Degree Students

Students who have met all admission requirements and have been officially admitted into a degree program.

Unclassified Students

Students who have not been admitted to a degree program.

Any Change of Personal Data Such as Address, Name, or Marital Status Should be Reported Immediately to the Office of Admission and Records.

Credit Load

The number of semester credits that a student carries is called the credit load. An average load is 15 credits during the regular semester and six credits during the summer session.

Students are limited to a maximum load of 18 credits per regular semester and six credits per summer session. Additional courses can only be taken with permission by the vice president for instructional affairs.

Major Subject Area

The program in which students plan to earn their degree or certificate is the major subject area. Every student is required to declare a major in order to graduate. Students who have questions or have not yet determined their career or educational goals are urged to consult with a counselor prior to enrolling or during their first semester.

As the courses in the various majors are offered in sequence over several semesters, students are required to consult with a counselor or academic advisor before changing a major to avoid disrupting their program of study and lengthening their total time in college.

Auditing Classes

Students may be allowed to audit certain classes with the permission of the instructor after all students registering for credit have been enrolled. Auditing students receive no credit or grade for the course audited. Academic records are not maintained.

The extent of classroom participation is at the option of the instructor. Auditing students must register and pay a nonrefundable fee of \$20 per credit. Audited courses cannot be changed to credit status.

Student Fees and Other Financial Obligations

Tuition and Fees

The College of Micronesia-FSM Board of Regents sets the college's tuition and fees.

Tuition Fee

The current tuition fee is \$135.00 Below is the schedule of tuition fees based on certain number of credits:

Number of Credits	Tuition Fees
1.....	\$ 145.00
3.....	\$ 435.00
6.....	\$ 870.00
9.....	\$ 1,305.00
12.....	\$ 1,740.00
15.....	\$ 2,175.00
18.....	\$ 2,610.00

(TUITION FEE PER CREDIT FOR BACHELOR'S 4th YEAR COURSES IS \$165.00 PER CREDIT)

Residence Hall Fee

Regular Semester	\$ 367.50
Summer Session	\$ 175.00

Meals Fee (Board)

Regular Semester

On Campus	\$ 1,764.00
Off Campus (Lunch, MF)	\$ 420.00

Summer Session

On Campus	\$ 840.00
Off Campus (Lunch, MF)	\$ 200.00

Daily Rate

Breakfast	\$4.00
Lunch or Dinner	\$4.00

Other patrons

Breakfast	\$5.00
Lunch or Dinner	\$5.00

COM-FSM Entrance Test (COMET) Fee

A fee of \$5.00 has to be paid by all students before taking the COMET.

Admission Fee

A \$10.00 fee must accompany an application for admission at the College.

Enrollment Fees

Registration Fee: A \$15.00 per semester registration fee has to be paid at the time of registration for both fulltime and part-time students. This helps defray the cost of enrolling students in classes, recording of grades, maintaining student records, and other expenses relative to the Office of Admissions and Records (OARR), Financial Aid Office (FAO), and Business Office.

Health Fee: A \$15.00 per semester is charged to all students for student health care and counseling. However, charges incurred by the student at the hospital or private clinics are the responsibility of the student.

Student Activity Fee: A \$20.00 per semester is charged to all students. The fee provides student's access to all COM – FSM student curricular and extracurricular activities.

Other Fees

Technology Fee: A \$100.00 fee per semester/session is charged to all students to have access to computers. This fee helps the College maintain up-to-date and adequate technology facilities for students.

SCUBA Course Fee: A \$100.00 fee is charged to all students taking ESS 102ws Open Water Scuba Diver course. This fee helps the college maintain the equipment necessary for the course.

Laboratory Fee: Students taking science, and agriculture laboratory courses are required to pay a fee of \$25.00 for each laboratory course.

Total Cost of Ownership Fee: A total cost of ownership fee is established to supplement funding for operations and maintenance of college facilities at all campuses or sites. Below is the fees applicable to Fall – Summer:

	Fall	Spring	Summer
Fulltime Student	\$ 200.00	\$ 200.00	\$ 50.00
Part time Student	\$ 70.00	\$ 70.00	\$ 25.00

Fees Charged When Applicable

Residence Hall Security Deposit: Students applying to live in the residence halls must pay a security deposit of \$50.00. When moving out of the residence halls, the security deposit shall be refunded. Request for refunds must be in writing and submitted to Residence Hall Manager who will assess the room for damages and cleanliness. Business Office will process a check for refund of the security deposit upon receipt of clearance from the Residence Hall Manager.

Late Registration Fee: Students who register after the last day of scheduled registration are charged a late registration fee of \$5.00.

Auditing Fee: Students who are allowed to audit a course will be charged \$20.00 per credit for the course.

Credit-By-Examination Fee: A non-refundable fee of \$15.00 per course will be required when students apply to earn credit-by-examination.

Graduation Fee: \$36.50 fee is required for all students receiving a diploma for an associate degree or a third-year certificate of achievement in any program.

\$10.00 fee is required for students completing other certificate of achievement programs. The fee must be paid when filing an application for graduation.

Transcript Fee: No fee is charged for the first request for a transcript. However, \$4.00 fee is charged for each subsequent request.

Duplicate ID Fee: A \$5.00 duplicate ID fee is charged to replace a lost ID card.

Duplicate Diploma Fee: A \$ 15.00 duplicate diploma fee is charged to duplicate lost diploma.

No Sufficient Fund (NSF) Check Fee: A \$15.00 fee is assessed for each check payment made by students that are returned by the bank for insufficient funds or for closed account.

Degrees, Certificates, Graduation, and Transfer

Instructional Programs

The delivery of education and training programs in line with the economic and social objectives of the FSM is an important part of the mission of the College. The National Campus is primarily responsible for the delivery of associate degree and third-year level certificate of achievement programs. The four State Campuses are primarily responsible for the delivery of programs that address the individual needs of their states. These needs include teacher education (up to associate degree level), career and technical education, and certificate programs aimed to upgrade basic and specific skills, remedial English, and short-term training. The College remains flexible to meet expressed needs.

Placement for New Students

All students are required to take the COM-FSM Entrance Test (COMET) as part of the admission process. The results of this test determine the level at which students begin their program of study and placement in English and math courses.

All 100 level courses, with the exception of math, art, music, and agriculture, have ESL 089 Reading V or divisional placement to EN 110 Advanced Reading as a prerequisite. Degree students may place into developmental English (ESL 089, ESL 099) or math (MS 095, MS 096, MS 099) or test into Achieving College Excellence (ACE) and must successfully complete this series of courses before continuing with 100 level courses. Therefore, students may spend the first semester or two in developmental course-work before beginning study in their major program.

The math placement test, developed by the COM-FSM Math/Science Division, determines whether a student is placed in MS 095, 096, 099, 100, or 101.

Placement Criteria: The College has three levels at which students may enter the College – Certificate, ACE, and Degree.

1. Certificate: Students placing into specific one-year programs with English and math specific to the study area such as Technical English or Technical Math. COMET scores: Essay = 20, AND reading comprehension score - 5th grade.
2. ACE: Degree students required to take a series of developmental courses:
Combined Skills: ESL 091 ACE English I, ESL 092 ACE English II; Math: MS 091 ACE Math I, MS 092 ACE Math II. COMET scores: Essay = 28, AND reading comprehension score - 7th grade.
3. Degree: Students may place into one or more developmental courses or degree courses.
Reading: ESL 089, EN 110; Writing: ESL 099, EN 120a; Math: MS 095, MS 096, MS 099, MS 100. COMET scores: Essay = 34, AND reading comprehension score - 9th grade.

Achieving College Excellence (ACE)

ACE is a series of courses focused on developing English and math skills, establishing links to college level courses and providing first year experience seminars for the students. Students who have decided to pursue an academic degree, but placed into ACE from COMET, must complete ACE before taking college level courses. ACE consists of two levels of English courses and two levels of math courses. Once it is determined that a student should enroll in ACE, the COMET scores then again determine if the student takes level one or level two in English and Math. ACE is two six-week sessions with evaluation at the end of each six weeks. Students must achieve mastery in both the course modules and on the exit evaluation.

Mission Statement and Goals

COM-FSM Achieving College Excellence Program is committed to providing the learning opportunities for college-bound students to develop intellectually, socially, and emotionally for academic success at an institution of higher learning.

Develop in participants the skills and attitude necessary for the attainment of academic career, and life goals.

ACE Learning Outcomes:

Develop in participants the skills and attitude necessary for the attainment of academic career, and life goals.

The students will be able to:

1. Demonstrate mastery in math and English skills to be able to complete successfully an introductory level course.
2. Determine the value of lifelong learning and demonstrate the skills and attitudes necessary for the attainment of academic goals.
3. Demonstrate the critical thinking skills necessary to analyze, interpret, evaluate, process, and apply academic content.
4. Utilize and transfer knowledge of the foundations and concepts for math and English to the academic setting.

ACE REQUIREMENTS16 Credits

- ESL 091 ACE English I (4)
- ESL 092 ACE English II (4)
- MS 091 ACE Math I (4)
- MS 092 ACE Math II (4)

ACE includes weekly seminars on the first year of college experience.

General Education Programs

Academic Programs

The primary purpose of the General Education Program is to offer courses for general academic and vocational growth, personal enrichment, and cultural development, which will encourage students to formulate goals and develop values for the enrichment of their lives.

General Education Goals

- Goal 1: Effective Communication
- Goal 2: Critical Thinking and Problem Solving
- Goal 3: Quantitative and Scientific Reasoning
- Goal 4: Ethics and Culture
- Goal 5: Workforce Readiness

Students will be able to:

- 1.1 Write a clear, well-organized paper using documentation and quantitative tools when appropriate.
- 1.2 Make a clear, well-organized verbal presentation.
- 2.1 Demonstrate the ability for independent thought and expression.
- 2.2 Demonstrate understanding of the modes of inquiry by identifying an appropriate method of accessing credible information and data resources; applying the selected method; and organizing results.
- 3.1 Demonstrate understanding and apply mathematical concepts in problem solving and in day-to-day activities.
- 3.2 Present and interpret numeric information in graphic forms.
- 3.3 Communicate thoughts and ideas effectively using proper mathematical terms.
- 3.4 Define and explain scientific concepts, principles, and theories of a field of science.
- 3.5 Perform experiments that use scientific methods as part of the inquiry process.
- 4.1 Demonstrate a fundamental knowledge of world geography.
- 4.2 Demonstrate knowledge of civic and cultural background of a person’s own culture, including its origins and development, assumptions, and predispositions.
- 4.3 Demonstrate knowledge of major historical and contemporary events affecting one’s culture and other cultures as well as their own diverse positions on selected democratic values and practices.
- 4.4 Participate in a community project which identifies contemporary and global issues encountered and personal insights gained from this experience and which identifies an economic, environmental, or public health challenge.
- 4.5 Demonstrate an understanding of major ethical concerns.
- 5.1 Determine healthy lifestyles by describing the value of physical activity to a healthful lifestyle and participating in regular physical activity for at least one semester.
- 5.2 Demonstrate professionalism, interpersonal skills, teamwork, and leadership and decision-making skills.

The following general education core requirements apply to all associate degree programs

GENERAL EDUCATION CORE REQUIREMENTS29 Credits

English Communication Skills (9 credits)

- EN 110 Advanced Reading (3)
- EN 120a Expository Writing I (3)
- EN 120b Expository Writing II (3)

Mathematics (3 credits)

- Any 100 level or above mathematics course (3)

Natural Sciences (7 credits)

- A science course with Laboratory or AG 101, AG 110 or AG 140 (4)
- A non-lab science (3)

Social Sciences (3 credits)

- SS 150 History of Micronesia (3)

Computer Applications (3 credits)

- CA 100 Computer Literacy (3)

Exercise Sports Science (1 credit)

Humanities (3 credits)

- Any course in art, culture, music, history, literature, philosophy, or language (3)

GRADUATION REQUIREMENTS

Associate of Arts Degree Associate of Science Degree Associate of Applied Science Degree

An associate degree is awarded upon completion of the following requirements:

- General Education: Satisfactory completion of the applicable General Education Core.
- Major: Satisfactory completion of the prescribed series of courses for the selected major.
- Total Credits: Satisfactory completion of the required number of credits and courses for the selected associate degree program.
- Scholarship: Cumulative and semester grade point average (GPA) of at least 2.0.
- Application for Graduation: Submission of an Application for Graduation by the beginning of third week of the semester - see the Calendars section at the beginning of this catalog. (Application forms may be obtained from the Office of Admissions, Records and Retention.)
- Limitations:
 1. Students transferring from other institutions must earn at least 30 credits of the major at COM-FSM.
 2. A maximum of eight calendar years is allowed to fulfill the degree requirements of the selected major as described in the catalog, which was in force at the time of admission. Time is measured from the first enrollment at COM-FSM to the date of certification of completion of the degree requirements for the major. The eight-year limit and the graduation requirements may change only in the following circumstances:
 - a. The student is out of school for at least two consecutive regular semesters.
 - b. The student changes major by filing a 'change of major' form with the Office of Admissions, Records and Retention.

The eight-year period then begins from the time either of the above occurs, and the graduation requirements are determined by the catalog in effect at the time of change.

Certificate Programs

A certificate of achievement is awarded upon successful completion of a prescribed series of courses which consists of a minimum of 30 semester credits and leads to an occupational skill. To receive a certificate of achievement, students must earn a minimum cumulative grade point average of 2.0 for the prescribed series of courses.

Specific completion requirements for the various certificate of achievement programs are detailed in their descriptions.

Degree and Third-Year Programs

Except as noted, all degree and third-year programs are offered only at the National Campus.

ASSOCIATE OF SCIENCE DEGREE IN AGRICULTURE AND NATURAL RESOURCE MANAGEMENT

(also available in Kosrae)

This program prepares individuals for careers in agriculture or for further graduate study. The curriculum is structured to offer a well-rounded education in basic and applied sciences of agriculture. The program blends comprehensive classroom instruction with practical experience. The aim of the program is to graduate skilled agriculturists who can further develop and promote agriculture across the nation.

Program Learning Outcomes

Upon successful completion of this degree, students will be able to:

1. Acquire fundamental concepts and principles of land resources focusing towards development and production in a sustainable manner appropriate to Micronesia.
2. Demonstrate basic competencies in the management of land resources and food production.
3. Acquire basic skills, knowledge and attitude to manage a sustainable food production enterprise or qualify for entry-level employment in a land resource management related agency.
4. Acquire a sound scientific background that will allow transfer to a higher degree program related to land resources and food systems.

Preparatory Courses (by placement)

General Education Core Requirements29 Credits

English (9 credits)

EN 110 Advanced Reading (3); EN 120a Expository Writing I (3); EN 120b Expository Writing II (3)

Mathematics (3 credits)

Any 100 level or above mathematics course (3)

Natural Sciences (7 credits)

A science course with Laboratory or AG 101, AG 110 or AG 140 (4); A non-lab science (3)

Social Sciences (3 credits)

SS 150 History of Micronesia (3)

Computer Applications (3 credits)

CA 100 Computer Literacy (3)

Exercise Sports Science (1 credit)

Exercise Sports Science course (1)

Humanities (3 credits)

Any course in art, music, history, literature, philosophy, or language (3)

Major Requirements37-38 Credits

Agriculture (20 credits)

AG 101 Introduction to Agriculture (4); AG 110 Crop Production (4); AG 140 Principles of Animal Science (4);

AG 290 Agricultural Project Management (4); AG 299 Directed Field Experience (4)

Natural Sciences (11 credits)

SC 230 Introduction to Chemistry (4); SC 250 General Botany with lab (4); SC/SS 115 Ethnobotany (3)

Math (3 credits)

MS 150 Statistics (3)

Degree Electives (3-4 credits)

BUSINESS ADMINISTRATION PROGRAMS

Development of the private sector is key to promoting national economic self-sufficiency/self-reliance, one of the goals of the College. The Business Administration Division offers programs and courses in an effort to address this goal. The associate of science degree program in business administration is designed to provide entry-level skills for those entering the business world, to upgrade skills for those already in businesses, and to provide a stepping-stone for those wanting to pursue a higher degree in the field. In today's world, integration of information technology into an organization is indispensable, as we are learning in our island nation. To meet the challenge of keeping up with the world, the Division offers an associate of science degree in computer information systems. The program concentrates on organizational applications of technology and the development of systems and their management. Students receive a fundamental understanding of programming and networking computer systems, which prepare them for high-in-demand careers such as systems analysts, business analysts and database administrators. The Division also offers courses in accounting, business, economics, and computer applications that are required for other associate degree programs.

While employers are satisfied with graduates of the associate degree program in business administration, they also want people with higher-level skills. As a result, the Division now offers third-year certificate of achievement programs in accounting and in general business. These programs are not only designed to offer higher level courses, but to also meet other general education requirements needed to better articulate the program with fourth year programs elsewhere. To be admitted into the third-year programs, applicants are usually required to have an associate degree in business administration and a GPA of at least 2.5. Applicants who are admitted with an associate degree in a different major must complete business requirements for the associate degree program during their third-year certificate course of study. In most cases, such students might have to first complete those 100- and 200-level business courses, as most of them are prerequisites for the 300-level third-year courses.

The third year program is articulated with the University of Guam, so students can transfer smoothly from COM-FSM into the fourth and final year at that university.

ASSOCIATE OF SCIENCE DEGREE in BUSINESS ADMINISTRATION

Program Learning Outcomes

Upon completion of the degree program, the student will be able to:

1. Demonstrate basic knowledge of each of the functional areas of business – accounting, management, marketing, economics, and finance – by emphasizing their importance in an organization and describing their interrelationship in the organization's attempt to achieve its objectives.
2. Demonstrate basic knowledge and skill in the use of cost and managerial accounting concepts and techniques as management tools for planning, controlling, evaluating performance and making decisions.
3. Demonstrate basic knowledge and skill in business mathematics and elementary statistics by accurately performing common business computations, statistical data presentation and analysis.
4. Demonstrate basic knowledge and skill in intercultural writing and speaking appropriate for business.
5. Demonstrate a basic understanding of the legal environment and ethical challenges confronting business in general and in the FSM, from both local and global perspectives.

THIRD YEAR CERTIFICATE OF ACHIEVEMENT in ACCOUNTING OR GENERAL BUSINESS

Fulfillment of A.S. degree requirements (minimum cumulative GPA—2.50; minimum grade of C in business administration A.S. major courses).

Program Learning Outcomes

Upon completion of the 3rd Year Certificate program in Accounting, students will be able to:

1. Demonstrate knowledge of intermediate accounting by describing the environment and the conceptual framework of financial reporting; properly preparing and analyzing various financial statements; and show familiarity with the generally accepted accounting principles on cash and receivables, inventories, property, plant and equipment, intangibles, liabilities, stockholders' equity, and other special topics in accounting for private business.
2. Express familiarity with tax concepts, with special focus on the taxation of business entities in the United States and the Federated States of Micronesia and a minor emphasis on individual taxation in the two countries.
3. Exhibit competence in analyzing and recording transactions for state, local and the federal governments; colleges and universities and other nonprofit organizations; in preparing and interpreting financial statements; and in explaining differences in private and public sector accounting.
4. Apply knowledge and skills acquired from accounting and other courses by solving real world accounting and general workplace problems in a participating organization in the COM-FSM internship program.
5. Show an appreciation of statistical methods of sampling and estimating population statistics and competence in using computer software to calculate point estimates and confidence intervals and use statistical methods to test hypotheses, recognize trends and make forecasts to support decisions in the business/economics environment.

Program Learning Outcomes - 3rd Year General Business

Upon completion of the 3rd Year Certificate Program in General Business, students will be able to:

1. Demonstrate an understanding of basic concepts in organizational behavior, including things such as personality, individual differences, motivation, leadership, conflict, communication, group dynamics, power and politics, change, organizational structure, design and culture and cultural diversity by explaining how these concepts relate to performance and job satisfaction in the organization marketing strategy; the sequential nature of marketing and the importance of monitoring mechanisms; and the scope of comprehensive marketing in light of current technological developments.
2. Demonstrate an understanding of the intricacies of marketing planning and overall marketing strategy; the sequential nature of marketing and the importance of monitoring mechanisms; and the scope of comprehensive marketing in light of current technological developments.

3. Demonstrate an understanding of the concepts underlying corporate financial decision-making – such as capital structure, capital budgeting, short-term asset management, dividend policy, financial analysis, corporate restructuring – and how these decisions affect other areas of the firm.
4. Demonstrate an understanding of the role of entrepreneurship and small business in the (FSM) economy and show competence in basic business planning and in identifying opportunities and challenges that entrepreneurs and small business owners/managers face – both in FSM and in general – in trying to achieve their business objectives.
5. Demonstrate basic knowledge of international business by discussing its importance and explaining its theoretical foundations. The student will also be expected to describe the international economic and financial environment; the role of government, culture, politics and laws in international business; and analyze issues in management, marketing, finance, human resources, accounting and taxation.
6. Demonstrate an understanding of economic development issues faced by least developed countries (LDCs) and options for development. Such issues will include, among others, foreign aid to LDCs, unemployment, urbanization and population growth, all with special emphasis on FSM.
7. Demonstrate an understanding of statistical methods of sampling and estimating population statistics and competence in using computer software to calculate point estimates and confidence intervals and use statistical methods to test hypotheses, recognize trends and make forecasts to support decisions in the business/economics environment.

EDUCATION PROGRAMS

Originating as a teacher training institution, COM-FSM through its education division continues the task of bettering education in Micronesia. Programs are carefully designed to equip students with the necessary knowledge and skills to meet the challenges of teaching effectively in a culturally relevant manner. At present the college offers an Associate of Arts in Pre-Teacher Preparation- Elementary. In addition, it also offers a Third-year Certificate of Achievement in Teacher Preparation- Elementary. These programs provide students with courses rich in content, theoretical foundations and practical experiences (methodology), which are designed to address the needs of pre-service and in-service teachers.

Admission to the Fourth-Year Bachelor's of Science in Elementary Education requires a student to complete the Third-year Certificate of Achievement in Teacher Preparation-Elementary and a 2.50 cumulative grade point average. Applicants are also required to pass the Teacher Competency Exam before being admitted to the program.

**ASSOCIATE OF ARTS
In
PRE-TEACHER PREPARATION**

Program Learning Outcomes

Students successfully completing the AA in Pre-teacher Preparation will be able to:

1. Demonstrate basic knowledge and concepts related to elementary education;
2. Task analyze FSM and State curriculum standards, develop lesson plans, deliver lessons using a variety of strategies, develop instructional materials, manage student behavior, and assess student learning in an elementary classroom; and
3. Demonstrate professionalism.

BACCALAUREATE OF SCIENCE (new information)

In

ELEMENTARY EDUCATION

Program Learning Outcomes

In addition to completing the Program Learning Outcomes for the AA in Pre-Teacher Preparation Program and the Third-year Certificate of Achievement in Teacher Preparation – Elementary, students successfully completing the Baccalaureate of Science in Elementary Education will be able to:

1. Demonstrate the ability to teach all subjects for one semester in an elementary classroom either independently (internship) or under the supervision of a master teacher (student teaching) as measured by the following Interstate Teacher Assessment and Support Consortium (InTASC) standards (paraphrased):
 - a. *Teach and create learning experiences that make the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches meaningful for students;*
 - b. *Provide learning opportunities that support children’s intellectual, social, and personal development;*
 - c. *Demonstrate understanding of how students differ in their approaches to learning and create instructional opportunities that are adapted to diverse learners;*
 - d. *Use a variety of instructional strategies to encourage students’ development of critical thinking, problem solving, and performance skills;*
 - e. *Use group motivation to create a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation;*
 - f. *Use knowledge of effective verbal, nonverbal, and media communication techniques to foster active inquiry, collaboration, and supportive interaction in the classroom;*
 - g. *Plan instruction based upon knowledge of subject matter, students, the community, and curriculum goals;*
 - h. *Use formal and informal assessment strategies to evaluate and ensure the continuous intellectual, social and physical development of the learner;*
 - i. *Reflect and continually evaluate the effects of his/her choices and actions on others (students, parents, and other professionals in the learning community) and seek out opportunities to grow professionally;*
 - j. *Foster relationships with school colleagues, parents, and agencies in the larger community to support students’ learning and well-being;*
2. Design, deliver, and assess instruction in support of students with special needs in the elementary classroom In accordance with the requirements of the Individualized Educational Program (IEP) process, and
3. Demonstrate professionalism.

**ASSOCIATE OF SCIENCE DEGREE
in
HOSPITALITY AND TOURISM MANAGEMENT**

This program is designed to enable students to become productive workers, owners and managers in the growing fields of hospitality and tourism within the FSM and internationally. The program provides students with the basic skills needed to succeed as supervisors, managers or business owners in the food service, lodging, airline, travel provider and general tourism industries. Students will learn the importance of building a sustainable tourism economy in the Nation and abroad. They will have the opportunity to examine how the nation fits into the international travel system and the importance of providing top quality service as a foundation for developing a vibrant industry. Specific subject areas cover all aspects of the lodging, food service and travel industries.

Program Learning Outcomes

Upon successful completion of the degree, students will be able to:

1. Explain the interdependent components of the international hospitality and tourism industry including transportation, customer service, food service, lodging, attraction management, roles of national and state visitors' authorities, marketing and sales.
2. Demonstrate professional lodging specific technical skills, supervisory techniques and management skills.
3. Explain the types and elements of food service operations.
4. Demonstrate front of the house technical and supervision techniques.
5. Describe tourism attraction support services and related business opportunities.

- 6. Describe the importance of developing the FSM as a sustainable tourism destination.
- 7. Communicate in basic Japanese for lodging, food service and tourism provider guest services.

Preparatory Courses (by placement)

General Education Core Requirements29 Credits

English (9 credits): EN 110 Advanced Reading (3); EN 120a Expository Writing I (3); EN 120b Expository Writing II (3)

Mathematics (3 credits): Any 100 level or above mathematics course

Natural Sciences (7 credits): A science course with Laboratory or AG 101, AG 110 or AG 140 (4); A non-lab science (3)

Social Sciences (3 credits): SS 150 History of Micronesia (3)

Computer Applications (3 credits): CA 100 Computer Literacy (3)

Exercise Sports Science (1 credit): Exercise Sports Science course (1)

Humanities (3 credits): Any course in art, music, history, culture, literature, philosophy, or language (3)

Major Requirements.....24 Credits

Hospitality and Tourism Management (25 credits)

HTM 110 Introduction to Hospitality and Tourism Management (3); HTM 120 Introduction to World Tourism (3); HTM 150 Hospitality Supervision (3); HTM 165 Food Fundamentals and Quality Cooking (4); HTM 170 Front Office Management (3); HTM 220 Food and Beverage Management (3); HTM 230 Hospitality Marketing (3); HTM 250 Facilities Management and Practicum (3)

Accounting (4 credits)

ASSOCIATE OF ARTS DEGREE in LIBERAL ARTS

This program is designed for students who wish to take a multidisciplinary constellation of courses. Students who successfully complete this program are encouraged to transfer to a four-year college, university, or other institution.

Program Learning Outcomes

Upon successful completion of this degree program, students will be able to:

1. Enrich and deepen self-knowledge by exploring different academic experiences.
2. Articulate and understand their experiences through effective writing, reading, speaking, and various modes of artistic expression.
3. Demonstrate fundamental knowledge and basic skills appropriate to their personal and professional goals in their chosen area of specialization.

in
LIBERAL ARTS/HEALTH CAREERS OPPORTUNITY PROGRAM**

This program aims to strengthen the opportunity for students who wish to pursue health related professions. The program offers solid foundation of health-related courses necessary for succeeding at a four-year institution.

Program Learning Outcomes

Upon successful completion of the program, students will be able to:

1. Describe the structure, function and basic pathologies of the human body.
2. Demonstrate a solid foundation in basic biological sciences.
3. Describe health care and allied professions and gain experience working effectively in groups and with health professionals to address human life sciences and health problems.
4. Discuss, analyze and interpret fundamental and current issues relevant to human life sciences and health problems and communicate information in a critical, scientific and technologically advanced manner.

ASSOCIATE OF SCIENCE DEGREE
in
MARINE SCIENCE

The marine science program is designed to respond to a need expressed by the FSM leadership in the FSM States and National Economic Summits. It has been designed to take full advantage of the unique variety of marine environments available in the FSM, particularly Pohnpei. This program provides a solid foundation for students interested in pursuing a higher degree at a four-year institution.

Program Learning Outcomes

Upon completion of the COM-FSM Marine Sciences requirements, students will be able to:

1. Demonstrate fundamental knowledge of geological, geographical, physical, chemical, astrological, and biological oceanography.
2. Apply fundamental knowledge of marine sciences towards identifying and solving regional and global problems relating to marine systems.
3. Apply the scientific process to formulate hypotheses, design experiments, and collect and analyze data from which valid scientific conclusions are drawn.
4. Communicate effectively, in written and oral forms, utilizing the language and concepts of marine science.

ASSOCIATE OF ARTS DEGREE IN MICRONESIAN STUDIES

This program is designed to give students an in-depth knowledge and understanding of Micronesian history, society, government & politics, economy and culture. The A.A. degree prepares students to work in national or state government and politics, to be an elementary or high school social studies teacher, and in general to be more informed citizens of their state and nation. The program also has proven transferability to a wide range of majors at four-year colleges in the Pacific and the U.S. mainland.

Program Learning Outcomes

Upon successful completion of this degree, students will be able to:

1. Demonstrate the ability to read, speak and write critically and effectively in English about Micronesian Studies Program course content.
2. Demonstrate proficiency in the geographical, historical, and cultural literacy of the Micronesian region.
3. Demonstrate proficient knowledge of the structure and functions of the government and social, political, and economic issues concerning the Micronesian Studies course contents.
4. Demonstrate the ability to perform research and write papers relevant to Micronesia using different methods and technologies.
5. Demonstrate an appreciation of the requirements of good citizenship in the FSM.

PUBLIC HEALTH TRAINING PROGRAM - PHTP

The Public Health Training Program is a multi-entry, multi-exit educational opportunity for high school graduates who wish to enter studies in the health domain, as well as for Health Workers who wish to enhance the effectiveness of their work and improve their working conditions.

PHTP offers 1 certificate:

1. **Certificate of Achievement in Basic Public Health (CABPH)**

And 1 associate degree:

1. **Associate of Science Degree in Public Health (ASDPH)**

And 1 third-year certificate of achievement:

1. **Third-year Certificate of Achievement as: SPECIALIST IN PUBLIC HEALTH (CASPH)**

Those who complete the 3rd Year Certificate of Public Health are expected to be able to gain admission into a Bachelor of Public Health (BPH) and a Master of Public Health (MPH) at institutions awarding those degrees around the Pacific Rim.

There are **three steps** in the career ladder Public Health academic program at COM-FSM, each requiring general education and public health studies.

At the end of each step an exit qualification is awarded.

The entry criteria, course and credit requirements for each step are:

Step 1: Certificate of Achievement in Basic Public Health (CABPH)

(See certificate programs)

Step 2: Associate of Science Degree in Public Health (ASDPH)

For students holding a CABPH this step is the natural academic progression. This step provides the entry to the Associate of Science Degree in Public Health (ASDPH), and the ensuing Third Year Certificate of Achievement as Specialist in Public Health (CASPH).

Students completing this step are awarded the public health degree that provides the minimal standard for licensure as a professional public health practitioner.

Entry Criteria: Certificate of Achievement in Basic Public Health (CABPH)

Or: A qualification equivalent [*] to CABPH

And: appropriate public health work experience of at least 4 years

All to sit COMET (College of Micronesia Entry Test)

And attain placement for the pre-requisite courses of this qualification

And gain admission to a COM-FSM Degree Program.

Total credits required = 65

[*] = as determined by a review panel chaired by the division chair of the Math/Science Division with members of the Public Health faculty.

STEP 3: Third Year Certificate of Achievement/Specialist in Public Health (SPH)

The qualifications offered at this step are aimed at the continuing education of licensed public health practitioners who aspire to postgraduate studies and health research. A proper mixture of courses at this level will assist senior national and state health administrators in their different public health projects and grants.

The following qualification may be awarded:

3rd Year Certificate of Achievement as: Specialist in Public Health (CASPH)

Entry criteria: Associate of Science Degree in Public Health (ASDPH), or a similar Associate of Arts or Science Degree;

OR: Diploma in Public Health, or equivalent (see [*])

And: significant public health work experience of at least 8 years;

OR: satisfactory completion of a health-related research study

And: significant public health work experience of at least 8 years

And: favorable interview with program faculty;

All non-ASDPH-holding candidates to sit **COMET** (College of Micronesia Entry Test) and attain current admitting scores.

Total credits required = 30

[*] = as determined by a review panel chaired by the Division Chair of the Health Science with members of the public health faculty.

Program Learning Outcomes

1. Recognize, describe and discuss and research about the basic principles and practices of the specialty;
2. List, discuss and demonstrate the essential public health functions or the specialty and its interrelationships with the other specialties and health disciplines at community and national levels;
3. Describe, discuss and research adult, children and family health issues at community level;
4. Discuss and demonstrate an understanding and practice of the specialty public health competencies;
5. Demonstrate proper public health skills for its practice in the community as a national specialty practitioner;
6. Discuss and demonstrate community and cultural sensitivity in the health care environment;
7. Describe, discuss and research the health determinants and problems of adults, children and families;
8. Demonstrate proper cardiopulmonary resuscitation (CPR) and first aid techniques and other healing and patient care abilities;
9. Demonstrate the ability and discuss how to conduct a community diagnosis and need assessment of the health determinants of the specialty in a community;
10. Identify and demonstrate good practice in the specialty;
11. Have had management, planning experience and leadership role at a public health specialty at community and national levels.

Major Courses.....30 Credits

A minimum of 6 (six) courses awarding 3 credits each selected by the student, in consultation with faculty, from among the 300-level courses listed in the course descriptions: 18 Credits

A minimum of 2 (two) courses, awarding 6 credits each, one titled as “Placement in a Public Health Practicing Facility” and the other titled “Research Project in”, selected by the student, in consultation with faculty, from among the 300-level courses listed in the course descriptions: 12 Credits.

PH 312 Research Methods for Health Services Management (3); PH 314 PH Surveil. & Mgt. of Health Information Systems (3);
 PH 316 Research Proj. in Applied Epi. & Health Research (6); PH 321 Food Handling, Microbiology and Hygiene (3);

**ASSOCIATE OF SCIENCE DEGREE IN NURSING AND
 CERTIFICATE IN PRACTICAL NURSING**

The COM-FSM Career Pathways in Nursing is a multi-entry, multi-exit program that prepares practical nurses (PN) and registered nurses (RN) with the theoretical and clinical foundations for educational and career mobility in nursing, including advanced placement for currently licensed practical nurses. The Associate of Science Degree prepares nurses with the fundamentals to articulate into baccalaureate and masters degree education. The programs prepare graduates to practice nursing in a variety of health care settings in the Pacific Islands. The core competencies integrate evidence-based practice with health promotion, acute, and chronic care of individuals across the lifespan, families, villages, and communities. The nursing curriculum is adapted from the Oregon Consortium for Nursing Education (OCNE.org) model. The emphasis on culture and caring is adapted from the work of American Indian tribal college nursing programs. The philosophy and organizing framework for the programs are published in the COM-FSM Nursing Student Handbook.

Program Learning Outcomes

At the end of Level I, the competent practical nurse graduate will:

1. Demonstrate personal and professional actions based on self-reflection, core nursing values, professional standards, and the laws guiding practical nursing practice.
2. Collect health assessment and evidence-based data to guide critical thinking and judgment in the planning and delivery of safe, holistic nursing care.
3. Utilize leadership, management, and delegation principles when supervising unlicensed assistive nursing personnel.
4. Apply communication and collaboration strategies as a member of the health team.
5. Practice relationship-centered care, contributing to a caring and culturally safe environment that reflects the values of Micronesia.
6. Participate in the primary care and public health care systems in Micronesia to promote community wellness.

At the end of Level II, the competent associate degree graduate nurse will:

1. Model personal and professional actions based on self-reflection, core nursing values, professional standards, and the laws guiding registered nursing practice.
2. Investigate health assessment data, evidence-based resources to guide clinical reasoning, clinical judgment, and decision-making in the delivery of safe, holistic nursing care.
3. Demonstrate leadership in nursing and healthcare management.
4. Communicate effectively and collaborate as part of the interprofessional team.

5. Practice relationship-centered care, creating a caring and culturally safe environment that reflects the values of Micronesia.
6. Practice and contribute to the primary care and public health care systems in Micronesia to promote community wellness.

Admission Process

Admission to the nursing program is limited, based on availability of faculty and clinical resources. Students are admitted as pre-nursing, nursing, or advanced placement students. COMET exam scores determine the placement of students into ACE or college level courses.

- Pre-nursing students may be admitted at any time, based on COMET scores. Due to the rigorous nature of the nursing curriculum, students are strongly encouraged to complete all general education courses prior to admission to nursing courses.
- Nursing students are those applicants selected by the Nursing Admissions Committee. Advanced Placement students are qualified practical nurses seeking to complete the associate degree in nursing.
- All pre-nursing and PN/RN students are assigned an advisor to assist in development of an individual curriculum plan.

Application Process

The deadline to submit all required documents is May 1. After taking the COMET exam, complete the COM-FSM admission application and nursing addendum form and submit it to Nursing Department. Also submit a copy of high school and college transcripts.

Admission Requirements for the Nursing Program

- Certificate of Achievement or Completion as a Nursing Assistant, as outlined in the catalog with grades of “C” or better OR a “Pass” on a written NA validation test (80%) and skills test (100%) and medical terminology test (80%). A fee is required for validation tests.
- Demonstration of computer literacy skills (CA 100 or equivalent)
- Completion of all nursing prerequisites listed in the catalog with a grade of “C” or better. Courses may be repeated only once to improve a grade.

The Admission Process for PN/RN Nursing Students

From 2011-2013 the PN/RN program is offered on the COM-FSM National Campus only. Expansion to others campuses is based on fiscal, physical, and clinical resources and available faculty.

- Students are admitted to the PN/RN programs once per year.
- Completion of the application process does not guarantee admission.
- Admission decisions are made based on a point system. Selection criteria include: 1st preference to citizens of FSM and 2nd to residents of Micronesia. Other criteria include: GPA in prerequisite courses and general education requirements, prior placement on a wait list, and underrepresented groups. Students not admitted may reapply the following year. The purpose of selection criteria are to support student success and completion of the program and to support students who are committed to practice in Micronesia upon graduation.
- In June, students receive letters indicating full acceptance, provisional acceptance, or non-acceptance into the program. Students with provisional acceptance may be required to participate in retention activities or enroll in skill-building classes to promote success in nursing. Students not accepted work with advisors or recruitment/retention coordinators to identify next step plans.

The Admission Process for Advanced Placement Students

Applicants for Advanced Placement must submit the following documents to the COM-FSM and Nursing Departments by December 1 of the year prior to planned enrollment in Level II RN classes:

- COMET exam scores
- COM-FSM admission application and nursing application addendum.
- Copy of a current, unencumbered practical nursing license from an English speaking country.
- An official copy of high school transcripts or GED scores.
- For students who became licensed through on-the-job training, submit a letter from the Chief Nurse, documenting the training and performance as a student and within the past 3 years.
- Copy of a driver’s license, or legal identification (state ID or Passport).
- A current CPR Card.
- An official copy of college transcripts demonstrating completion of pre-nursing course requirements.
- Pass a validation exam of medical terminology at 80% or better.

Advanced Placement Acceptance Options

Option I: In spring semester, upon completion of NU 200 and NU 123 with a 75% grade of better, the student will be admitted into the nursing program at Level II in the fall semester. All Level II course requirements must be completed for graduation.

Option II: If a course average of 75% is not obtained in NU 200 and NU 123, the Admissions Committee will review the student file to consider admission into Level I fall or spring semester courses.

To Complete the Admission Process, and enroll in nursing courses, nursing students must submit to the Nursing Department forms included with the Acceptance Letter.

By July 1, read, sign, and submit an Admission Acceptance Form that outlines student responsibilities and reserves a seat in nursing classes.

- By August 1, submit documentation of health care coverage through state or private insurance coverage.
- By August 1, submit and updated COM-FSM Health Form, including documentation of immunizations, current TB skin test results, and sign an Essential Functions Form indicating capacity to practice nursing.
- By August 1, demonstrate clearance of a criminal history. Submit a current Police Clearance or Criminal Background Check. Students with questions, please contact the Nursing Department.
- In August, prior to classes, participate in a required Nursing Program Orientation and CPR training.
- In August, during the Nursing Program Orientation, standardized tests will be administered to assess student knowledge levels in areas such as reading, science, and math. The tests will provide students with additional information about skill-building needs to be successful in the nursing program. The information is used for student advisement and self-assessment only.

Expenses for the Nursing Program

Expenses for nursing students are higher than for other COM-FSM students. In addition to general tuition and fees, students will be charged higher lab fees, liability insurance fees, and other program fees. Other related costs, which are covered through Financial Aid, include uniforms, education supplies and equipment, and travel to clinical assignments. A personal computer is recommended. Fees are required by the FSM Board of Nursing for the application for licensure and PN/RN license. A Computer Specification Guide and Estimated Cost Guide are available in the Nursing Department.

Learning Expectations in the Nursing Program

The PN/RN programs are competency based. Students must demonstrate, or master, concepts and skills to pass nursing courses and graduate. Learning strategies include limited lecture and extensive laboratory application. Lab activities include interactive learning groups, independent study, computer learning activities, campus practice and simulation lab, and clinical practice in a variety of hospital and community settings. One lecture credit represents 1 contact hour. One lab credit hour represents 3 contact hours. Students are expected to spend a minimum of 2-3 hours study time outside of class/ lab for every hour in class/lab. Students can expect a minimum of a 40 hour study week while enrolled in nursing courses. Student commitment to this rigorous schedule is rewarded through client/ patient care, practice as a practical nurse or registered nurse, and 'giving back' to the community of FSM. Clinical activities, in campus lab or health settings, may be scheduled days, evenings, nights, or on weekend. While faculty attempt to provide convenient schedules, students with work and family responsibilities need to coordinate schedules carefully. Nurse preceptors, or practicing nurses, and clinical instructors guide students through clinical activities.

Nursing Department Policies

The Nursing Department maintains nursing student policies, in addition to the COM-FSM Student Handbook, due to the unique nature of nursing as a profession. These policies are published in the Nursing Student Handbook and are reviewed annually with nursing students. Examples include admission, progression, readmission, criminal background check, professional behavior, among others.

Additional Requirements for PN/RN Licensure

The requirements for nursing licensure in the Federated States of Micronesia goes beyond completion of the Certificate in Practical Nursing or Associate Degree of Science. The FSM Nurse Practice Act authorizes the Board of Nursing to set requirements for PN and RN licensure. Licensure may be denied to graduates who demonstrate:

- Fraudulent information or misrepresentation in the licensing application.
- Active history of substances abuse/chemical dependency.
- Failure to maintain the professional conduct of nurses.
- Conviction of a crime that relates adversely to the practice of nursing.

Preparatory Courses (By Placement)

General Education Core Requirements.....Total PN 26, RN 34 Credits

Prerequisites

English (9 credits)

CERTIFICATE PROGRAMS

(Except as noted, the following programs are offered at the State Campuses)

CERTIFICATE OF ACHIEVEMENT in AGRICULTURE AND FOOD TECHNOLOGY

The mission of the Agriculture and Food Technology (AFT) certificate program is to prepare students to become farm technicians, to be employed in various agriculture and food technology related areas or to pursue advanced degrees in agriculture or food technology at COM-FSM or abroad by educating them in the fundamental concepts, knowledge, and laboratory/field techniques and skills of agriculture and food technology.

Agriculture and Food Technology Certificate of Achievement program offers courses that are aligned with the agriculture degree program offered at COM-FSM National Campus. The program is designed to provide students with a science-based, and problem-solving approach of education that is effective in developing skills to prepare students for entry-level positions in government/private agencies or provides graduates with the education and training necessary to advance/transfer to the associate degree in Agriculture and Natural Resource Management (ANRM) at COM-FSM National Campus without re-taking the COM-FSM Entrance Test (COMET) after successfully completion of the program.

Program Learning Outcomes

Upon successful completion of this certificate, students will be able to:

1. Explain the basic concepts and principles used in management of land resources (crops and animals) and how resources are processed from farm to table.
2. Practice basic knowledge and skills in operating an agribusiness including management and protection of crops in nurseries.
3. Develop a foundation in math, science, and English that will allow transfer to higher-level courses to prepare them for entry-level employment.

CERTIFICATE OF ACHIEVEMENT in BOOKKEEPING

The bookkeeping certificate program is designed for those who are unable to attend the regular business degree program, or those who do not meet the admission standards for degree programs.

This one-year program is intended to prepare students for entry level jobs in the area of business, or for those who are working to upgrade their skills in managing their own business. This program also intends to reduce the FSM reliance on a foreign skilled work force and help the citizens of FSM to be productive members of the society, able to contribute to the general welfare and economic development of FSM.

High school graduates or those who pass GED are eligible for admission into the program.

Program Learning Outcomes

Upon successful completion of this certificate, students will be able to:

1. Demonstrate proper bookkeeping techniques for a small business.
2. Demonstrate general computer competence and information technology literacy.
3. Describe small business management techniques.
4. Communicate effectively in English for business purposes.
5. Perform business computations and apply logic as needed.
6. File documents properly and use common office machines.

**CERTIFICATE OF ACHIEVEMENT in COMMUNITY HEALTH SCIENCES—HEALTH ASSISTANT
TRAINING PROGRAM**

(Available at Yap and Pohnpei Campuses only)

In response to the local and regional demand for more primary health care and allied health services providers, the community health sciences program was developed to train non-physician health care providers. The training program emphasizes public health principles, interpersonal sensitivity, and clinical skills development.

To be eligible for admission to the HATP, students must have successfully completed one year of undergraduate level study. In addition, a candidate with a combination of sufficient academic achievement and two years practical experience in a health care or related field will be considered for admission.

Program Learning Outcomes

Upon successful completion of this certificate, students will be able to:

1. Demonstrate proper clinical skills when caring for both adults and children.
2. Demonstrate interpersonal and cultural sensitivity in the health care environment.
3. Describe common health problems in both children and adults.
4. Demonstrate proper CPR and First Aid techniques.
5. Demonstrate best practices in dispensary management.
6. Demonstrate ability to care for newborn babies and mothers using standard maternity techniques.
7. Identify good public health principles.

Requirements

CERTIFICATE OF ACHIEVEMENT in PUBLIC HEALTH

Step 1: Certificate of Achievement in Basic Public Health (CABPH)

This basic program provides a starting point for new entrants into the health training domain, as well as providing adequate academic bases to many of those who entered public health practice without formal training. It could also attract professionals/ practitioners of other domains to re-orient them- selves towards a career in health.

This step provides also a bridging program into the Advanced Certificate of Achievement in Public Health (ACAPH) and thus the Associate of Science Degree in Public Health (ASDPH).

Entry criteria: High school graduation or GED
All candidates to sit **COMET** (College of Micronesia Entry Test)
Total credits required = 35

Program Learning Outcomes

1. Recognize and describe basic health science facts and principles;
2. Discuss the essential public health functions;
3. Describe adult, children and family health issues;
4. Demonstrate an understanding and practice of some generic public health competencies;
5. Demonstrate proper public health skills for public health practice in the community as a state or local junior public health officer;
6. Demonstrate community and cultural sensitivity in the health care environment;
7. Describe the determinants and problems of adults, children and families;
8. Demonstrate proper cardiopulmonary resuscitation (CPR) and first aid techniques;
9. Demonstrate the ability to make a community diagnosis based on the determinants of health;
10. Identify good public health practice; and
11. Have had work experience at a public health area/ section.

Requirements

CERTIFICATE OF COMPLETION AND CERTIFICATE OF ACHIEVEMENT AS A NURSING ASSISTANT

The Nursing Assistant certificate is designed to prepare individuals to provide basic nursing care in healthcare institutions and home care settings. The role of the nursing assistant gives personal care to individual or groups of patients/clients of all ages, assists with activities of daily living, and gathers basic measurements of health status to report verbally to the nurse and chart in patient records. The nursing assistant also provides support to patients in times of emotional and social need. A professional code of conduct is a component of the role. The nursing assistant position is one of the entry points on the career pathway to education as a registered nurse.

The one semester Certificate of Completion (10 cr) meets the requirement for nursing program admission. It is designed for students with strong reading, writing, math, and science skills. The classes may be taken in conjunction with other courses prerequisite to the nursing program. The one year Certificate of Achievement (32 cr) is designed for students with minimal HS or college background in the sciences and who are exploring nursing as a career or who desire to work as a nursing assistant. Students must complete the COMET for placement in course levels for reading, writing, and math. Students must submit a Nursing Application Form, current Health Form with documentation of immunizations, and TB test results, and clear Background Check.

Program Learning Outcomes

Upon successful completion of these certificates, students will be able to:

1. Demonstrate personal and workplace actions based on core nursing values, professional standards of practice, and the law.
2. Provide basic nursing care to individuals with diverse health needs and in a variety of health care settings.
3. Provide a safe, caring, and culturally respectful therapeutic environment to improve patient/client care outcomes.
4. Communicate effectively using interpersonal, documentation, and technology skills as a member of the health care team.

CERTIFICATE OF ACHIEVEMENT in SECRETARIAL SCIENCE

The certificate program in secretarial science is designed to prepare students for the entry-level office jobs most frequently and most widely available today, as well as for those who are already working and wish to upgrade their skills in making decisions and solving office problems.

Program Learning Outcomes

Upon successful completion of this certificate, students will be able to:

1. Apply proper bookkeeping techniques in an office.
2. Demonstrate general computer competence and information technology literacy.
3. Demonstrate proper office procedures and management techniques.
4. Communicate effectively in English for business purposes.
5. Perform business computations and apply logic as needed.
6. File documents properly and use common office machines.

CERTIFICATE OF ACHIEVEMENT IN TRIAL COUNSELORS

This certificate program provides training opportunities for current as well as aspiring and upcoming trial counselors to improve their skills and competency and to prepare them to be effective decision makers in their respective courts. It also provides for networking and sharing among trial counselors.

Program Learning Outcomes

Upon successful completion of this certificate, students will be able to:

1. Have a working knowledge of the major techniques of legal research and writing.
2. Describe how the FSM and state rules of criminal law & procedure are interpreted and applied.
3. Describe the law of torts and basic principles of admiralty law.
4. Understand the concept of dispute resolution techniques including, but not limited to, mediation, arbitration, and community resolution procedures.
5. Understand the law of contracts and general business law.
6. Describe the processes of comprehensive examination of problems of proof and the rules of evidence.
7. Understand the constitution of the FSM, its States and municipalities.
8. Describe the FSM and State rules of appellate & civil procedure.
9. Describe and explain the FSM and State real property laws.
10. Practice actual supervised pre-trial and trial skills in civil and criminal cases.

CAREER AND TECHNICAL EDUCATION PROGRAM

The career and technical training divisions of COM-FSM are learning communities dedicated to creating a high quality workforce through educational excellence and student success in collaboration with its diverse communities. The goals of the division are to (1) create and provide quality technical and career instructional programs, courses, and experiences that foster student learning consistent with workforce needs; (2) foster a positive college climate that supports learning, communication, recognition, and collaboration among a diverse faculty and student body; (3) provide instructional, administrative, and student support services to enable COM-FSM to meet the goal of creating a quality workforce; (4) support and expand responsive services that provide student access into COM-FSM technical and career programs and courses and promote success within a diverse student body; (5) develop and foster partnerships with business, industry, labor, employment and training agencies, and other educational institutions; (6) promote COM-FSM technical and career program development through public relations and marketing activities, and business and industry contacts; (7) attract and develop quality and diverse personnel committed to the goals of excellence and workforce skill standards; (8) maintain current and accessible facilities and equipment, and acquire emerging technologies for the learning and work environments; and (9) promote continuous quality improvement in all COM-FSM technical and career activities and services, formal on-the-job (OJT) under the guidance of a skilled worker or journey worker and technical class

The associate of applied science (A.A.S.) degrees at COM-FSM are designed as at least a two-year technical occupational professional degree, consisting of a minimum of 60 semester credits, which provides students with skills and competencies for gainful employment. This degree is not intended nor designed for transfer directly into a baccalaureate program, but may include some baccalaureate level course offerings. The A.A.S. degree programs incorporate multiple exit points when possible; awarding of certificates and advanced certificates. Students must meet the entrance requirements for an associate degree to be admitted into the A.A.S. degree programs.

The primary purpose and features of certificate programs of study are to provide marketable, entry-level skills for a time period less than that required for associate degree programs. Certificates are organized programs of study consisting of courses designed to meet a defined set of competencies. Certificates qualify students to take external licensure, vendor-based, or skill standards examinations in the field. If standardized external exams are not available in the field of study, certificates prepare students at skill levels expected of employees in an occupation found in the local economy. The College of Micronesia-FSM oversees the implementation of the Apprenticeship program to serve the needs of the nation and the individual states. The Apprenticeship training programs at COM-FSM are approved and registered with the United States Department of Labor, Bureau of Apprenticeship Training. During the term of apprenticeship, the apprentice learns a craft or trade through a combination of formal on-the-job (OJT) under the guidance of a skilled worker or journey worker and technical classroom instruction at the College of Micronesia-FSM. The duration of the apprenticeship training varies with the individual occupation. The requirement for eligibility for the award of Certificate of Completion of Apprenticeship training is a minimum of 144 hours per year of classroom instruction plus the designated hours of practical OJT. Entry and exit points of the Associate of Applied Science Degrees in Telecommunication Technology, Electronics Technology or Building Technology.

Approved Courses for General Education

The following courses are currently approved for General Education Areas. The list is not exhaustive and may be added to during the life of the catalog. Students should check with their advisors prior to course selection. Some of the courses are limited to a specific degree or program, so students should also check the footnotes when selecting courses.

English Communication Skills

EN 110 Advanced Reading (3); EN 120a Expository Writing I (3); EN 120b Expository Writing II (3); EN 123 Technical Communications (3) 1

1 May be used for the AAS degree only.

Mathematics

MS 100 College Algebra or MS 101 College Algebra and Trigonometry (3); MS 104 Technical Math I (4) 1; MS 106 Technical Math II (4) 1

1 May be used for the AAS degree only.

Natural Science

SC 120 Biology w/lab (4); SC 130 Physical Science w/lab (4); SC 230 Introduction to Chemistry w/lab (4); SC 101 Health Science (3); SC 111 Environmental Studies (3); SC 112 Introduction to Human Nutrition (3); SC 220 Introduction to Geology (3); MR 240 Oceanography (4); AG 101 Introduction to Agriculture (4); ESS 200 Fundamentals of Wellness (3)

Social Sciences

SS 150 History of Micronesia (3)

Computer Applications

CA 100 Computer Literacy (3) 1

1 May be used for the AAS degree

Humanities

AR 101 Introduction to Art (3) 1; MU 101 Introduction to Music (3); SS 170 World History I (3); SS 240 East-Asian History I (3); SS 111 Cultural Anthropology (3); SS 195 Micronesian Cultural Studies (3); EN 201 Introduction to Literature (3); EN 204 Poetry (3); EN 205 Literature of the Sea (3); FL 101 Japanese I (3); FL 102 Japanese II (3); FL 103 Chinese I (3); FL 104 Chinese II (3)

1 May be used for the AAS degree

Exercise Sports Science

ESS 101(x) Individual activity (1); ESS 102(x) Group/team activity (1); ESS 103(x) Mind/Body Fitness (1)

ASSOCIATE OF APPLIED SCIENCE in TELECOMMUNICATION TECHNOLOGY

The Telecommunication technology program offers academic course work, technical skills training and practical experience to prepare the students for positions in the Telecom industry. Students work with communication systems such as microwave, fiber optics and telephone.

Maintenance, troubleshooting, repairing and modifying Telecommunication equipment and systems is the base for a career as a technician in this high-tech field. Telecommunications is one of the fastest growing industries in the world. The computer and information technologies are driving the need for more telecommunications services. This increase in services also drives the need for more qualified technicians. The academic course work, technical skills training and practical experience available in this program prepares the student for positions within the industry. Training on and with the state of the art computer aided instruction system at COM-FSM will provide the technical edge needed in today's telecommunication industry. Embedded within the program are two separate exit points, Certificate of Achievement in Electronic Engineering Technology, and the Associate of Applied Science in Telecommunication Technology.

Program Learning Outcomes

Upon completion of the program, students will competently be able to:

1. Practice safety and occupational health procedures in the work place
2. Use electronics tools and test equipment competently
3. Interpret schematic diagrams and waveforms
4. Build electronics projects to a given specification
5. Practice a career in the Telecom industry.
6. Troubleshoot microwave, fiber optic and telephone systems.

in
BUILDING TECHNOLOGY**

Building Technology students are introduced to theory and practice related to one specific trade occupation with the opportunity to study in other professions. The graduates develop specialist skills and knowledge of their selected profession. Building and design methodologies used to create both domestic and commercial structures from start to finish will be examined. A pre-requisite of the AAS Degree is a certificate in any of the trade certificate programs. All students entering the AAS Degree must meet all requirements to be placed into the Degree level before being admitted.

Program Learning Outcomes

Upon completion of the program, students will competently be able to:

1. Identify safety and occupational health requirements in the building industry.
2. Use specified hand and power tools.
3. Perform basic hand skills in producing products to given specifications.
4. Identify the basic function of other building trades.
5. Interpret information from blue print drawings.
6. Participate in the specific building technology trade they majored in.

Requirements

MAJOR REQUIREMENTS.....39 Credits**

(Technical Building Studies & Electrical)

***Major requirements to include minimum of 39 credits of specific technical content. Therefore, as an example, if a student is majoring in Electrical that student must complete at least 39 credits of specific electrical technical requirements.*

Graduation Requirements*.....61 Credits**

*****Diploma will state AAS Degree in Building Technology—Major in Electrical.**

**CERTIFICATE OF ACHIEVEMENT
in
CONSTRUCTION ELECTRICITY**

The Certificate of Achievement in Construction Electricity introduces the students to core principles of electricity, providing them foundational knowledge and skills and experiential development to prepare students for basic competencies required in the Electrical Trade.

Program Learning Outcomes

Upon completion of the program, students will competently be able to:

1. Demonstrate proper use and maintenance of various hand and power tools used by electricians that comply with industry safety standards.
2. Develop knowledge and skills by experimentation and calculation of electrical quantities of electrical circuits.
3. Demonstrate knowledge and skills required in electrical wiring systems in compliance with current electrical codes and standards.

ASSOCIATE OF APPLIED SCIENCE DEGREE in BUILDING TECHNOLOGY MAJOR—Construction Electricity

The Certificate of Achievement in Construction Electricity is dedicated to the college mission in providing academic, career and technical educational programs. This program prepares students' for an entry-level position in the electrical trades by educating and developing their skills to become competitive in the skilled workforce.

Program Learning Outcomes

Upon completion of the program, students will competently be able to:

1. Demonstrate proper use and maintenance of various hand and power tools used by electricians that comply with industry safety standards.
2. Develop knowledge and skills by experimentation and calculation of electrical quantities of electrical circuits.
3. Demonstrate knowledge and skills required in electrical wiring systems in compliance with current electrical codes and standards.

Meet COM-FSM entrance requirements.

CERTIFICATE OF ACHIEVEMENT in CARPENTRY

Carpentry is one of the basic trades in the construction field. Students will be introduced to the techniques and methodology of component construction involving cabinet setout, sub-floor, wall construction, roofing and interior finishing.

Program Learning Outcomes

Upon completion of the program, students will competently be able to:

1. Identify safety and occupational health requirements in the Carpentry trade.
2. Use competently specified hand and power tools.
3. Perform basic hand skills in constructing projects to given specifications.
4. Interpret construction information from blue print drawings.
5. Participate in the construction industry.

Program Requirements for Certificate in Carpentry

**CERTIFICATE OF ACHIEVEMENT
in
CABINET MAKING/FURNITURE MAKING**

Cabinet making/ Furniture making is a specialized trade within the building industry. The students will be introduced to the techniques and methodology of components involved in the construction of cabinet/furniture from working drawings, design, full size set outs, manufacturing, and installation of finished products.

Program Learning Outcomes

Upon program completion the successful graduate will be able to competently perform the following skills:

1. Identify safety and occupational health requirements in the Cabinetmaking/Furniture making industry.
2. Use specified hand and power tools competently in making products to given specifications.
3. Demonstrate competence in complete production process from plans to final finishing.
4. Interpret information from blue prints or drawings.
5. Participate in the Cabinetmaking/Furniture making trade.

Certificate of Achievement in Cabinet Making/Furniture Making Program Requirements

General Education Requirement.....13 Credits

**CERTIFICATE OF ACHIEVEMENT
in
REFRIGERATION AND AIR CONDITIONING**

Students will be introduced to the theory of refrigeration and air-conditioning and given practice in the servicing and repairs of the relevant appliances.

Program Learning Outcomes

Upon program completion the successful graduate will be able to competently perform the following skills:

1. Determine safety and occupational health requirements in the refrigeration and air conditioning industry.
2. Demonstrate proper use of refrigeration and air conditioning tools, equipment, and instruments.
3. Perform installation, preventive maintenance and repair of refrigeration and air conditioning units.
4. Participate in the refrigeration and air conditioning trade.

Program Mission:

The Refrigeration and Air Conditioning Technology program's mission is to develop skilled manpower and globally competitive human resources for the Federated States of Micronesia in the field of refrigeration and air conditioning.

Requirements

Program Description:

This program is designed to teach the students the principles of refrigeration and air conditioning. Its purpose is to provide students with knowledge and extensive hands-on training in the installation, preventive maintenance, troubleshooting, and repair of domestic refrigeration and air conditioning systems up to 5TR.

Program Goals:

The program’s primary goal is to provide students with marketable entry-level skills in the refrigeration and air conditioning industry, or any related field/career. It is designed to qualify students to take external licensure, or skill standards examinations in the field. If standardized external exams are not available in the field of study, the program prepares students to be at skill levels expected of employees in an occupation found in the local economy.

**Exit 1: Certificate of Achievement in Refrigeration and Air-conditioning Total Requirement:
34 Credits**

**CERTIFICATE OF ACHIEVEMENT
in
CAREER EDUCATION**

The certificate programs in career education are designed for those who wish to enter a trade but who also wish to broaden their education and open the possibility of future study.

In these programs the emphasis will be on practical training designed to satisfy the requirements of the basic and intermediate skill levels as specified under the Pacific Regional Trade Testing Scheme and administered by the Trade Training and Testing Unit. The program will be offered in a partnership agreement between that body and the College.

Depending on the trade area chosen, the title of the Certificate conferred will be followed in brackets by the relevant identifier as set out in the Technical Requirements section below.

Program Learning Outcomes

Upon program completion the successful graduate will be able to competently perform the following skills:

1. Identify safety and occupational health requirements in the specific trade area being studied.
2. Use specified hand and power tools.
3. Read and interpret information from technical drawings related to the respective trade.
4. Perform hand skills in their respective trades.
5. Participate in the respective trade.
6. Successfully pass the theoretical and practical exams (Basic and Intermediate Level) as specified under the Pacific Regional Trade Testing Scheme.

Program Requirements

General Education Requirements.....13 Credits

ESL 050 Technical English (3); MS 104 Technical Math I (4); CA 095 Computer Literacy (3); BU 097 Introduction to Entrepreneurship (3)

Technical Requirements.....22 Credits

Classroom (12 credits); Practicum (10 credits)

Take one of the following trade areas:

VTC Carpenter; VCT Masonry; VTP Plumbing; VTE Electrician; VTR Refrigeration/Air-conditioning VTL Linesman;
VTM Motor Vehicle Mechanics; VTDE Diesel Engine Fitter; VTW Welder; VTA Automotive; VTS Small Engine Repair, VTB Building Maintenance

Programs in the above trade areas are not always available, but are only offered on demand when qualified instructors and appropriate facilities are available.

Total Credits Required.....35 Credits

**CERTIFICATE OF ACHIEVEMENT in CAREER EDUCATION

Exit 1: Certificate of Achievement in Career Education Total Requirement: 35 Credits

**CERTIFICATE OF ACHIEVEMENT
in
CAREER EDUCATION (Emphasis: Motor Vehicle Mechanics)**

This program is designed to develop an understanding of the basic purpose, construction, operation and service of component parts and assemblies of an automobile. Students will develop the knowledge and skills required to disassemble, inspect, reassemble and perform basic repairs and maintenance on motor vehicle units and components

COURSE DESCRIPTIONS

PREREQUISITES

A prerequisite is a requirement to be met, usually by completing another course, before enrolling in a course. Course descriptions list prerequisites, if any, for each course. Courses and their prerequisites are generally offered in sequence. Students are responsible for meeting the course requirements before enrolling in a course. In unusual cases, students may ask the instructor and the Vice President for Instructional Affairs for permission to enroll in a course for which the prerequisites have not been met.

WHEN COURSES ARE AVAILABLE

Each course is taught at a specified term each year depending upon program needs and instructor availability. The suggested schedule for each degree program specifies courses that are to be taught in an academic term. A yearly schedule is available on the COM-FSM website; courses may be added depending on instructor availability. The most current schedules are available in myShark.

COURSE NUMBERING SYSTEM

Developmental Courses—010-099
 Regular Courses—100-299
 Third-Year Courses—300-399
 Fourth-Year Courses—400-499

A two or three-letter prefix indicates the course subject area. Letters F, Sp, and Su specify whether the course is offered in Fall, Spring, or Summer. Summer offerings are subject to instructor availability and may sometimes include courses normally offered in Fall or Spring.

ACCOUNTING

AC 131 Accounting I (4) (F, Sp, Su)

Prerequisite: ESL 089, MS 099

This course establishes a foundation for the understanding of the nature of accounting, basic accounting concepts and principles, and the complete accounting cycle for service and merchandising types of business operation. Extensive coverage is devoted to the use of various accounting forms and the performance of basic accounting functions including, but not limited to, recording and posting business transactions, preparing a trial balance, work sheet, and simple financial statements. The importance of internal control for cash, preparing bank reconciliation, and performing limited analysis of basic financial reports are also included.

AC 220 Accounting II (4) (F, Sp, Su)

Prerequisite: AC 131

This course builds on the understanding of accounting principles and introduces new concepts in accounting for: payroll; accounts receivable and bad debts; notes and interest; inventory; depreciation, amortization and depletion of long-term assets; partnerships and corporations.

AC 250 Managerial Accounting (3) (F, Sp, Su)

Prerequisite: AC 220

This course develops concepts and potential ethical issues related to the accounting information that managers need in carrying out three essential functions within the business enterprise, such as how to plan operations, to control activities and to make decisions.

AC 320 Intermediate Accounting I (4) (F)

Prerequisite: AC 250

This one-semester course that builds on the understanding of accounting principles developed in the first and second financial accounting courses as well as the course on managerial accounting. Topics covered will include exploring the financial reporting environment, the conceptual framework of financial reporting, a detailed theoretical study of financial statements, of cash and receivables, inventories, property plant and equipment (including depreciation and depletion), intangible assets and current liabilities.

AC 321 Intermediate Accounting II (4) (Sp)

Prerequisite: A grade of C or better in AC 320

This course is a continuation of the first intermediate accounting course. The course is intended to further develop the student's competence in financial reporting. Topics covered will include accounting for: short – and long – term liabilities and contingencies, receivables, investments, and stockholders' equity. Special topics such as income recognition and measurement of net assets; leases; the cash flow statement; accounting changes and errors; and post-employment benefits will also be covered.

AC 325 Cost Accounting (3) (F)

Prerequisite: AC 250

This is a one-semester course that covers cost accounting system output relevant to managerial decision-making, planning and control. The course builds on the foundation already established by the managerial accounting course completed by the student. Topics covered include absorption/variable costing and CVP analysis, relevant costing, budgeting, financial management, inventory and production management techniques, emerging management practices, responsibility accounting and transfer pricing, and measurement of short – and long – run performance.

AC 330 Taxation 1 (3) (Sp)

Prerequisite: A grade of C or better in AC 320

This is a one-semester first tax course aimed at introducing students to a wide range of tax concepts and types of taxpayers. While the course mainly focuses on the taxation of business entities in both the United States and in the Federated States of Micronesia, it also covers individual taxation in the two countries – individuals as proprietors, shareholders, or partners in business entities, and as employees.

AC 335 Governmental and Non-Profit Accounting (3) (F)

Prerequisite: AC 250

This course is designed to be a survey of accounting for state and local governments, the federal government, colleges and universities, and other nonprofit organizations. It is expected that students will attain a basic understanding of accounting procedures in government and nonprofit organizations and appreciate the differences between private and public sector accounting.

AC 370 Accounting Internship (3) (Sp)

Prerequisite: AC 320

Students apply the knowledge obtained in prior accounting and other relevant courses to everyday business transactions (accounting practices) under supervised conditions. Includes a 120-hour internship in the accounting department of a local private business or public entity; in addition to a four-week pre-internship lecture on special topics not covered in the Intermediate Accounting classes. The student submits periodic written reports and a comprehensive final report.

AGRICULTURE**AG 084 Basic Crop Production w/lab (4)**

This course is design to provide students with the basics and fundamentals of Crop Production. The basic principles of plant and soil relationship, plant, soil and climate change relationship, understanding the basic concept of root formation. The students will learn to execute simple but basic ideas on planting, trans-planting, soil sterilization, soil formation, different level of seed growth, fruit growth, harvesting and marketing.

AG 086 Micropropagation and Nursery Practices w/lab (4)

Introduces the basic principles and skills regarding techniques, practices and procedures of plant tissue culture (micropropagation), asepsis, laboratory plan, equipment and facilities, and green house growing.

AG 088 Landscaping (3)

It opens a whole new idea to gardening. Students will be able to understand all aspects associated with landscaping and design. This course introduces fundamental knowledge of plants and landscape construction (plants and construction relationship).

AG 090 Principles of Food Processing (3)

Introduces the students to the fundamentals of food processing and the relationship between the scientific principles and preparation procedures. It also introduces the importance of food safety, understanding food borne diseases, cross contamination and sanitation.

AG 092 Swine and Poultry Production (3)

Introduces the basic skills and principles of swine and poultry production including breed selection, feeds, housing, management, and animal health.

AG 094 Farm Management and Marketing (3)

Introduces the basic economic concepts, government policies as they relate to farm production and marketing, prepare, analyze and interpret farm records and accounts, techniques and management of farm business.

AG 096 Field Internship (5)

Designed to give the student field experience with a cooperating supervisor from either a government or private agricultural organization. This is for students who are in the last semester of the certificate program.

AG 101 Introduction to Agriculture w/lab (4)

This course provides an orientation to agricultural careers and the agriculture major by laying down the basic principles of crop, animal and soil science, forestry, resource conservation, pest management, aquaculture, food science and nutrition, marketing and extension.

AG 110 Crop Production w/lab (4)

Prerequisite: AG 101

Fosters a greater understanding of the current theories and practices in tropical horticultural, agronomic and agroforestry cropping systems. Emphasizes sustainable/low impact production techniques, hands-on field experience, and individual research, experimentation and reporting.

AG 140 Principles of Animal Production w/lab (4)

Prerequisite: AG 110

Develops general skill and knowledge of the principles of efficient production including, feeding breeds, management practices, housing, marketing, diseases, reproduction and marketing of livestock.

AG 290 Agricultural Project Management (4)

Prerequisites: AG 140

This course introduces the key concepts of entrepreneurship, business plan, market niche, and accounts for business transactions, record keeping, credit, business venture, taxes, costs, and business structure.

AG 299 Directed Field Experience (4)

Prerequisite: AG 290

A structured learning experience working under supervision in a private, non-governmental or government agency involved in agriculture or natural resource management for at least 12 hours weekly.

ART

AR 101 Introduction to Art (3)

This is a basic course designed to help students understand the elements and principles of art as well as explore a variety of media and techniques to develop creativity in the students. Students will also explore different periods in art and develop terminology to discuss and evaluate works of art..

BUSINESS AND ECONOMICS

BK 095 Bookkeeping I (3)

The course is designed to give students a basic understanding of the accounting environment and accounting principles and concepts. It includes an introduction to the accounting cycle and basic concepts in double entry bookkeeping. The procedures in the accounting cycle such as journalizing business transactions, posting to ledgers, preparation of trial balance, adjusting entries, preparation of financial statements, and closing the books for service industry organized as a proprietorship are covered. The focus on basic principles and rules of bookkeeping will provide the participant with guidelines for recording financial transactions.

BK 096 Bookkeeping II (3)

Prerequisite: BK 095

The course is designed to give students a further understanding of the accounting environment and accounting principles and concepts in a merchandising business industry organized as a partnership. Emphasis will be placed on accounting cycle procedures in merchandising, payroll bookkeeping, receivables and payables, and internal control for cash.

BU 095 Filing, Office Procedures (3)

The course is designed to have students demonstrate proficiency in general office procedures including proper communication within the internal and external business environment; the proper use of office machines; the use of office support functions such as work priority schedules, meeting plans, and travel arrangements; and the ability to select and use an appropriate filing system

BU 097 Introduction to Entrepreneurship (3)

Prerequisites: ESL 050 or ESL/BU 095

This semester length course introduces the challenges and successes in managing small business in today's market. The definition of entrepreneur, types of business organizations, legal aspects, personnel management and the criteria for establishing a small business are discussed. Students will develop a simple business plan.

BU 098 Basic Business Math (3)

The design of this course is to explore real world concepts of business math by use of applications in banking, merchandising (retail and wholesale), hotel industry, real estate, and others. It will guide students through the basic mathematical skills of whole numbers and decimals, fractions, percentages, statistics, and equations. These skills will then be applied to business situations such as payrolls, discounts, markup/markdown, interest, credit, and more.

BU 099b Office Management (3)

Prerequisites: CA 100s, CA 101s, BU 095, ESL/BU 095, ESL/BU 096, SS 100

This course is designed to prepare students in harnessing all resources for an effective management of paper work in the office and to prepare them for various office works. This course focuses on both theory and practice including 200 hours apprentice work in a designated or chosen office.

BU 100 Practicum (3)

One semester internship course where students will be assigned and supervised by a small business owner or a supervisor of an industry in the community. The students will perform the actual work that businesses and industries in the community expect of them after they successfully complete the program.

BU 101 Introduction to Business (3) (F, Sp, Su)

Prerequisite: ESL 089

This foundational course establishes a general understanding of contemporary business. It will cover business environment, business ethics and social responsibility, entrepreneurship, the global business environment and basic business laws/regulations and will introduce to the students other functional areas of business such as management and organization, human resources, marketing, financing, and accounting. The student will write a Business Plan for this course.

BU 110 Business Ethics (3)

Prerequisite: BU 101

Defines and interprets ethical standards and social responsibility and the framework under which business conducts its everyday tasks. Students will analyze the applications of business ethics as it relates to different aspects of an organization's life. The role of organization structure in implementing ethical standard and case studies related to the above topics will be covered.

BU 250 Principles of Finance (3) (F, Sp)

Prerequisite: AC 220 and BU/MS 110

This course provides an introduction to the role and objective of financial management with focus on shareholder wealth maximization, examines both analytical tools and descriptive materials that are useful in the evaluation of financial performance, and explores the domestic and international financial marketplace, the time value of money, analysis of risk and return, capital budgeting and cash flow analysis.

BU 260 Fundamentals of Management (3) (F, Sp)

Prerequisite: BU 101

Enables the students to develop an understanding of management and organization. The course focuses on important management functions such as planning, organizing, leading, and controlling for successful managerial activities. Students learn how successful managers use organizational resources through organizational functions in order to effectively and efficiently achieve organizational objectives.

BU 270 Principles of Marketing (3) (F, Sp)

Prerequisite: BU 101

Introduces students to the basic concepts of marketing such as consumer behavior, marketing research and information systems, segmentation strategy, as well as the 4Ps. Students are also introduced to international marketing and to the broader marketing environment, including political/legal, economic, demographic, competitive and ethical issues.

BU 271 Business Law (3) (F, Sp)

Prerequisite: BU 101, AC 131

Introduces the FSM and the US legal system as it relates to contracts, agency and employment, property, sales, business organization and government regulation. Students are provided an overview of the FSM Constitution and the basic principles of court organization, and a survey of tort law as applied to both the FSM and the US.

BU/MS 110 Business Math (3) (F, Sp)

Prerequisite or co-requisite: MS 100

Emphasizes performing common computations found in the various functional areas of business. Students use of graphs, equations, ratio and proportion, percentage, and measurement systems to solve typical business problems such as the calculation of trade and cash discounts, markups, taxes, employee compensation, simple and compound interest, depreciation, inventory valuation, bonds and stocks, basic financial statement analysis, and business statistics.

BU/MS 310 Applied Statistics (3) (Sp)

Prerequisite: MS 150

This course is designed to build on the fundamental concepts developed in the introductory statistics course. The student will learn statistical methods to make point estimates of population parameters, construct confidence intervals for sample statistics, perform hypothesis testing to support decisions, make inferences about populations from sample data, use samples to make inferences about the general population, and use linear regression to recognize trends and make forecasts. As in the introductory course, this course incorporates the use of a computer software package (e.g.

MS Excel, Minitab, SSSP) for both data analysis and presentation.

EC 220 Principles of Microeconomics (3) (F, Sp, Su)

Prerequisite: MS 099, ESL 089, BU 101

This course provides an introduction to the central concepts of microeconomic analysis and decision-making, such as scarcity, allocation of resources, demand and supply, elasticity and marginal utility. The concepts are then used to explain and analyze market structures, including perfect competition and monopoly. Other topics may include analysis of labor markets, property rights and international economic.

EC 230 Macroeconomics (3) (F, Sp, Su)

Prerequisite: EC 220

This introductory course in macroeconomics analyzes the aggregate economic activity in the national economy and its link with the rest of the world. Emphasis is placed on basic principles involved in the determination of the level of national output, the aggregate price level, money supply, exchange rate, employment and unemployment, inflation, fiscal and the monetary policies. It further provides a broad understanding of economic growth and its implications on the economy.

ECO 320 Economic Development (3) (F)

Prerequisite: EC 230

The course exposes the student to economic development issues faced by developing countries. The student will explore the characteristics of developing countries, especially the least developing countries (LDCs), the challenges facing these countries, and some options and strategies for development. Theories of economic growth and trade and development models will be covered at the basic level. Other economic development issues to be covered include macroeconomic policy, agricultural and industrial development, foreign aid and foreign direct investment, debt, unemployment, urbanization and population growth problems. The economic development challenges of the FSM and Pacific region will be given particular attention.

FIN 312 Corporate Finance (3) (Sp)

Prerequisite: AC 320

This course builds on the material learned in the Principles of Finance course and further develops the necessary tools to help the manager analyze and solve financial problems in a business organization. Topics include financial planning, asset valuation, capital budgeting, capital structure, financial analysis, dividend policy, corporate restructuring, and some aspects of international finance. Also covered is the role of finance in the other functional areas of the business.

MGT 320 Organizational Behavior (3) (F)

Prerequisite: BU 260

Covers the human relations movement; basic concepts in behavior pertaining to organizations including personality, motivation, leadership, communication, change, conflict, and group dynamics. Course includes the relationship of these concepts to performance, job satisfaction and organizational commitment.

MGT 350 International Business (3) (F)

Prerequisite: BU 260 and EC 220 or EC 230

Examines the theoretical foundations of international trade and investment; the role of government in international business; cultural, political and legal issues; the international economic and financial environment; and issues in management, marketing, finance, and human resource management, with a brief overview of international accounting and taxation. U.S. and FSM business perspectives are given special emphasis.

MGT 360 Entrepreneurship & Small Business Management (3) (F)

Prerequisite: BU 250, BU 260 & BU 270

Enables students to develop an understanding of entrepreneurship and small business management by studying entrepreneurial strategies, the identification and pursuit of new venture opportunities, and the development of business plans. Students will also study the FSM macro environment and how it directly or indirectly influences entrepreneurship and the establishment and growth of small businesses in the FSM.

MKT 311 Marketing Strategy (3) (Sp)

Prerequisite: BU 270

This course builds on the marketing concepts developed in the principles of marketing course. The course focuses on procedures for planning and developing marketing strategies involving the marketing mix for both production and service businesses. The course also examines global market strategies.

COMPUTER**CA 095 Basic Computer Applications (3)**

This course is designed to introduce basic computer skills for students in the bookkeeping certificate program. Emphasis is placed on developing the skills necessary to operate PC computers effectively and be productive in school and business surroundings. This course requires students to identify computer hardware components, software, and use Microsoft Office to create personal and business related files in Word, Excel and PowerPoint.

CA 100 Computer Literacy (3) (F, Sp, Su)

Prerequisite: ESL 089

This course covers basic computer concepts. It introduces the computer system to student as an essential tool that, with the support of its hardware and software components, it can be used to attain literacy in computing. The course outlines the main distinctions between hardware and software components of a modern day computer and making sure to equip student with necessary skills required in order to demonstrate an adequate level of proficiency in the usage of these components. Basic skills in using Internet and web-based search engines is also provided with an emphasis on accessing credible information and data resources in conducting academic research and reporting.

CA 105 Data Analysis Using Spreadsheets (3) (F, Sp, Su)

Prerequisite: CA 100

The course focuses on the use of advanced functionalities of Spreadsheet to create and analyze data. It introduces student the use of the advanced functions such as financial functions, logical functions, lookup or reference functions, statistical functions and some information functions that are significant to manipulating and analyzing data and information. The student learns to generate reports such as tables, worksheets, and charts.

CA 100s Computer Literacy for Secretaries (4)

This course introduces students to computer concepts, hardware, software and their working relationship. It provides students with basic knowledge of the Microsoft Windows operating system and word processing to interact effectively in business and everyday life. The Internet and Email etiquette are also introduced. The students will be further trained to develop correct typing techniques, and to perform typing requirements and skills through the mastery of the principles of touch-typing. The students are trained to perform typing skills accurately and neatly to attain a speed of 30-45 net words per minute with an error tolerance of 3 per minute.

CA 101s Computer Applications for Secretaries (4)

Prerequisite: CA 100s

Builds on an understanding of computer fundamentals, emphasizing the use of electronic spreadsheet in business, using Microsoft Excel topics such as building worksheets, doing math with formulas and functions, formatting and printing worksheets. In addition, students will be able to create professional presentations using the Microsoft PowerPoint application. Introduction to electronic filing, management of records, and reporting will be covered using Microsoft Access database. Continued emphasis is given to the development of typing power so that students may attain a minimum speed of 45 correct words a minute with error tolerance of one error per minute on a 5-minute timed writing. This course includes 16 hours of keyboarding.

COMMUNITY HEALTH SCIENCES**CHS 220 Review of Health Science (5)**

This course gives an overview of the health care system and the role of the community health worker. The course prepares the student to participate in community health assessment and to use the results to help organize health improvement activities.

CHS 224 Health Problems in Adults (5)

Prerequisite: CHS 220

This course is a survey of conditions commonly encountered in adult patients in the dispensary. It is designed to equip students with the skills they need to provide basic care. This course is designed for health assistants (HA) who are based in dispensaries in areas where there is no doctor.

CHS 231 Maternal and Child Health I (5)

Prerequisite: CHS 220

This course targets the care, especially preventive and health promotion care, related to children and women of child-bearing age. It is designed for community health workers (CHWs) who will be working in the villages or district centers as well as for health assistants who are based in dispensaries where there is no doctor.

CHS 232 Non Communicable/Communicable Diseases (5)

Prerequisite: CHS 220

This is a survey course of the most important diseases that afflict people in Micronesia. Its focus is on the interplay of host, agent and environmental factors in the production of disease and on the things that can be done to prevent each disease and to prevent disability and death once disease occurs.

CHS 233 Behavioral Health (2)

This is a survey course of the most important behavioral diseases and the things that can be done for them, including preventive measures, and measures to limit damage to individuals, families and communities once disease occurs. Designed for both CHWs and HAs.

CHS 234 Human Nutrition (3)

Prerequisite: CHS 220

In this course, the relationship between diet and health is explored, focusing on the role of the health worker for improving health through nutrition. Designed for both CHWs and HAs.

CHS 235 Dental Health (2)

This course develops an understanding of dental disease and the simple measures that can be implemented by health workers to prevent most of it. Designed for both CHWs and HAs.

CHS 240 Maternal and Child Health II (5)

Prerequisite: CHS 220, 231

This course is designed to teach the elements of care for pregnant patients and care for the woman and infant during labor and the postpartum period. Designed for HAs.

CHS 241 First Aid Care (3)

Prerequisite: CHS 220

This course discusses the emergency management of the common life threatening situations. It is geared toward approaches that are feasible to apply at the community and dispensary level (rather than at the hospital emergency room).

CHS 242 Environmental Health (2)

This course develops the principles and practice of environmental health, following the World Health Organization's Healthy Villages model. Designed for both CHWs and HAs.

CHS 244 Dispensary Management (5)

Prerequisite: CHS 220

This module will develop knowledge and skills related to management in primary health care, with particular emphases on dispensary management for decentralized health care. Designed for HAs.

CHS 251 Health Problems in Children (5)

Prerequisite: CHS 220

This course focuses on the major health problems encountered in children in the community. It provides information on standard protocols for the recognition and diagnosis of disease, and its counseling, treatment, and prevention. It covers also the indications and process of referral. Designed for HAs.

EDUCATION**ED 110 Introduction to Professional Teaching (3)**

This course introduces the student to the field of elementary education as a profession. The course introduces education terminology, history of education, curriculum standards, principles of assessment, classroom management, and lesson planning using student learning outcomes. The student makes at least four classroom observations in an elementary classroom. Student professionalism is measured.

MS/ED 210 Math for Teachers (3)

This course provides the student with an understanding of mathematics concepts. The course focuses on the FSM and state elementary math curriculum standards and benchmarks which include: number, operation, computation; geometry, measurement, and transformation; patterns and algebra; and statistics and probability. The student also explores ethnomathematic concepts and participates in hands-on activities. Student professionalism is measured.

SC/ED 210 Science for Teachers (3)

This course provides the student with an understanding of science concepts. The course focuses on the FSM and state elementary science curriculum standards and benchmarks which include: science as inquiry; physical science and technology; earth and space science; life and environmental science; and marine science. The student explores scientific concepts through hands-on activities. Student professionalism is measured.

ED 211 Classroom Methods (3)

Prerequisite: ED 110

This course is a preliminary application of concepts as taught in ED 110. The course focuses on the task analysis of the FSM and state curriculum standards and benchmarks, lesson planning, classroom structure and management, lesson delivery, and assessment of student learning outcomes. The student teaches at least two lessons to peers. Student professionalism is measured.

ED 213 Multi-Grade Classroom Teaching (3)

Prerequisites: ED 110, ED 211, and PY 201

This course builds on concepts taught in ED 211 and provides an introduction to the theory and practice of multi-grade education as applied to FSM classrooms. The course provides practical ideas for implementing a multi-grade classroom environment including teaching strategies, grouping strategies, management, and assessment strategies. The student teaches at least two lessons in a multi-grade classroom. Student professionalism is measured.

ED 215 Introduction to Exceptional Children (3)

Prerequisites: EN 110, EN 120a

This course introduces the student to concepts of exceptionality. The course focuses on special education terminology and concepts, history of special education, laws governing individuals with exceptionalities and implications for schools and communities, and categories of exceptionalities. The student observes an individual with special needs, interviews the family, and writes a report. Student professionalism is measured.

ED 220 Education of Exceptional Children (3)

Prerequisite: ED 215

Analyzes conditions relative to exceptional individual cases with major emphasis on individual differences and intervention strategies for adapting educational programs.

ED 225 Differentiated Instruction (3)

Prerequisites: ED 110, ED 211, PY 201

This course builds on concepts taught in ED 211 and provides an introduction to the theory and practice of differentiated classroom as applied to FSM classrooms. The course provides practical ideas for implementing a differentiated classroom environment including teaching methods, grouping strategies, management, and assessment strategies. The student teaches at least two differentiated lessons in an elementary classroom. Student professionalism is measured.

EDU 271 Visual Arts and Technology in the Classroom (3)

Prerequisites: ED 110, ED 211

This course introduces the use of instructional media and technology in the elementary classroom. The course focuses on the creation and use of various instructional media and technology to enhance student learning. The student creates instructional materials and demonstrates the use of them in the classroom. Student professionalism is measured.

ED 292 Practicum and Seminar (3)

Prerequisites: ED 110, ED 211

This course is the culmination course for the AA in Pre-Teacher Preparation program. The student develops lesson plans based on FSM and state standards and benchmarks, delivers lessons, manages the classroom, and assesses student learning. The student teaches at least four lessons in an elementary classroom. Student professionalism is measured.

PY 201 Human Growth and Development (3)

Prerequisites: EN 110, EN 120a

This course introduces the student to human growth and development. The course emphasizes physical, behavioral, humanistic, cognitive, emotional, and moral issues related to human development. The course covers the entire human life cycle from the prenatal period through old age and death. Student professionalism is measured.

PY 300 Educational Psychology (3)

This course builds on theories and concepts taught in PY 201 Human Growth and Development. The course focuses on classroom application of theories of learning and development, intelligence, motivation, behavior modification principles, development of instructional objectives, Bloom's taxonomy, task analysis of FSM and state curriculum standards and benchmarks, and assessment of student learning. The student analyzes authentic situations in the elementary classroom and recommends ways to improve student learning. Student professionalism is measured.

ED 301a Language Arts Methods (4)

This course provides the student with methods for teaching language arts skills in both English and vernacular to elementary-age students. The course requires the student to task analyze FSM and state language arts curriculum, apply a variety of teaching approaches appropriate to listening and speaking, writing, and literature, develop lesson plans with supplemental materials, deliver lesson plans, assess student learning progress, and self-reflect on lesson delivery. The student integrates two or more subject areas, includes strategies for differentiated learning, and links the concepts to the elementary students' environment. The student teaches at least four lessons to peers. Student professionalism is measured.

ED 301b Reading Methods (4)

This course provides the student with methods for teaching reading in both English and vernacular to elementary age students. The course requires the student to apply a variety of approaches appropriate to teaching word recognition, fluency, vocabulary, and text comprehension; teach lesson tasks to peers; assess student learning progress; and self-reflect. Each course outcome is linked to one or more of the FSM reading benchmarks and is taught to peers. Student professionalism is measured.

ED 302 Social Studies Methods (3)

This course provides the student with methods for teaching social studies to elementary- age students. The course requires the student to task analyze FSM and state social studies curriculum standards and benchmarks, apply a variety of teaching approaches appropriate to the social studies themes/ strands, develop lesson plans with supplemental materials, deliver the lesson plans, assess student learning progress and self-reflect on lesson delivery. The student integrates two or more subject areas, includes strategies for differentiated learning, and links the concepts to the elementary students' environment. The student teaches at least five lessons to peers. Student professionalism is measured.

ED 303 Math Methods (4)

This course provides the student with methods for teaching mathematics to elementary-age students. The course requires the student to task analyze FSM and state mathematics curriculum standards and benchmarks, apply a variety of teaching approaches appropriate to the mathematics strands, develop lesson plans with supplemental materials, deliver the lesson plans, assess student learning progress and self-reflect on lesson delivery. The student integrates two or more subject areas, includes strategies for differentiated learning, and links the concepts to the elementary students' environment. The student teaches at least four lessons in an elementary classroom. Student professionalism is measured.

ED 304 Science Methods (4)

This course provides the student with methods for teaching science to elementary-age students. The course requires the student to task analyze FSM and state science curriculum standards and benchmarks, apply a variety of teaching approaches, develop lesson plans with supplemental materials, deliver the lesson plans, assess student learning progress, and self-reflect on lesson delivery. The student integrates two or more subject areas, includes strategies for differentiated learning, and links the concepts to the elementary students' environment. The student teaches at least four lessons in an elementary classroom. Student professionalism is measured.

ED 330 Classroom Management (3)

This course provides skills in classroom management with emphasis on proactive behavior management techniques and classroom organization. The course focuses on organization of the classroom for instruction, techniques for actively engaging students in learning, ways to communicate with elementary students and their parents, and techniques for handling behavior problems in the elementary classroom. The student conducts at least two observations in an elementary classroom. Student professionalism is measured.

ED 338 Teaching Students with Special Needs in the Regular Classroom Setting (3)

Prerequisites: ED 301b, ED 303

This course provides the student with techniques and procedures for accommodating students with special needs in a regular elementary classroom. The course focuses on assessing, diagnosing, and developing accommodations for students with special needs in the areas of reading and math and developing an individualized education program (IEP). The student develops accommodation materials and strategies for a lesson and presents them to peers. Student professionalism is measured.

ED 392 Practicum and Seminar (3)

Prerequisites: ED 301b, ED 303, ED 330

This course is the culmination course for the Third Year Certificate of Achievement in Teacher Preparation-Elementary program. The course requires the student to interpret FSM and State curriculum standards and benchmarks, develop lesson plans in the core subject areas, deliver lessons to elementary-age students with appropriate visual aids and supporting materials, assess student performance, and self-reflect on the delivery of lessons for purposes of improvement. The student integrates two or more subject areas, includes strategies for differentiated learning, and links the concepts to the elementary students' environment. The student teaches at least four lessons in an elementary classroom. Student professionalism is measured.

EN 351 Performing Arts for the Elementary Classroom (3)

This course provides the student a working knowledge of the fundamentals of performing arts in an elementary-age classroom. The course focuses on strategies for integrating music, dance, visual arts, and drama in lessons. The student presents at least two of these lessons to peers. Student professionalism is measured.

ED 414 Assessment and Diagnosis of Students with Special Needs (3)

Prerequisite: ED 338

This course provides the student with procedures for assessing and diagnosing the skill needs of elementary-age children/youth with special needs. The course focuses on selecting and administering appropriate assessment instruments, diagnosing skill strengths and weaknesses based on assessment results, and developing appropriate Individual Education Programs (IEPs) for a variety of exceptionalities. Case studies and hands-on practice with elementary students with special needs are provided. Student professionalism is measured.

ED 415 Methods of Teaching Students with Special Needs (3)

Prerequisite: ED 338

This course provides the student with a variety of methods and strategies for teaching elementary-age children/youth with special needs. The course focuses on aligning methods and strategies to the needs of the child/youth as determined through assessment, developing appropriate instructional aids and materials, implementing the methods and strategies as part of an Individual Education Program (IEP), and assessing the effectiveness of the program. Case studies and hands-on practice with elementary students with special needs are provided. Student professionalism is measured.

ED 434 Handling Behavior Problems: Strategies for Classroom Teachers (3)

Prerequisite: ED 330

This course provides the student with ways to assess and handle behavior problems in the elementary classroom. The course focuses on functional behavior assessments, a variety of intervention strategies, and ways to evaluate the effectiveness of behavior interventions. The student develops behavior intervention plans for at least two case studies. Two classroom observation projects are required. Student professionalism is measured.

EDU 489 Evaluation (3)

This course offers multiple methods of testing and evaluation of learning in the elementary classroom. Contents include terminology related to testing and evaluation of student learning, the development of assessment tools, and the use of descriptive statistics to facilitate teacher's professional judgment and decision-making. The student creates a portfolio of authentic assessment instruments based on FSM and state curriculum standards and benchmarks. Student professionalism is measured.

EDU 492 Student Teaching

This course is the culmination course for the BS in Elementary Education program for pre-service teachers. The course provides a semester-long teaching experience under intensive supervision with a master teacher in a private or public school. The student designs, delivers, and assesses lessons in all core subjects and reflects on instruction in accordance with the Interstate Teacher Assessment and Support Consortium (InTASC) principles. The student provides evidence of the teaching experience in a portfolio showcase. Student professionalism is measured.

EDU 498 Internship

This course is the culmination course for the BS in Elementary Education program for in-service teachers. This course provides a semester-long teaching experience under intensive supervision with a principal/vice principal in a private or public school. The student designs, delivers, and assesses lessons in all core subjects and reflects on instruction in accordance with the (InTASC) principles. The student provides evidence of the teaching experience in a portfolio showcase. Student professionalism is measured.

ENGLISH AND LITERATURE**ESL 050 Technical English (3)**

Designed to upgrade the English skills of students to a level appropriate for vocational employment.

ESL 089 Reading V (3)

Prerequisite: Placement determined by COMET.

To prepare students to master college level coursework, the course continues to focus on the development of pre-reading, reading, and post-reading skills and strategies necessary for students to effectively process academic content materials.

ESL 091 ACE English I (4)

Prerequisite: Placement according to COMET results

The purpose of this course is to prepare at-risk students for entry into and success in entry-level college English listening, speaking, reading, and writing skills coursework. Emphasis will be on acquisition of integrated English communication skills in a wide range of activities and content areas. The course is divided into units in which students explore a common theme around which the language skills are structured.

Note: "Achieving College Excellence" is a sequence of course modules designed to assist transitional degree students who have not achieved full degree status, as determined by COMET scores, in preparing them for entry into a degree program. Upon passing all course modules, they shall be deemed minimally qualified to engage in degree coursework.

ESL 092 ACE English II (4)

Prerequisite: Divisional placement or completion of ESL 091 with a "P".

The purpose of this course is to prepare at-risk students for entry into and success in entry-level college English listening, speaking, reading, and writing skills coursework. Emphasis will be on acquisition of integrated English communication skills in a wide range of activities and content areas. The course is divided into units in which students explore a common theme around which the language skills are structured.

Note: "Achieving College Excellence" is a sequence of course modules designed to assist transitional degree students who have not achieved full degree status, as determined by COMET scores, in preparing them for entry into a degree program. Upon passing all course modules, they shall be deemed minimally qualified to engage in degree coursework.

ESL 099 Writing V (3)

Prerequisite: Placement determined by COMET.

Writing V is a writing-intensive course designed to improve the student's competency in academic writing through an increased understanding of the writing process, rhetorical patterns, and correct grammatical structures.

ESL/BU 095 ESL for Business Purposes I (4)

ESL for Business is designed to build English skills necessary in a business workplace. Students practice the reading, writing, listening, and speaking skills needed in an office setting. A computer lab component reinforces business computer skills and provides opportunities for online English practice.

ESL/BU 096 ESL for Business Purposes II (4)

Prerequisite: ESL/BU 095

This course is designed to continue building English skills necessary in a business workplace. Students practice more advanced reading, writing, listening, and speaking skills needed in an office setting. The computer lab component reinforces business computer skills and provides opportunity for online English practice.

EN 110-Advanced Reading (3)

Prerequisite: Divisional placement or completion of ESL 089 with a "C" or better.

Advanced Reading is designed to improve students' critical reading and thinking skills, increase analytical, inferential and evaluative comprehension, expand vocabulary skills, and employ effective study strategies for use across academic disciplines.

EN 120a Expository Writing I (3)

Prerequisite: Divisional placement or completion of ESL 099 with a "C" or better.

This course develops expository writing skills and introduces rhetorical patterns. The student also learns basic research skills. A passing grade in this class is C or better.

EN 120b Expository Writing II (3)

Prerequisite: Completion of EN 120a with a "C" or better.

In this course, students will focus on improving their research, pre-writing, expository writing, and critical thinking skills. The course will provide the students with the basic skills necessary to write research-supported papers in the humanities, natural sciences and social sciences.

EN 123 Technical Communication (3)

Prerequisites: ESL 089, ESL 099.

This course is designed to provide clear simplified explanation of the practical of writing in vocational/technical fields. This presents to the student the types of writing skills needed for a career in technology. It also provides ways and how to prepare and deliver presentations, speeches, and conducting interviews.

EN 201 Introduction to Literature (3)

Prerequisites: EN 120b

This course introduces students to various types of literature, including fiction, drama, and poetry. Its purpose is to familiarize students with basic literary terminology and critical theories.

EN 203 Drama (3)

Prerequisite: EN 120b

This course introduces students to various types of dramatic literature, from the ancient Greek dramas to contemporary Eastern and Western Theatre. Its purpose is to familiarize students with not only the history and theoretical aspects of theatre, but also its practical manifestations through play writing, acting, directing, stage production and theatre management.

EN 204 Poetry (3)

Prerequisite: EN 110

This course contains three major areas of inquiry. First, there is a selected analysis and review of English poetry from Chaucer to the present. Second, there is a practical study of how poetry uses the sounds of language to convey meaning. Finally, the course contains a workshop component that allows the student to experiment with various poetic forms and concepts in their own writing.

EN 205 Literature of the Sea (3)

Prerequisite: EN 110

This course is a multi-genre examination of literature of the sea, with an emphasis upon works about the Pacific and by writers of or from the Pacific region. The student will examine, analyze and interpret nautical literature in the following genres: drama, poetry, fiction (both novels and short stories), and non-fiction. The student will also create a poem and a short story or short play.

EN 208 Introduction to Philosophy (3)

Prerequisite: EN 110, EN 120a

This course introduces students to the nature of philosophy and philosophical thinking. Major areas of philosophical inquiry developed in the Western tradition are considered.

EN 209 Introduction to Religion (3)

Prerequisite: EN 110, EN 120a

This course is designed to expose students to a wide variety of religious beliefs and practices. Students will examine major religions of the world as well as the questions and issues that religion tries to address.

EN/BU 121 Business Communication (3)

Prerequisites: BU 101, CA 100

This course focuses on introducing students to writing and speaking skills appropriate for business. Business writing and oral skills are emphasized, including internal and external business correspondence, employment correspondence, business etiquette, interviewing skills, presentation-giving, intercultural communication and verbal/non-verbal communication. It also focuses on "intercultural writing and speaking appropriate for business".

EN/CO 205 Speech Communication (3)

Prerequisite: EN 120a with a grade of C or better.

This course is designed to increase awareness of the role and contribution of communication to human interaction, while transmitting practical speaking skills. Specific attention is given to models of human communication and their effects and to an increasing message awareness. Public speaking skills within this theoretical framework will be provided.

EN 220 Improving Syntax and Vocabulary: Writing for Teachers (3)

Prerequisite: EN 120b, probationary admission to 3rd Year Teacher Preparation-Elementary.

This course is designed to improve the writing skills of elementary teachers through the development of competencies in the correct use of syntax and vocabulary in written work directly related to the field of elementary education.

EXERCISE SPORT SCIENCE**ESS 101(x) Individual Activity (1)**

A variety of participatory courses that educate students about physical fitness, injury prevention, and physical activities they can pursue individually for a lifetime. Examples include resistance training and walking for fitness.

ESS 101b Badminton (1)

This course provides students the opportunity to learn basic skills necessary to play badminton both as an individual and dual sport. It will also include the history, materials and equipment, basic rules of the game, coaching and officiating and strategies of playing individual and dual events. Training for fitness and injury prevention will be tackled as preparation for rigorous activities. This course will also include the Oceania sport education program which focus on community coach and official training program.

ESS 101r Resistance Training (1)

This is a semester-long course designed to improve muscular strength, endurance and flexibility through various forms of resistance training, and to give students an appreciation of the role regular physical activity plays in the quality of life. Types of resistance utilized in this course may include resistance tubing, gravity, dumbbells, barbells, medicine balls, and other equipment designed specifically for the purpose of improving muscular strength and endurance. Students will learn basic skeletal muscle anatomy, resistance exercises for major muscle groups, and flexibility exercises for major muscle groups. Course topics also include evaluation of current fitness levels, and injury prevention specific to resistance training.

ESS 101w Walking for Health and Fitness (1)

This is a semester-long course designed to improve health, cardiovascular endurance and flexibility through walking, and to give students an appreciation of the role regular physical activity plays in the quality of life. Students will learn basic cardiovascular system anatomy and physiology, as well as flexibility exercises for major muscle groups. Physical fitness levels will be measured at the beginning and end of the course, allowing students to notice the improvements regular exercise produces. Course topics also includes injury prevention specific to fitness walking.

ESS 102(x) Group Team Activity (1)

A variety of participatory courses that educate students about physical fitness, injury prevention, and physical activities they can pursue with friends and family for a lifetime. Examples include basketball and volleyball.

ESS 102b Fundamentals of Basketball (1)

This is a semester-long course designed to improve cardiovascular endurance, speed, agility and flexibility through the team sport of basketball, and to give students an appreciation of the role regular physical activity plays in the quality of life. Students will learn basic skills necessary to play basketball, including ball handling, dribbling, shooting, decision-making, passing, offense, defense and team work. Course topics also include evaluation of current fitness levels, and injury prevention specific to basketball.

ESS 102f Fundamentals of Soccer (1)

This class emphasizes the development of beginning soccer skills, knowledge of game rules, soccer team tactics, and systems of play. Course topics also include evaluation of current fitness levels, and injury prevention specific to soccer.

ESS 102s Fundamentals of Softball (1)

This is a semester-long course designed to improve power, speed, agility and flexibility through the team sport of softball, and to give students an appreciation of the role regular physical activity plays in the quality of life. Students will learn basic skills necessary to play softball, including score keeping, hitting, pitching, catching, throwing, base-running and fielding. Course topics also include injury prevention specific to softball. Physical fitness levels will be measured at the beginning and end of the course, allowing students to notice the improvements regular exercise produces.

ESS 102tt Table Tennis (1)

This is a semester long course designed to improve cardiovascular endurance, speed, agility, flexibility and discipline through the individual & team sport of Table Tennis, and to give students an appreciation of the role regular physical activity plays in the quality of life. Students will learn basic information such as the origin of the sport, equipment and materials and skills necessary to play table tennis including hand eye coordination, physical training, introduction to sport sciences, sport management/organization and team work. Course topics also include evaluation of current fitness levels, injury prevention and nutrition specific to table tennis and other sports.

ESS 102v Introduction to Volleyball (1)

This course is designed to improve student's endurance, speed, agility and flexibility through the team sport of volleyball. Students will learn the importance of regular physical activity to quality of life. This course covers basic skills necessary to play volleyball, including score keeping, game modifications, serving, setting, passing, blocking, attacking, and injury prevention.

ESS 102ws Open Water Scuba Diver (1)

Prerequisites: ESL 089, Students must be capable of swimming.

This course will introduce students to recreational scuba diving and qualify students as a PADI Open Water Diver. Upon course completion students will be qualified to dive with a buddy independent of supervision while within the limits of their training and experience, obtain air fills and scuba equipment, plan/conduct/log open water no decompression dives when properly equipped and when accompanied by a buddy in conditions with which they have training and/or experience, and to continue their dive training. Students taking Scuba will be charged a special course fee of \$100 in addition to tuition fees.

ESS 103(x) Mind/Body Fitness (1)

Courses designed specifically to give students the opportunity to physically explore the connection between the mind and body. Examples are Yoga and Taichi.

ESS 103r Rhythmic Activities (1)

This course will focus on training students to understand and perform basic ballroom. Students will also learn the rhythms, history, and culture of each style. Students will demonstrate mastery of these styles through choreographed and non-choreographed class performances. Practicum or mass demonstration with the enclosure of some foreign and aerobic dance as form of final presentation will be included to promote enjoyable and active lifestyle.

ESS 200 Fundamentals of Wellness and Physical Fitness (3)

This course is designed to provide the student with skills and knowledge necessary to make informed choices concerning personal health and physical fitness and the overall management of personal health and lifestyle habits to achieve the highest potential for well-being. Emphasis will be placed on the importance and lifetime benefits provided through participation in physical activity. The course also covers ways to assess various components of wellness, as well as behavior modification techniques. Student will design developmentally appropriate activities and evaluate effectiveness of these activities on overall health and physical fitness.

LANGUAGES**FL 101 Japanese I (3)**

Japanese I is the first of a two-course sequence. The first objective of this course is to introduce the principle elements of the basic Japanese pronunciation and writing system; HIRAGANA, and the second objective is to develop the ability to speak simple Japanese sentences in daily life situations and encounters.

FL 102 Japanese II (3)

Prerequisite: FL 101 or by permission of the instructor

This course is the second of a two course sequence. The objectives of this course are to follow up on/what a student learned in Japanese I by developing a greater vocabulary and introducing new sentence patterns. The other basic Japanese writing system: KATAKANA is also introduced. The emphasis is placed on conversational practice so that a student can develop the ability to communicate in various situations while he/she is becoming accustomed to the language and behavioral patterns in Japanese life.

FL 103 Chinese I (3)

The course provides instruction at a beginning level in Mandarin Chinese and is aimed at students who have had no prior knowledge of the Chinese language. While the linguistic aspects of the language will be the primary focus, introduction to the social and cultural background of the language will be integrated throughout the course.

FL 104 Chinese II (3)

Prerequisite: FL 103

This is the second of a two-course sequence. This course continues instruction at a beginning level in Mandarin Chinese and is open to students who

have successfully completed FL 103 Chinese I. While the linguistic aspects of the language will continue to be the primary focus, the social and cultural background of the language will also continue to be integrated throughout the course.

FL 109 American Sign Language I

The course is designed to introduce the principles of conversational American Sign Language (ASL), which includes: manual and non-manual features, basic vocabulary, common idioms, and functional grammar with emphasis on the ability to converse in simple ASL. It will help the student to develop an understanding and appreciation of deaf culture through language usages. The students will be able to demonstrate basic knowledge in the area of language.

FL 120 Basic Japanese for Hospitality and Tourism (3)

This course introduces and develops a basic understanding of the Japanese language as utilized in Hospitality and Tourism. Japanese Language for the hospitality setting is introduced, including the basics of Japanese pronunciation and Romanization, expressions commonly used in the hospitality field and appropriate usage of situational Japanese language for hospitality services.

FL 160 Situational Japanese for Hospitality and Tourism (3)

Prerequisite: FL 120

This course is designed to help the student develop conversational Japanese language skills utilizing the phraseology of the hotel and restaurant setting. Proper sentence structure as well as situational Japanese language applications germane to the hospitality setting will be covered. Knowledge of basic Japanese is required for this course.

HOSPITALITY and TOURISM MANAGEMENT

HTM 110 Introduction to Hospitality and Tourism Management (3)

This course is designed for an exploration of the hospitality industry with emphasis on history and development. Such elements will include lodging providers, food and beverage service providers, travel agencies, transport service providers, attractions providers, event coordinators and natural environment agencies.

HTM 120 Introduction to the World of Tourism (3)

Prerequisite: HTM 110

This is a semester-length course designed to introduce students to all facets of the international tourism industry. The Federated States of Micronesia's position in the international tourism industry is also presented enabling the students to recognize the unique challenges the Nation faces in tourism and the opportunities it has for meeting these challenges. Sustainable tourism concept will be presented as well as other development models including mass tourism, eco tourism, adventure tourism, heritage tourism and recreational tourism. Examination of travel and tourism, transportation, history of travel, impacts of travel, travel patterns and trends, accommodation types, travel distribution systems, special services and products, tourism market segments, tourism marketing, tourism research and forecasting, tourism policy and planning, destination development and the role of national and state tourism authorities will be presented.

HTM 150 Hospitality Supervision (3)

Prerequisite: HTM 110 and HTM 120

Introduction to the simultaneous supervision of the multi-function hotel/restaurant and resort complex including all facets of operations.

HTM 165 Food Fundamentals and Quantity Cooking (4)

Prerequisite: HTM 110

This is a semester length course designed to introduce students to the basics in food preparation and services. Students will be taught from a systems perspective, proper hygiene, laboratory conduct, food borne diseases, kitchen safety, cooking techniques, and catering. Students will be able to prepare simple menus and entrees and apply the skills learned through the operation of a food services kitchen.

HTM 170 Front Office Management (3)

Prerequisite: HTM 150

Study of front office operations. Instruction in the duties of all front desk personnel including, cashier, night auditor, reservations clerk and the front office manager.

HTM 220 Food and Beverage Management (3)

Prerequisite: HTM 165

This course is to provide information that involves a variety of food and beverage management for the students. It aims to cover all aspects of the management in food and beverage operation. It focuses on the operation of basic concept in dining room, food, meal and beverage management as well as front of the house and back of the house departments. It emphasizes on the critical areas such as menu planning, purchasing, receiving, food cost analysis, forecasting and development and setting up a dining and table service.

HTM 230 Hospitality Marketing (3)

Prerequisite: BU 101, CA 100, HTM 120

This is a semester length course designed to introduce students to all facets of hospitality and tourism marketing. This course introduces tourism and hospitality services marketing and application of tourism marketing skills to promote FSM and other hospitality businesses. Students will have the opportunity to learn about various tourism marketing models from around the world. Students will conduct marketing specific research. This research will be applied in the drafting of a comprehensive tourism or hospitality specific marketing plan. Students will have the opportunity to understand the functions and responsibilities of a hotel sales department and the interface this department has throughout the hospitality delivery system.

HTM 250 Facilities Management and Practicum (3)

Prerequisite: HTM Advisor or Chair's consent.

A semester length course in which the student will apply the learned basic skills and knowledge in hospitality and tourism through a supervised internship at a hotel, restaurant, and travel or tourism services setting. The student is expected to successfully fulfill a total of 144 internship hours, at which 44 hours must be completed at the College in a teaching restaurant or food services facility.

INFORMATION SYSTEMS**IS 201 Computer Information Systems (3) (F, Sp, Su)**

Prerequisite: CA 100

This course provides basic through advanced computer concepts with an emphasis on both the personal computer and enterprise computing. Topics include hardware, application and system software, the Internet and World Wide Web, communications, e-commerce, societal issues, database management, systems analysis and design, programming, information systems, career opportunities, certifications in the computer field, and computer trends.

IS 220 Computer Programming (4) (F, Sp)

Prerequisite: IS 201, MS 100

This course provides an introduction to programming using one of the high-level programming languages. The course aims at presenting basic programming concepts and then a series of hand-on, step by step activities to reinforce learning through practical applications in the business environment..

IS 230 Database Design (3) (F, Sp)

Prerequisite: IS 201, MS 100 with a grade of C or better.

This course covers the fundamentals of database and its design. Fundamentals of database include the advantages of relational database compared to flat-file database, hierarchy of data (e.g. field, record, table), types of relationships among tables and SQL (Structured Query Language). Database design topics include normalization, data modeling using conceptual model (e.g. ERD) and logical model.

IS 240 Webpage Design (3) (F, Sp, Su)

Prerequisite: CA 100 with a grade of C or better.

This course provides an introduction to web development using HyperText Markup Language (HTML) and Cascading Style Sheet (CSS) as recommended by the World Wide Web Consortium (W3C). It also covers basic Search Engine Optimization (SEO) techniques, and explores responsive website designs that adapt to the requirements of emerging media like smart phones and tablets.

IS 260 Business Information Systems (3) (F, Sp)

Prerequisite: BU 101, IS 220, or concurrently with permission of the instructor.

This course is designed to make the students knowledgeable of the fundamentals underlying the design, implementation, control, evaluation, and strategic use of modern, computer-based information systems for business data processing, office automation, information reporting, decision making, and electronic commerce. While some of the effort will be devoted to hands-on work with business software, the major emphasis will be on the managerial and strategic aspects of information technology.

IS 270 Geographic Information Systems (4)

Prerequisite: IS 201

This course provides a conceptual overview and hands-on experience using ArcGIS software. The course teaches basic ArcGIS functionality and enables students to quickly take advantage of the software's powerful display and analysis capabilities. Students are introduced to the desktop applications in the ArcGIS suite and how to use them to create, edit, display, query, analyze and present geographic and tabular data.

IS 280 Introduction to Hardware and Networking (4) (F, Sp)

Prerequisite: IS 201 with a grade of C or higher.

This course provides both the theoretical and practical knowledge of computer hardware and practical computer networking. Its goal is not only to provide students with essential theoretical knowledge on computer hardware and networking but also to engage them in practical hands-on knowledge on different components of computer hardware (in the form of a Personal Computer) and as well as setting-up and connecting multiple hardware/nodes in a networking environment to save and maximize computing resources.

IS/MM 245 Desktop Publishing (3)

Prerequisite: CA 100 with a grade of C or higher.

This course provides the students knowledge in document management, desktop design principles, typography, color management, image manipulation & enhancement, advanced composition and as well as making an output in different medium like print and the web.

TRIAL COUNSELORS**LAW 200 Legal Research and Writing (3)**

Provides a working knowledge of the major techniques of legal research and writing. Upon successful completion of this course, the student should be able to: locate relevant authority in any law library for use in drafting case notebooks, memoranda, and briefs, use FSM and state legislative materials, including statutes and legislative histories, prepare a polished legal memorandum exploring both sides of a legal issue.

LAW 210 Criminal Procedure (3)

Provides an understanding of the law regulating the conduct of criminal proceedings in the courts of FSM and its states. Upon successful completion of this course, the student should know how the FSM and state rules of criminal procedure are interpreted and applied.

LAW 215 Criminal Law (3)

Introduces the major issues of substantive criminal law including the elements of different crimes, and defense to those crimes.

LAW 220 Torts (3)

This course provides an understanding of the law of torts and basic principles of admiralty law. This course covers torts of strict liability such as trespass, conversion, fire, nuisance and defamation, and torts of limited liability such as negligent action, fraudulent and negligent statements, intentional interference with contract and torts in a commercial context.

LAW 224 Contracts (3)

This course provides a basic understanding of the law of contracts and general business law; the way in which a contract may be made; the circumstances which may affect the validity of a contract; and the circumstances in which a contract may come to an end. This course also covers basic principles of international commercial law.

LAW 228 Evidence (3)

This course is a comprehensive examination of problems of proof and the rules of evidence; concept of relevance, law of hearsay, and problems of testimonial proof.

LAW 232 Constitutional Law (3)

This course examines the structure and functions of the constitutional government of the Federated States of Micronesia. Particular emphasis is placed on how constitutional issues have been addressed by the courts in the Federated States of Micronesia, through a survey of relevant court decisions.

LAW 236 Appellate and Civil Procedure/Jurisdiction (4)

This course is designed to provide the student with an understanding of FSM and state rules of appellate procedure. The course also exposes students to all aspects of civil procedure and rules of civil procedure in FSM and its states, and appellate brief writing and oral advocacy.

LAW 238 Real Property (3)

The first part of the course consists of a survey of property cases in the FSM from a Constitutional, historical and cultural perspective. An introduction to Western notions of property rights and transfers is presented for comparison purposes. The second part is a comprehensive review of the Model Rules of Professional Conduct, adopted by the FSM and the FSM Supreme Court Disciplinary Rules.

LAW 240 Trial Practice Internship (3)

Prerequisites: LAW 228, LAW 236, LAW 210 or experiential equivalent at the instructor's discretion.

This course is a hands-on practicum designed to give students trial skills experience in simulated courtroom setting. Students will complete assignments in a mock trial setting from all stages of a trial.

MARINE SCIENCE

MR 120 Marine Biology w/lab (4)

Prerequisite: ESL 089

The course introduces students to the common forms of life inhabiting the oceans of the globe including the marine microbes, plants, invertebrates, and vertebrates. Their basic structure, function, natural history and adaptations to the marine environment will be covered. Current issues in marine biology will also be discussed. Laboratory sessions and field exercises will focus mostly on the taxonomic groups.

MR 201 Aquaculture w/lab (4)

Prerequisite: A "C" or better in MR 120 or SC 255, or consent of the instructor.

An investigation of the principles underlying the culture of both marine and freshwater organisms. Pertinent aspects of the physiology of aquatic species will be covered as well as system design, water quality, nutrition, reproduction, and disease. An analysis of the constraints of the development of aquaculture will be made.

MR 210 Marine Ecology (3)

Prerequisite: A "C" or better in MR 120, SC 120, or SC 255 or consent of the instructor.

Focuses on principles of ecology, ecological terminology, and the ecology of marine ecosystems. Important physical, chemical, and biological interactions controlling coral reef, mangrove, sea grass, estuarine, pelagic, benthic and upwelling communities are discussed.

MR 230 Ichthyology w/lab (4)

Prerequisite: C or better in MR 120, SC 120 or SC 255 or instructor's permission.

Focuses on the general aspects of fish biology including tropical, temperate, freshwater and marine fishes. Topics include classification, biology, and physiology of fish. The laboratory includes internal and external examinations, identification, and field observation techniques.

MR 240 Oceanography w/lab (4)

Prerequisite: ESL 089

The course will include sections on oceanographic history, geology, chemistry, physics, biology, technology, and careers. The use of terminology will be

emphasized. Laboratory and field exercises will include demonstration of basic concepts; use of instrumentation; and the collection and presentation of oceanographic data.

MR 250 Fishery Biology and Management (3)

Prerequisite: C or better in MR 120 or MR 240 and MS 100 or MS 101 or instructor's permission.

The marine fisheries are the mainstay for the economy of a number of nations. This course will provide students with a worldwide overview of the marine fishing industry. The fundamental principles in assessing and managing stocks will be covered. To this effect, fishing techniques, life histories of major exploited taxonomic groups, methods of collecting fisheries data, stock assessment techniques, and management efforts will be discussed. Estimation of population dynamics as age, growth, mortality, and abundance will be explored using basic computer programs during laboratory sessions.

MR 252 Fishery Extension (3)

Prerequisite: MR 120

Deals with communication skills and knowledge of extension officers, conveyance of meetings, carrying out fisheries surveys, teaching adults, writing proposals and plans, writing talks for the radio, producing posters and pamphlets.

MR 254 Marine Biology Field Studies (3)

Prerequisite: MR 120

The Marine geology Field Study class is a 3-credit course that emphasizes field aspects of Marine Biology, providing students the opportunity to practice many of the concepts they have learned about in the classroom. The emphasis on field work means that this course has evolved into being heavily dependent on weekend field trips required to provide opportunities for students to work on small field projects.

MATHEMATICS

MS 091 ACE Math I (4)

Prerequisite: Placement according to COMET results.

The purpose of this course is to prepare at-risk students for entry into and success in entry-level college math coursework. Emphasis will be on acquisition of foundational math skills via: (1) regular classroom instruction; and (2) completion of purpose-designed worksheets supplemented with computer-based talking textbooks. Talking textbooks provide the students with an "any-time" classroom in which each topic in the workbook is demonstrated in narrated, step-by-step detail. All class materials are tailored to English language learners (ELLs).

Note: "Achieving College Excellence" is a sequence of course modules designed to assist transitional degree students who have not achieved full degree status, as determined by COMET scores, in preparing them for entry into a degree program. Upon passing all course modules, they shall be deemed minimally qualified to engage in degree coursework.

MS 092 ACE Math II (4)

Prerequisite: Placement according to COMET results or a grade of "P" in MS 091.

The purpose of this course is to prepare at-risk students for entry into and success in entry-level college math coursework. Emphasis will be on acquisition of foundational math skills via (1) regular classroom instruction and (2) completion of purpose-designed worksheets supplemented with computer-based talking textbooks. Talking textbooks provide the students with an "any-time" classroom in which each topic in the workbook is demonstrated in narrated, step-by-step detail. All class materials are tailored to English language learners (ELLs).

Note: "Achieving College Excellence" is a sequence of course modules designed to assist transitional degree students who have not achieved full degree status, as determined by COMET scores, in preparing them for entry into a degree program. Upon passing all course modules, they shall be deemed minimally qualified to engage in degree coursework.

MS 094 Introduction to Technical Math (4)

This is a preparatory course for technical mathematics. It is designed to provide professional-technical students with the mathematical tools needed to succeed in selected higher-level technical occupational programs. The topics covered will be focused on critical thinking, problem solving, and mathematical communication using applications in applied arithmetic, measurement, and geometry. To advance to the next level of mathematics, the student must demonstrate proficiency to at least "C" grade level.

MS 095 Prealgebra (5)

Prerequisite: by placement.

This is an intensive, one semester prealgebra course designed to prepare students for elementary and intermediate algebra courses. The course covers arithmetic operations, mixed and decimal numbers, factoring, fractions, proportions, percentages, measurements, geometry, graphing, and basic algebraic expressions.

MS 096 Elementary Algebra (5)

Prerequisite: A grade of "C" or better in MS 095, by placement, or permission of instructor.

MS 096 deals extensively with the fundamentals of algebra. Topics include the traditional arithmetic areas: fundamental operations of real numbers, polynomials, exponents, factoring, ratio, proportion, linear expressions, solving quadratic equations by factoring, and introduction to graphing.

MS 099 Intermediate Algebra (5)

Prerequisite: A grade of "C" or better in MS 096, by placement, or permission of instructor.

Students will be able to perform arithmetic operations on rational expressions; solve and graph inequalities, absolute value, functions, and systems of linear equations; evaluate, simplify, and rationalize radical expressions and complex numbers; solve quadratic equations by completing the square and using the quadratic formula; and solve and graph inverse, exponential, and logarithmic functions.

MS 100 College Algebra (3)

Prerequisite: A "C" or better in MS 099 OR a "P" in MS 092 OR by placement

Identifies components of exponential expressions in polynomials with mathematical operations of exponential expressions; factoring of up to 4th degree polynomials; recognizing rational and irrational numbers with emphasis on the use of number lines, equation and inequality solving with application problems; introduction of literal equations; working with radical expressions; graphing of two variables on the xy plane; solving systems of equations in two or three variables.

MS 101 College Algebra and Trigonometry (3)

Prerequisite: C or better in MS 100

Identifies components of exponential expressions in polynomials with mathematical operation of exponential expressions; factoring of up to 4th degree polynomials; recognizing rational and irrational numbers with emphasis on the use of number lines, equation and inequality solving with application problems; introduction of literal equations; working with radical expressions; graphing of two variables on the xy plane; solving systems of equations in two or three variables.

MS 104 Technical Math I (4)

Prerequisite: Admission (MS 100 level) or "C" or better in MS 094

The first of two courses designed to provide vocational students with the mathematical tools needed to succeed in selected occupational programs. Topics covered are basic mathematics, measurements, and the fundamental concepts of algebra, geometry and trigonometry.

MS 106 Technical Math II (4)

Prerequisite: MS 104 Technical Math I

This course is a continuation of MS 104 and is designed to provide vocational students with the mathematical tools needed to succeed in selected higher-level technical occupational programs. Topics covered include exponents and monomials, polynomials, roots and radicals, graphing trigonometry functions, angle formula, and the applications of trigonometry, vectors, complex numbers and logarithms.

MS 150 Introduction to Statistics (3)

Prerequisite: ESL 089 and passing any 100 level or higher mathematics course.

A one semester course designed as an introduction to the basic ideas of data presentation, descriptive statistics, linear regression, and inferential statistics including confidence intervals and hypothesis testing. Basic concepts are studied using applications from health, education, business, social science, and the natural sciences. The course uses spreadsheet software for both data analysis and presentation.

MS 152 Calculus I (3)

Prerequisite: MS 101

An introduction to differential calculus with an emphasis on applications in the sciences. Derivatives of exponential, logarithmic, trigonometric and algebraic functions will be studied as well as rules for finding these derivatives. Continuity and the meaning of second and third derivatives will be discussed.

MS/ED 210a Math for Teachers (3)

The course is a first semester course designed to provide the students with a broad understanding of basic mathematics concepts. The topics include: problem solving strategies, the numeration system and its operations, number theory, integers, fractions, decimals, exponents, and real numbers. This course places emphasis on the use of models, diagrams, manipulatives, applications, problem solving and reasoning. Through the use of the hands-on activities in this course, students will gain and enhance their conceptual knowledge of arithmetic from counting to algebra. These are especially geared to provide ideas, models, knowledge, and standards that are necessary for successful teaching of mathematics to elementary and middle school children.

MUSIC

MU 101 Introduction to Music (3)

A practical (applied) music course providing students with an understanding of the fundamentals of music, basic skills in note reading and instrumental performance.

NURSING

NU 100 Medical Terminology (3)

Prerequisites: ESL 089, ESL 099

This course introduces basic medical terminology used in health care settings. The organization of words with prefixes, suffixes, word roots, combining forms, special endings, plural forms, abbreviations, and symbols are included to support and reinforce understanding of anatomy and physiology and health related documents. Definitions, pronunciation, spelling, word usage, and analysis of unknown words within the context of medical applications are emphasized.

NU 101 Nursing Assistant Practice (7)

Corequisite or prerequisite: NU 100

Nursing Assistant Practice introduces concepts and skills essential to the provision of basic nursing care to individuals in a variety of health care settings, including ethical and legal standards; observation, measurement, reporting, and documentation; interpersonal skills and communication with clients, families and team members; patient/client centered care; infection control and standards/transmission based precautions; personal care, activities of daily living; nutrition and elimination; safety and emergency procedures; basic restorative care, medical-surgical, primary and public health care and end of life care.

NU 121 Study and Test-taking Skills for Nursing I (2 cr)

Corequisite: NU 125, Admission to Level I nursing courses.

This is an elective course for Level I nursing majors. Explores study and test-taking skills in nursing as applied to selected nursing content from NU 125.

NU 122 Math Skills in Nursing I (2 cr)

Corequisite: NU 125

This is an elective course for Level I nursing majors. Provides supplemental practice with the dosage calculation skills for NU 125.

NU 123 Writing Research in Nursing Lab (1 cr)

Corequisite: NU 125, Admission to Level I nursing courses.

This lab course applies the research process to nursing topics. Introduces access to common print and web-based nursing and health related resources. Introduces writing academic papers in APA format. (0/3)

NU 125 Health Promotion in Nursing (7 cr)

Prerequisites: Admission to Level I nursing courses. Corequisite: ED/PY 201, NU 123

This course introduces the core competencies and core values of the COM-FSM nursing curriculum. Focuses on activities of daily living, health behaviors, self-management, and health promotion across the life span to support healthy lifestyles of Pacific Island communities. Nursing process, basic health assessment, communication for relationship-centered interactions, medication administration, health information literacy and writing, evidenced-based nursing practice, health care outcomes, teaching-learning, and the role of the nurse in the interprofessional health team and in health systems are included. Clinical learning experiences occur in the simulation lab and a variety of health settings to develop therapeutic relationships, sound clinical judgments, safe nursing care, and self-directed learning.

(3 class, 4 lab cr)

NU 131 Study and Test-taking Skills for Nursing II (2 cr)

Corequisites: NU 133, 134, 135

This is an elective course for Level I nursing majors. Explores study and test-taking skills in nursing as applied to selected nursing content from NU 135.

NU 132 Math Skills in Nursing II (2 cr)

Corequisite: NU 133, 135

This is an elective course for Level I nursing majors. Provides supplemental practice with the dosage calculation skills for NU 135.

NU 133 Pharmacology (3 cr)

Prerequisites: NU 125, Corequisites NU 134, 135

This course introduces the principles of pharmacokinetics and pharmacodynamics of selected pharmacological agents across the lifespan. Emphasis on application of clinical reasoning to pharmacotherapeutics through client assessment, intervention, and evaluation using evidence-based practice. Explores selected natural therapeutic substances. Includes client teaching about medications in Pacific Islands communities.

NU 134 Pathophysiology 134 (3 cr)

Prerequisites: NU 125, Corequisites NU 133, 135

This course introduces basic pathophysiological processes across the lifespan, including cellular communication, genes and genetic disease, forms of cellular injury, fluid & electrolyte/acid base balance, immunity, stress coping and illness, and tumor biology. Pathophysiology and clinical manifestations of common health alterations are included, with examples on health alterations in Pacific Islands.

NU 135 Health, Illness, & Nursing I (7 cr)

Prerequisites: NU 125, Corequisites NU 133, 134

This course builds upon NU 125, with a focus on nursing assessment, planning and care of individuals with common chronic and acute health alterations across the lifespan, including client perspectives of illness and family functioning. Investigates the concepts of client autonomy, care coordination, delegation, and health care access in Pacific Islands. Clinical learning experiences are in a variety of health settings and simulation lab that emphasize application of evidence-based, culturally, and age appropriate nursing interventions. (3 class, 4 lab/clinical)

NU 141 NCLEX PN Review Course (3 cr)

Corequisite: NU 145 or instructor consent

This course helps prepare for the NCLEX-PN exam required by the National Council of State Boards of Nursing for PN licensure in the United States and several Pacific Island jurisdictions and admission to most baccalaureate and master's degree nursing programs. The test-blueprint for the NCLEX-RN exam provides the organizing structure for review utilizing lecture, small group, and online study strategies.

NU 145 PN Leadership in Clinical Practice (3 cr)

Prerequisite: NU 135

This capstone course supports transition to the PN graduate nurse role in Pacific Islands. Emphasis is placed on clinical judgment and nursing management of patients with commonly recurring health alterations, communication and collaboration with patient/clients, families, and the interprofessional health team, and leadership in the practical nurse role. Professional expectations in relation to licensure, continuing education, standards of practice, career and lifelong learning goals are examined. The course culminates with integration and self-analysis of the COM-FSM PN core competencies (1 class, 2 clinical)

NU 200 Transition to Associate Degree Nursing (6 cr)

Prerequisite: Admission to Advanced Placement ASN degree

This course introduces the core competencies and core values of the COM-FSM nursing curriculum. Provides an update in theory and application in the role of the practical nurse in the Pacific Islands, including legal, ethical, and professional behavior, relationship-based communication and collaboration, critical thinking and clinical judgment, nursing process and evidenced-based practice, health behaviors, health promotion, teaching-learning, and outcomes management in a therapeutic environment, and health information literacy and writing nursing research papers. (4 class/2 lab)

NU 221 Study and Test-taking Skills for Nursing III (2 cr)

Corequisite: NU 225

This is an elective course for Level II nursing majors. Explores study and test-taking skills in nursing as applied to selected nursing content from NU 225.

NU 222 Math Skills in Nursing III (2 cr)

Corequisite: NU 225

This is an elective course for Level II nursing majors. Provides supplemental practice with the dosage calculation skills for NU 225.

NU 225 Health and Illness in Nursing II (7 cr) Fall 2012

Prerequisites: NU 135 or 200 Corequisites: SS 150

This course builds upon NU 135, introducing application of the core competences to complex acute health alterations across the lifespan and end-of-life care. Focuses on clinical judgment prioritization of care, client and family teaching, care coordination, and ethical decision-making in acute care. Includes concepts on primary care and public health nursing in the Pacific Islands in the acute phase of non-communicable chronic diseases. Clinical learning experiences in a variety of health settings and simulation lab emphasize evidence-based practice that includes culturally, developmentally, and age-appropriate aspects in the nursing process, delegation and supervision, and collaboration with the interprofessional health team. (3 class/4 lab/clinical)

NU 231 Study and Test-taking Skills for Nursing IV (2 cr)

Corequisite: NU 235

This is an elective course for Level II majors. Application of study and test taking skills through review of selected nursing content in NU 235.

NU 235 Health and Illness in Nursing III (7 cr)

Prerequisites: NU 225 Corequisite NU 232, 245

This course builds upon NU 225, introducing application of the core competences to complex chronic health alterations across the lifespan and end-of-life care in the Pacific Islands. Focuses on prioritization of care, client and family teaching, care coordination, and ethical decision-making. Includes concepts on primary care and public health nursing in the Pacific Islands, such as non-communicable chronic diseases. Clinical learning experiences in a variety of health settings and simulation lab emphasize evidence-based practice that includes culturally, developmentally, and age-appropriate aspects in the nursing process, delegation and supervision, and collaboration with the interprofessional health team. (3 class/4 lab/clinical)

NU 241 NCLEX RN Review Course (3 cr)

Corequisite: NU 245 or instructor's consent

This course helps prepare for the NCLEX-RN exam required by the National Council of State Boards of Nursing for RN licensure in the United States and several Pacific Island jurisdictions and admission to most baccalaureate and master's degree nursing programs. The test-blueprint for the NCLEX-RN provides the organizing structure for review utilizing lecture, small group, and online study strategies.

NU 245 Leadership in Clinical Practice Capstone (3 cr)

Prerequisites: NU 225 Corequisite: NU 235

This capstone course for nursing students supports transition to the RN graduate role in the Pacific Islands. Emphasis is placed on nursing management of groups of clients with complex health alterations, utilizing principles of evidenced-based practice, clinical reasoning, prioritization, delegation, collaboration as a member of the interprofessional health team and leadership in the RN role. Professional expectations in relation to licensure, continuing education, standards of practice, career and lifelong learning goals are examined. The course culminates with integration and self-analysis of the COM-FSM nursing core competencies. (1 class, 2 clinical)

PSYCHOLOGY**PY 101 General Psychology (3)**

Prerequisites: EN 110

The course is a general overview of the concepts, theories and research behind the study of human thought, emotion and behavior. This course introduces students to the scientific study of psychology and prepares them to read, understand, analyze and write about psychology at a college level.

PY 201 Human Growth And Development (3)

Prerequisite: EN 110 and EN 120A

This course introduces the student to human growth and development. The course emphasizes physical, behavioral, humanistic, cognitive, emotional, and moral issues related to human development. The course covers the entire human life cycle from the prenatal period through old age and death. Student professionalism is measured.

PY 300 Educational Psychology (3)

Prerequisite: PY 201 and admitted into upper level Education division courses.

This course builds on theories and concepts taught in PY 201 Human Growth and Development. The course focuses on Classroom application of theories of learning and development, intelligence, motivation, behavior modification principles, development of instructional objectives, Bloom's taxonomy, task analysis of FSM and state curriculum standards and benchmarks, and assessment of student learning. The student analyzes authentic situations in the elementary classroom and recommends ways to improve student learning. Student professionalism is measured.

PUBLIC HEALTH TRAINING PROGRAM – PHTP**PH 041 Community Education (3)**

This course enables students to develop an ideological base for non formal education practice in health care setting and in the community. It discusses

the motivation of learning in adults and various principles of teaching arising from community analysis. Students will be introduced to a wide range of teaching methods suitable for use in non formal education which would help them develop appropriate interpersonal skills. This course is also designed to help health workers develop training programs to support the communities.

PH 049/ CHS 233a Behavioral Health (2)

This is a survey course of the most important behavioral diseases and the things that can be done for them, including preventive measures to limit damage to individuals, families and communities once disease occurs. Designed for both community health workers (CHWs) and health assistants (HAs).

PH 051 Introduction to Information Systems for Health Managers (3)

This course underscores the methodological importance of accurate, relevant, timely and complete data for effective and evidence-based decision-making by health managers. A wide range of data sets, from the traditional morbidity/ mortality data through those on services utilization and resource monitoring, are presented and analyzed. Elements of data display are introduced. Epidemiology provides the basis for surveillance, planning and generation of health information systems which are an important component of health care. The course will discuss the epidemiological concepts of health and measures of health, and introduces screening, epidemics evaluation and study designs.

PH 052 Essential Public Health Functions and Primary Health Care (3)

This course gives an overview of the eleven Essential Public Health Functions (EPHF) that capture the role of national health authorities (NHA) in public health. The course prepares students to participate in the preliminary assessment of NHA's performance on EPHF. Students doing this course will also learn the concept, principles and components of Primary Health Care (PHC). This would enhance their perception on the fundamental role of PHC in improving the health of people in Pacific communities and in reducing health inequalities between different groups.

PH 053 Practicum Placement in a Public Health Service (3)

This practicum placement entails supervised attendance and participation, as allowed or directed, in the activities of the specific public health service to which the student is assigned. Upon completion of the course, students are expected to have gained their first exposure to and hands-on experience in the practice of public health services.

PH 069/ CH 235 Dental Health (2)

This course develops and understanding of dental disease and the simple measures that can be implemented by health workers to prevent most of it. Designed for both community health workers (CHWs) and health assistants (HAs).

PH 079/ CHS 241 First Aid (3)

Prerequisite: CHS 220a

This course discusses the emergency management of the common life threatening situations. It is geared toward approaches that are feasible to apply at the community and dispensary level (rather than at the hospital emergency room).

PH/ MS 109 Mathematics for Health Sciences (3)

Prerequisite: MS 099 with a grade of C or better; by placement; or permission of the instructor

This course is specifically designed for health science majors. It incorporates every aspect of Mathematics relevant to health care and health prevention applications, such as arithmetic computations, algebra, ratios, proportions and systems of measurement. It also covers introductory statistics, necessary for students to analyze and interpret data, and it includes topics essential for health care personnel, such as reading medication labels, dosage calculations, calculations for basic intravenous (IV) therapy, as well as logarithms, ionic solutions and pH.

PH 111 Introduction to Basic Epidemiology and Biostatistics (3)

Prerequisite: MS 099

This course introduces the epidemiological principles and their application in the occurrence of health-related events in the population. An introductory overview of biostatistics concepts and skills that are necessary for epidemiological practice will also be addressed. Epidemiology works through studies that try to identify, describe and measure the distribution of health and disease, and their determinants, in a specific population.

PH 112 Introduction to Epi-Info and Computing for Public Health (3)

Prerequisite: CA 100 or concurrently

This course familiarizes students with the use of computers and information technology which are essential tools to enhance their academic research and writing skills. The students will also learn how to use the Epi-Info program, a statistical software for research data management, which is frequently used in public health practice.

PH 121 Environmental Prevention and Control of Disease (3)

This course equips students with knowledge and skills in the preparation of information on communicable diseases for the use in the communities, with the support of public health workers. The course will enable students to identify diseases, particularly infectious diseases; identify and apply environmental methods for disease prevention; and control transmission to humans and/or animal reservoirs.

PH 131 Food and Nutrition in the Life Cycle (3)

This course provides theoretical principles of basic nutrition and fundamental elements of nutritional needs of different age groups in the lifecycle. The course enables students to relate the nutritional principles to the human growth and development process; and to explore the health consequences of nutrition practices chosen by each person. Students will understand the physiological changes related to nutrition and the important role nutrition plays in maintaining health. This course also introduces the concept of nutritional anthropometry and growth monitoring, which may well help students to detect signs of inadequate intake of key nutrients.

PH 141 Principles of Health Promotion (3)

This course introduces students to Health Promotion, one of the disciplines of Public Health practice. Health Promotion is a relatively new field in most of the Pacific island countries. As thus, the course will cover the basic principles and approaches of health promotion with particular emphasis on health promotion programs and activities taking place in Micronesia and the Pacific. Students are expected to gain an appreciation toward the fundamental role health promotion plays in maintaining and improving the health of people in communities.

PH 151 Introduction to Pacific Health Care Systems and Traditional Medicine (3)

This course presents various health care systems in the Pacific and the special contexts under which these systems operate. It provides an overview of health service organization, traditional medicine, western medicine, utilization of health services and other contemporary issues related to health. The course offers an insight into management theories, management of the environment and organizational cultures. The fundamentals of traditional medicine are introduced and reviewed with particular focus on Micronesian traditions, wherever applicable.

PH 152 Practical Health Services Management (3)

This course introduces the concepts, definition, principles, and main functions that are important in Health Services Management. It will guide students toward good management practices that will be vital at central and peripheral levels of the health system. The management theories and concepts are translated into practical examples and exercises guiding students to understand what happens in the lower- and mid-levels of a health care system. Topics covered include the development and functioning of health teams, community participation, resources management, and management of primary health care services.

PH 211 Health Research Methodology (3)

Prerequisite: PH 111, or Instructor's permission

This course introduces students to research as an essential tool to create new knowledge and to develop proper utilization of existing knowledge in health and health care services. The course covers the basic concepts and principles in the classic quantitative approach, which looks at disease causation and patterns in the communities. It also addresses the qualitative approach, which looks at social aspects and individual behavior as factors determining people's health and disease status. Instructions on how to construct a mixed methods research design will also be presented. Other important issues related to health research, including literature review, ethical considerations, and writing strategies will be discussed.

PH 212 Surveillance, Identification and Management of an Outbreak (3)

Prerequisite: PH 111, or Instructor's permission

This course begins with a review of public health surveillance systems (PHSSs), their components and functions. Emphasis is placed on the fundamental role of a PHSS in detecting possible disease outbreaks. Students will learn the basic concepts and principles of outbreak identification and management. Basic principles on evaluation and possible solutions for improvement of public health surveillance systems, particularly those of the Pacific, are also discussed.

PH 221 Occupational Health and Safety (3)

Prerequisites: PH 121

This course introduces concepts and a practical guide to recognizing, preventing, and treating work-related and environmentally-induced injuries and diseases. Occupational diseases and the toxicological implications of workplace exposure and basic response principles are reviewed. Students will become acquainted with Health and Safety Legislation and other occupational and safety standards and guidelines. By the end of the course, students are expected to have undertaken an auditing of the hazards in one workplace and instituted a health promotion campaign in that workplace.

PH 231 Food, Nutrition and Lifestyle Diseases (3)

Pre-requisite: Either PH 131 or Instructor's permission

This course focuses on problems of inadequate and/or imbalanced nutrient intake and corresponding diseases and disorders. Related lifestyle diseases that are relevant in Micronesia will be covered. Potential risk factors for and physiological impact of nutrient deficiencies and diseases will also be discussed. The course also looks at the role of development in relation to nutrition related diseases in the Micronesian and Pacific communities. Students will be introduced to simple therapeutic diets commonly used as part of the treatment and general dietary advice.

PH 241 Case Studies and Special Issues in Health Promotion (3)

Prerequisite: PH 141, or Instructor's permission

This course has two major intentions. Firstly to expose students to a range of Health Promotion planning and evaluation instruments, techniques and methods. Secondly, and in conjunction with the first intention, to examine a range of health promotion programs and cases, particularly cases that do not fit in easily with a broad approach to health promotion studies.

PH 251 Management of Health Information Systems and Epidemiology (3)

Prerequisite: PH 111

This course is designed to promote the management of information systems and the use of epidemiological methods in planning and evaluation. Students will learn to incorporate epidemiology in developing evidence-based health care services and policies. This course will be useful to all health workers at any level of the health service especially those working in health statistics sections. The course is also available as a paper-based flexible and distance-learning package.

PH 311 Introduction to Clinical Epidemiology (3)

Prerequisites: Admitted to 3rd year CAPH

This course addresses the function of epidemiology in clinical medicine. It looks at issues of normality and abnormality, frequency of events over time (probability), risk, cause, and uncertainties associated with diagnosis, prognosis, management and outcomes. Guidelines for the appraisal of medical literature related to causation, diagnostic tests, prognosis and case-management are discussed.

PH 312 Research Methods for Health Services Management (3)

This course focuses on the concepts and principles of scientific quantitative research methods, particularly suitable in the domain of health services

management. Emphasis is placed on the evaluation methods for health interventions, including preventive, diagnostic and therapeutic services. At the end of the course, students are expected to have developed a relevant research proposal which can be implemented thereafter.

PH 314 Public Health Surveillance and Management of Health Information Systems (3)

Pre-requisite: Admitted to 3rd Year CAPH

This course underscores the important role of public health surveillance in the management of health information systems. Emphases are placed on the principles and practice of public health surveillance, their fundamental functions and contribution to reliable health information systems. Issues on existing mechanisms of public health surveillance systems in Micronesia and other Pacific Island countries, their effectiveness and areas for improvement are discussed. This course is particularly useful to students and health workers active and/ or interested in health statistics.

PH 316a Research Project in Applied Epidemiology (3)

Pre-requisite: PH 312

Students, in this course, will be exposed to the reality of practical research. With the acquired knowledge of health research methodologies and epidemiological principles, and based on the current health issues in the communities, students are expected to apply and undertake a research project on the topic of their interest in a logical and meaningful fashion, with guiding consultations with relevant faculty, throughout the project.

PH 316b Research Project in Applied Epidemiology (3)

Pre-requisite: PH 316a

Students, in this course, will be exposed to the reality of practical research. With the acquired knowledge of health research methodologies and epidemiological principles, and based on the current health issues in the communities, students are expected to apply and undertake a research project on the topic of their interest in a logical and meaningful fashion, with guiding consultations with relevant faculty, throughout the project.

PH 321 Food Handling, Microbiology and Hygiene (3)

Prerequisites: Admitted to 3rd Year CAPH and SC 180

This course covers the elements of microbiology in relation to food; food production, processing, distribution and marketing; consumer protection and imported foods; investigation of food complaints and food poisoning outbreaks; food and water-borne diseases. The course equips students with knowledge and skills related to safe food practices.

PH 334 Community Nutrition (3)

Prerequisites: SC 112 or PH 231

The course provides students with a sound knowledge of common issues in community nutrition as it relates to the situation in the Pacific, and the skills to identify problems and address them. The practical component of the course provides hands-on experience in the analysis of existing data sets to identify trends in nutritional health in a particular community and to examine the surveillance system that is in place, the planning and implementation of an intervention activity to promote and sustain health and prevent diseases amongst nutritionally vulnerable groups, and the evaluation of the likely impact of the intervention, its practicality and sustainability.

PH 343 Settings Approach and Healthy Public Policy in Health Promotion (3)

Prerequisite: Admitted to 3rd Year CAPH

This course explores the range of health promotion activities, focusing on the "settings approach" toward health promotion. Specific examples are drawn from South Pacific settings such as villages, schools, workplaces, market places, and health care facilities are studied within the overall context of the "healthy islands". The course covers formal health policy formulation and analysis and the role of health policy in reducing poor health and addressing individual, family and community health needs.

PH 351 Health Care Management and Systems in the Pacific and Micronesia (3)

Prerequisite: Admitted to 3rd Year CAPH

This course introduces an overall perspective on the study of health services organizations and the associated managerial role. It deals with the fundamental building blocks of managerial activity involving motivation, leadership, conflict management, and negotiations. It also focuses on performance issues related to organizational design, strategic alliances, innovation and change, and managing for efficiency and effectiveness. It also touches on strategic issues and attempts to anticipate future issues that will challenge health service leadership.

PH 365a Placement in a Public Health Practicing Facility (3)

This placement entails supervised attendance and participation, as allowed or directed, in the activities of a specific public health facility. The very practical, "real life" exposure to actual public health work is expected to enhance motivation and interest, among the students, in community-centered health work, such as immunization, epidemic control, infectious and chronic diseases prevention, environmental protection, and so on. PBL approaches will be adopted whenever possible or warranted. It is envisaged that each student will normally be placed in 2 [two] public health practicing facilities during a semester, for a recommended total of 4 facilities/ 2 semesters. However, successful completion of each of "part a – PH 365a" or "part b – PH 365b" will award 3 credits in that semester.

PH 365b Placement in a Public Health Practicing Facility (3)

This placement entails supervised attendance and participation, as allowed or directed, in the activities of a specific public health facility. The very practical, "real life" exposure to actual public health work is expected to enhance motivation and interest, among the students, in community-centered health work, such as immunization, epidemic control, infectious and chronic diseases prevention, environmental protection, and so on. PBL approaches will be adopted whenever possible or warranted. It is envisaged that each student will normally be placed in 2 [two] public health practicing facilities during a semester, for a recommended total of 4 facilities/ 2 semesters. Students must complete two semesters (PH 365a and PH 365b).

SC 094 Family Health (3)

An introductory non lab remedial/certificate science course about family health topics with emphasis on family structure, accurate mental and physical processes related to sexuality and family cycles, nutrition and diet, lifestyle diseases that affect families in Micronesia and limits of family resources to maintain the health of families.

SC 098 Survey of Science (3)

A non-lab remedial/certificate science course that emphasizes the development of science concepts for natural sciences such as chemistry, physics, earth science and biology, and hands-on experience to promote basic science skills such as measurement and the use of the scientific method of inquiry to explore the natural environment. In addition, scientific literacy and reading comprehension will be addressed to assist students in furthering their science education.

SC 101 Health Science (3)

Prerequisite: ESL 089

Emphasizes basic human anatomy, disease and disease carriers, personal and community hygiene, first aid treatment of minor accidents, mental health and illness, health care, and sex education.

SC 111 Environmental Studies (3)

Prerequisite: ESL 089

This course provides an understanding of the ecological principles that are basic to organism interactions and the flow of matter and energy in the ecosystem. Principle of population structure and organization are developed with particular attention to the implications of these principles to growth and impact of human populations. This course emphasizes the impact of human activity on natural ecosystems by dealing with the major types of pollution and how it affects the health and welfare of humans and other organisms.

SC 112 Introduction to Human Nutrition (3)

Prerequisite: ESL 089

An introductory course on human nutrition providing basic information on the nutrients, on the components of a proper diet with an emphasis on Pacific Island foods, and on diet-related diseases common in Micronesia.

SC 117 Tropical Pacific Island Environment w/Lab (4)

Prerequisite: ESL 089 and recommended completion of one other college-level science course and SS 150.

The course will present ecological principles made relevant by examples from Pacific Island ecosystems and from interactions of humans with our island reefs and forests. It will focus on the close interrelationship between the physical (hydrosphere, lithosphere, atmosphere) and biological (biosphere) environments of tropical Pacific Islands and the impact of human colonization. Emphasis will be placed on islands as "closed" systems with limited surface area and resources. Drastic alteration to Pacific island environments by rapid population growth, industrialization and modern technology within the last century will be explored.

SC 120 Biology w/lab (4)

Prerequisite: ESL 089

Provides an introduction to modern biological concepts at the molecular, cellular, and organismic levels, including cell biology, anatomy, physiology, genetics, plant and animal diversity and ecology.

SC 122a Anatomy and Physiology I w/lab (4)

Prerequisite: SC 120 with a grade of C or better.

First semester of a two-semester sequence course dealing with the structure and function of the human body and mechanisms for maintaining homeostasis covering anatomical terminology, basic biochemistry, the study of cells, tissues, and the integumentary, skeletal, muscular and nervous systems.

SC 122b Anatomy and Physiology II w/lab (4)

Prerequisite: SC 122a

Second semester of a two-semester sequence course dealing with the structure and function of the human body and mechanisms for maintaining homeostasis covering the study of the endocrine, blood, cardiovascular, lymphatic, immune, respiratory, digestive, urinary, and reproductive systems.

SC 130 Physical Science w/lab (4)

Prerequisite: ESL 089

A one semester natural science with laboratory course exploring motion, dynamics, heat, earth sciences, weather, climate, sound optics, light, electricity, chemistry, and astronomy, with a focus on mathematical models and an emphasis on written communication skills.

SC 180 Microbiology w/lab (4)

Prerequisite: SC 120 or MR 120 with a grade of C or better.

This is one semester course and laboratory studies concerning microbes: bacteria, fungi, protists, animals and viruses with an emphasis on bacterial morphology, anatomy, staining, classification, metabolism, growth and the effects of physical and chemical agents on bacteria. The course includes study of microorganisms affecting humans, principles of disease transmission, disease prevention, immunity and biotechnology.

SC 220 Introduction to Geology (3)

Prerequisite: ESL 089

Introduces the natural and physical environment: the landscape, rocks and minerals, rivers, volcanism, earthquakes and other processes inside the earth.

SC 230 Introduction to Chemistry w/lab (4)

Prerequisite: MS 099

The course is an investigation of the fundamentals of general chemistry and an introduction to organic chemistry. The course will emphasize the role of chemistry in modern human life. The laboratory supports the lecture topics, through both qualitative and quantitative experiments. The topics include: basic concepts, chemical substances, chemical reactions, atomic structure, states of matter, and an introduction to organic chemistry.

SC 250 General Botany w/lab (4)

Prerequisite: SC 120 or MR 120 or instructor's permission

Introduces the study of structure, function and evolution of plants, their relationship to the environment and to humans.

SC 255 General Zoology w/lab (4)

Prerequisite: Complete SC 120 or MR 120 with a grade of "C" or better or instructor's permission.

This course is an introduction to various vertebrate and invertebrate animals, their evolutionary relationships, and biology including anatomy and physiology, behavior, and ecology. The course covers the complex and diverse world of animals. Though this is a very broad subject, we will complete a thorough representation and sampling of various the taxonomic groups and related biological topics. Humans are used in some examples, such as for anatomy and physiology, the focus of the course is on other animals and zoology in general.

SC 260 Independent Studies in Biology (1-3)

Prerequisite: SC 120 or MR 120 or permission of the instructor

Students participate in a research project alone or jointly with faculty project leader and other participants. Student works on one or more phases of the project, including library research for background information, collecting data, analyzing data, and preparing a research report or manuscript suitable for publication.

SC/SS 115 Ethnobotany (3)

Prerequisite: ESL 089

Students will be able to identify, compare, and contrast the distinguishing morphological and reproductive characteristics of plants used by Micronesians; observe, describe, communicate, and experience the uses of plants in their cultural context.

SOCIAL SCIENCES

SS 098 Introduction to Social Sciences (3)

Introduces students to the basic skills and concepts in the social sciences.

SS 100 World of Work (3)

Prerequisite: ESL 089

This course is designed to provide the students with an opportunity to examine work roles, jobs, and attitudes necessary in a business workplace.

SS 101 Introduction to Political Science (3)

Prerequisite: ESL 089

This course is a general, comparative introduction to the major concepts and themes of political science.

SS 111 Cultural Anthropology (3)

Prerequisite: EN 110

The course is aimed at studying different patterns of life, through human adaptations to their environments. The students in the course will familiarize themselves with the different individual groups and their societies. The students will compare and contrast the cultures studied to their own. The concept to be aware of is that cultures are different but there is no one culture superior than another. The students will also relate how cultural anthropology is related to other sciences.

SS 120 Introduction to Geography (3)

Prerequisite: EN 110

This course introduces students to the field of geography and structured around the major research traditions of the discipline that include: physical geography, culture and environment study (human geography), the locational tradition, and area analysis. FSM geographical related issues that include, but not limited to, global warming, exclusive economic zone, and alternative energy sources were also explored.

SS 125 Geography of the Pacific (3)

Prerequisite: EN 110

This course introduces students to the field of geography but focused mainly on Pacific Island countries. It encompasses a broader island geographical aspect that include: physical geography, culture and environment study (human geography), political geography, economics, education, gender and other related geographic concepts in the Pacific.

SS 130 Introduction to Sociology (3)

Prerequisite: EN 110

The course is a survey of the concepts, theories and research behind the study of human societies. It is the scientific study of human behavior in groups, and how social forces influence behavior.

SS 150 History of Micronesia (3)

Prerequisite: ESL 089

This course provides an introduction to the general history of the Marianas, the Carolines, and the Marshalls. It begins with a geographic overview of Micronesia, including the formation of high islands and atolls and the patterns of prehistoric migration and settlement, and continues with description of traditional cultures, impact of foreign contact during major historical periods from 1521 to the present, and key issues related to missionization, colonialism and decolonization, self-government and independence, and other social, economic, and political trends in the early 21st century.

SS 170 World History I (3)

Prerequisite: EN 110

This course provides a general study in history of world civilizations. It covers the civilizations of Western Asia, China, the Harappan in India, the Greeks, the Romans, the civilizations of the Americas, the rise of Islam in the Middle East, the early civilizations in Africa, the rise of civilization in Southern Asia, the Eastern Asian Rimlands (Early Japan, Korea, and Vietnam), the Making of Europe, the Byzantine Empire and Crisis and Recovery in the West.

SS 171 World History II (3)

Prerequisite: EN 110

This course is a survey of world history from the 1500's to the present.

SS 195 Micronesian Cultural Studies (3)

Prerequisite: ESL 089

This is a comparative study of Micronesian culture including customs and beliefs, arts and crafts, kinship and language. The students will familiarize themselves with the islands of the Micronesian region; however, emphasis will be on the main and outlying islands of the Federated States of Micronesia (FSM).

SS 200 Research Methods (3)

Prerequisite: EN 120a

This course provides an introduction to the quantitative and qualitative research, through analysis and writing for the social and behavioral sciences. This course evenly balances the theoretical with the practical research. Students will develop scientific/critical thinking skills, the ability to plan and implement research projects, and the ability to clearly articulate research into writing.

SS 205 Micronesian Government and Politics (3)

Prerequisites: SS 150, SS 101

This course offers an introductory study of governments and politics of the Micronesian states. It covers the US Territory of Guam, the Commonwealth of the Northern Mariana Islands, the Federated States of Micronesia, the Republic the Marshall Islands, the Republic of Palau, the Republic of Kiribati, and the Republic of Nauru.

SS 212 Economy of Micronesia (3)

Prerequisite: SS 150, EN 110

This course introduces students to basic economic structures of the Freely Associated States with more emphasis on the development of the Federated States of Micronesia's economy. Lessons are drawn from various reports and government websites and are weaved into three general themes: Palau's economy, Marshall Islands' economy, and the Federated States of Micronesia's economy. Basic developmental economic and macroeconomic principles are also introduced to help students better their understanding on the economic cycle, and examine past policies that were employed to stimulate growth of the island economies.

SS 220 Contemporary Issues in Micronesia (3)

Prerequisite: SS 150

This course examines the major political, social, economic and cultural issues facing Micronesian societies today.

SS 240 East Asian History (3)

Prerequisite: ESL 089

A survey of the history of China, Korea, Vietnam and Japan from prehistory to the present.

SS 280 Directed Study: Selected Topics (3)

Prerequisite: EN 120b, SS 101, SS 200, SS 205, SS 212, SS 220

This course is a mentored research practicum for Micronesian Studies majors which culminates in a major original paper. It serves as a capstone course which provides the students an avenue to write a research paper with an emphasis on contemporary issues in Micronesia. The student must pass the course with at least a "C" grade or better to complete the Micronesian Studies Program.

CAREER AND TECHNICAL EDUCATION

VAE 103 Blueprint Sketching and Interpretation (3)

This course is designed to introduce the student to the basic principles of blueprint drawing and interpretation. The intent of the course is to teach the student to read specifications and marginal information in production blueprints while enhancing their ability to define size, shape, and dimensional information in their own construction drawings.

VBM 101 Building Maintenance I (4)

Co-requisite: VSP 153a

Provides the students with the opportunity to correctly use a range of Hand & Power Tools more commonly used by building maintenance personnel. This course will also provide the student with knowledge and hands-on experience in Blueprint Reading, Surface Preparation and Finishing and Trim work.

VBM 102 Building Maintenance II (4)

Prerequisite: VSP 153a

This course is designed to provide the students with the basic skills necessary to properly install individual electrical circuits in a building and will cover the use of essential hand and power tools. This course is also designed to provide the students with the basic knowledge required for properly using a meter for testing faulty devices and troubleshoot electrical circuit.

VBM 103 Building Maintenance III (4)

Prerequisite: VSP 153a

Provides the students with practical opportunities to service and maintain plumbing and drainage systems using a variety of hand and power tools. This course will also provide the student with knowledge and hands-on experience in general servicing and maintenance of air-conditioning units.

VBM 104 Building Maintenance IV (4)

Prerequisite: VSP 153a

Course Description: This course is designed to introduce the students to activities and concerns relating to the effective maintenance and improvement of the grounds and landscaping that surrounds various structures. In addition care and maintenance of related equipment will be an integral part of this course.

VCE 195 Construction Procedures (1.5)

Prerequisites: VSP 153a

This course introduces the student to the selection of appropriate materials, and the assembly of those materials to erect a structure. The course covers building projects from ground breaking through the laying down of foundations and the accepted construction procedures for wooden, masonry, concrete and steel structures.

VCF 104 Introduction to Cabinet making/Furniture making (3)

Co-requisite: ESL 050/SS 100

This introductory course is designed to familiarize students with the terminology, materials, and hand tools used in the manufacturing industry in both domestic and commercial cabinet/furniture making.

VCF 106 Plan Reading and Documentation (1.5)

Co-requisite: VCF 104

This course is designed to teach the students to read and interpret from blueprint drawings the cabinet/ furniture information required to construct as design. Students will also learn the basic principles of sketching, scale drawing and producing full size setouts, using a range of drawing equipment

VCF 110 Domestic Construction (3)

Prerequisites: VCF 104, VSP 153a

This course is designed to teach the students techniques in the basic construction of domestic cabinets and furniture that are more commonly found in the private home. The student will also learn various methods of producing custom made pieces of furniture to a client's specification

VCF 114 Commercial Construction (3)

Prerequisite: VCF 104, VSP 153a

This course is designed to teach the students basic construction techniques when producing more than one cabinet or piece of furniture (multiple items). It will demonstrate the use of setting up machinery, making patterns and jigs used to mass produce items of furniture.

VCF 120 Workshop Administration (2)

Prerequisite: VCF 104

This course is designed to teach the students the daily activities involved in a cabinet making workshop. Estimation and costing, ordering materials, organizing and production planning as well as the best methods of maximizing the use of materials and reducing waste will be covered

VCF 124 Safety and Maintenance of Power Tools, and Static Machines and Equipment –basic (4)

Prerequisites: VCF 104, VSP 153a

This course is designed to teach students the correct and safe methods of using both power tools and static machines when making cabinets and furniture. Students will learn general maintenance, service and care of power tools and static machinery used in the manufacturing process of both domestic and commercial cabinet/furniture making.

VCF 132 Surface Preparation and Finishing Techniques (3)

Prerequisites: VCF 104, VSP 153a

This course is designed to teach the students various ways to prepare timber surfaces ready for the application of finishing materials. It will also introduce commonly available finishing products and assist students to develop the fundamental skills needed to apply various surface coatings to timber products.

VCT 153 Introduction to Carpentry (3)

This course is designed to introduce the student to the basic use of hand and power tools along with the techniques and methods applicable to the carpentry trade. It is designed to provide an orientation to the career field of carpentry.

VCT 154 Introduction to Masonry (3)

Prerequisite: VSP 153a

This course provides students with knowledge and experience in the preparation of the various types of mortar and concrete and the handling and placement of masonry units. Instructions will also include the care and safe use of masonry hand tools and power equipment.

VCT 163 Concrete Form Construction (3)

Prerequisite: VCT 153

This course is designed to teach the student construction terms, materials and methods in concrete form construction for residential and commercial buildings. The course also introduces the use, care and maintenance of leveling and sighting instruments.

VCT 173 Rough Framing and Exterior Finishing (3)

Prerequisite: VCT 153

This course concentrates on basic structure construction. It is designed to provide carpentry students with the skills and knowledge necessary to frame floors, walls, wall panels, roofs and ceilings as well as the application of exterior finishing materials.

VCT 183 Finishing and Trim Work (3)

Prerequisite: VCT 153

This course is designed to teach the student about various methods and materials necessary to finish the interior of a residential or commercial building. The course covers the installation of wall and ceiling panels, installation of window and doors, construction of cabinets and closets, application of trim and moldings and installation of finishing hardware.

VEE 100 Soldering and Mechanical Termination Techniques (1.5)

Co-requisite: VSP 121

The course covers the proper soldering of lead and lead free electronic components using the industry standard tools and materials. Students will gain experience in electronic component insertion and extraction and Printed Circuit Board (PCB) rework.

VEE 103 Electronic Fundamentals I (3)

Co-requisite: VSP 121

This course introduces the student to the theory of electricity and magnetism, basic components such as resistors, switches, fuses and circuit breakers, and the relationship of voltage, current, resistance and power and their measurements in basic electrical circuits. Basic direct current circuits are analyzed using Ohm's Law, Kirchoff's Laws and various network theorems.

VEE 104 Electronic Fundamentals II (4)

Prerequisite: VEE 103

This course covers the introduction and examination of the principles, applications and measurement of alternating current. Students will compare different types of alternating current circuits. The course emphasizes filtering basics, reactance, resonance, RC, RL, RLC, relays, transformers, phase angles and power factors. Students will apply formulas to analyze AC circuits.

VEE 110 Discrete Devices I (3)

Co-requisite: VEE 104

This course covers the construction and operation of various discrete semiconductor devices and circuits. These devices include diodes, Bipolar Junction Transistors (BJT's) and Field Effect Transistors (FET's). In addition, various configurations of diode half and full wave rectifiers, and bridge rectifiers will be examined as well as ripple voltages and filtering. Zener diode operation, Zener and IC regulation, diode limiter (clipper), clamper and voltage doubler circuits are also analyze.

VEE 125 Electronic Circuits (3)

Prerequisite: VEE 110

This course allows students to investigate small and large signal amplifiers. Topics include Multistage, RC coupled, Push-Pull Amplifiers; various Sine Wave and Non Sine Wave Oscillators including, Hartley, Colpitts, RC Phase Shift, Crystal Controlled, Sawtooth and Blocking Oscillators.

VEE 135 Digital Electronics I (3)

Co-requisite: VEE 110

This course provides the student with the basic concepts of logic gates and digital circuits. Topics include digital switches, combinational and sequential logic gates, number systems, Boolean algebra, Karnaugh Maps, 555 Timers, flip-flops and logic design techniques.

VEE 222 Discrete Devices II (3)

Prerequisite: VEE 110

This course covers the construction and operation of various discrete thyristor power control devices such as Diacs, Triacs, Silicon Controlled Rectifier (SCR), Programmable Unijunction Transistor (PUT) and Unijunction Transistor (UJT) and their circuit configurations.

VEE 223 PC Hardware & Software (4)

Prerequisite: VEE 135

This course is designed to help students prepare for entry-level positions in the (Information Communication Technology) ICT fields. Job titles include enterprise technician, IT administrator, and field service technician, call center technician, help desk technician, and (personal computer) PC or support technician. In addition, the curriculum helps students gain confidence with the components of desktop and laptop computers by learning the proper procedures for hardware and software installations, upgrades, and troubleshooting.

VEE 224 Video Systems & Product Servicing (4)

Prerequisite: VEE 135

This course is designed to provide students with the knowledge and experience in the principles of operating, diagramming, circuit tracing, mechanical assembly and disassembly, maintenance and troubleshooting procedures of television, VCR, CD, DVD and other related electronic products.

VEE 225 Business Machine Servicing (4)

Prerequisite: VEE 135

This course covers the principles of operation and servicing of business machines. It includes the manufacturers' procedures in servicing; systematic procedures in diagnosing faults, repairing of business machines, reassembling and testing repaired business machines according to industry standards.

VEE 230 Radio Communications (3)

Prerequisite: VEE 125

This course is designed to familiarize the students with basic communication systems and the method by which signals are transmitted and received via amplitude modulation (AM) and frequency modulation (FM) techniques, as well as the various types and characteristics of transmission lines.

VEE 235 Digital Electronics II (3)

Prerequisite: VEE 135

This course is designed to provide knowledge, understanding and experience on digital registers and memory, counters, data converter, data selector and data distributor circuits.

VEE 240 Signal Processing (3)

Describes the basic elements of a communication system and identifies various signal processing techniques. Further investigates AM and FM circuits and their operation. In addition Single Side Band, various modulation methods, frequency shift keying and multiplexing are studied.

VEE 250 Cooperative Education Program (2)

This co-operative education and work experience will provide the student with supervised on-the job training that will test the application of classroom learning in a "real life" skill demonstration. The individual students training plan will relate to the student's educational objectives.

VEE 266 Rotating Machinery (3)

Prerequisite: VEM 104 or VEE 104

This course will introduce the students to the basic fundamentals of DC Motors and Generators. The students will be able to define, identify and categorize the devices that make up rotating machinery. The students will also learn the different characteristics of rotating machinery. To advance to the next level, the student must demonstrate proficiency to at least "C" grade level.

VEM 102 Electrical Electronic/Drawing and Sketching (1.5)

Co-requisite: ESL 050

This course is designed to provide the students with basic skills and knowledge to read and interpret electrical/electronics blueprints. Students will also learn the basic principles of sketching and scale drawing using a variety of drawing equipment.

VEM 103 Basic Electricity I (4)

Co-requisites: VSP 121

This course introduces students to the basic fundamentals of electrical circuitry and its components. It also provides theoretical and practical aspects of direct circuit network by experimentation. The course also covers analysis of direct current (DC) circuits using various network theorems.

VEM 104 Basic Electricity II (5)

Prerequisite: VEM 103

This course covers the introduction and examination of the principles, applications and measurement of alternating current. Students will compare different types of alternating current circuits. The course emphasizes filtering basics, reactance, resonance, RC, RL, RLC, relays, transformers, phase angles & relationships and power factors. Students will apply formula to analyze AC circuits. It also includes the theoretical and practical aspects of series, parallel, and series-parallel circuit construction. To advance to the next level of Electrical course, the student must demonstrate proficiency to at least "C" grade level.

VEM 105 Basic Electricity for AC (3)

This course introduces the student to the theory of electricity, basic components used in the electrical industry and the relationship of voltage, current, resistance and power. This course will also enable the student to perform basic measurements by using an electrical measuring device and analyzing electrical circuits. Student will connect different types of electrical circuits. The course emphasizes on testing electrical components of refrigeration and air conditioning system. It also includes the theoretical and practical practices of rewiring and troubleshooting domestic refrigeration and air conditioning systems.

VEM 110 Workshop Fabrication/Hand and Power Tool Skills (3)

Co-requisite: VSP 121

The course covers electrical safety, electronics troubleshooting hand tools, testing device and equipment, wires, cables and connectors, crimping and rework of wire, cable and connector assembly.

VEM 111 Electrical Wiring I (3)

Prerequisites: VEM 110

This course is designed to introduce to the students the basic concepts of residential wiring and provide a solid background of electrical principles required for wiring. The students will develop the knowledge of various voltages in a branch circuit and as well as identifying various types of branch circuits used in a dwelling. The students will gain an understanding for special circuits and how they are used in a dwelling. Students will also become familiarized with the information and specification to perform functional and safe wiring practices.

VEM 112 Electrical Wiring II (3)

Co-requisites: VEM 111

This course is designed to increase the student's awareness of safe workplace practices. The course is designed to introduce the basic wiring methods used in the electrical industry. The students will develop skills in basic circuitry, identification of cable types and terminology used in the industry. Apply techniques as required by the National Electrical code with respect to safe wiring practices.

VEM 113 Refrigeration I (4)

Co-requisite: VEM 105

This course introduces the students to the refrigeration principles and practices as applied to domestic, commercial, and industrial refrigeration systems. It also includes refrigeration processes, vapor compression refrigeration cycle, mechanical components, functions, refrigerants and their properties. Discussion of repair and servicing is concentrated mainly for domestic refrigeration and air conditioning application.

VEM 114 Refrigeration II (4)

Prerequisites: VEM 113

This course primarily covers operation principles, installation, preventive maintenance and repair of split type air conditioning systems.

VEM 212 National Electrical Code (3)

Prerequisites: VEM 112

This course is designed to introduce students to the National Electrical Code. The students will develop the skills in using the code to find specific articles related to the correct methods of installing wiring and equipment. The course aims at developing work practices that comply with the National Electrical Code.

VEM 240 Industrial Wiring (4)

Prerequisites: VEM 104 and VEE 266

This course is designed to introduce students to the fundamental concepts, principles, and devices involved in industrial control of motors. Students will also develop the skills necessary for wiring basic motor control and selecting the required pilot devices and safety components. Also includes troubleshooting motor circuitry and understanding Article 430 of NEC. To advance to the next level, the student must demonstrate proficiency to at least "C" grade level.

VSM 101 Introduction Small Engine Repair (4)

This is an introductory course to small engine repair. It covers in-depth topics of safety in the workshop; use and application of hand tools, workshop equipment and materials, special tools, and theory and operation of small engines.

VSM 102 Fuel, Lubrication, Carburetor, and Ignition (4)

Co-requisite: VSM 101

This course introduces students to the basic design, function and operation of the small engine's fuel, lubrication, carburetor and ignition systems. Cover topics on maintenance, diagnosis, and service of these associated systems.

VSM 103 Engine Dismantling, Inspection, and Assembly (4)

Co-requisite: VSM 102

This course deals with the basics of how engine speed is governed, preliminary checks prior to engine dismantling, carrying out failure analysis, engine disassembly and inspection, teardown steps and engine repair and replacement.

VSM 104 Starters, Engine Maintenance, and Troubleshooting (4)

Co-requisite: VSM 103

This course is designed to provide the student knowledge in engine disassembly and reassembly; engine specifications and tolerances; diagnosing major engine failure.

VSP 121 Industrial Safety Electrical/Electronic (1.5)

This course is designed to introduce the students to safe working practices in the Electrical and Electronic Industries. The emphasis is on the safety measures that must be taken in the Industry, particularly when working with activated equipment. The course will make the students aware of the dangers and increase their awareness on the prevention of industrial accidents.

VSP 153a Industrial Safety (1.5)

This course is designed to make the trainees aware of basic safety practices and encourage them to develop safe personal working habits. The aim is the prevention of accidents that result in personal injuries, damage to facilities and/or equipment. Reference is made to various legislations relevant to safety practices.

VTE 260 Microwave (3)

Prerequisite: VEE 240

This course introduces the student to Microwaves and Microwave systems. The student will analyze Microwave Transmitters, Receivers, Waveguide Theory, Antennas, Cavity Resonators and Tube Microwave devices and semiconductor microwave devices.

VTE 261 (3) Fiber optics Installation

Prerequisite Course(s): VEE 104 or VEM 104

This course is designed to teach students how to safely and properly splice, terminate, and test fiber optics cables. Students will be using the latest technology to troubleshoot and repair fiber optics cables. Coursework will include the use of mechanical and fusion splicing, termination techniques on various types of fiber optic end connectors, the use of the Optical Time Domain Reflectometer (OTDR) to troubleshoot fiber optics cables, and the use of light source & power meter.

VTE 265 Fiber Optics (3)

Prerequisite: VEE 240

This course explores the development of fiber optic technology, explains the theory of light propagation and discusses the advantages and limitations of fiber optic technology. In addition fiber optic components, signal transmission, connections and fiber optic system trouble shooting will also be studied.

VTE 270 Telecommunication Systems (3)

Prerequisite: VEE 240

Students will be familiarized with the various types of telecommunication systems used in the industry. These include the basic elements in a telecom system, transmission medium types, common switching operations, types of broadcast systems, spread spectrum modulation, computer network (wired and wireless), and the operating principles of satellite systems.

VTE 280 Telephone Systems (3)

Prerequisite: VEE 240

This course is designed to introduce students to basic telephone systems and the operation of telephone equipment. It will further focus its study on cellular telephone systems. Students will be introduced to the basic elements, circuits, and techniques of cellular telephone communication systems.

VTE 281 Cellular Phone Repair (3)

Prerequisite: VEE 135

This subject deals with the principles of operation and servicing of cellular phones. It includes the manufacturers' procedures in servicing, systematic procedures in diagnosing faults, repairing of cellular phones, reassembling and testing repaired cellular phones according to industry standards.

VTM 101 Introduction to Motor Vehicle Mechanics (4)

Cover safe working habits in the automotive repair industry, manual handling and mechanical lifting, the use of shop equipment and tools, measuring and identifying fastener types, use of sealants and adhesives, bench fitting, and four stroke cycle operation.

VTM 102 Fuel, Cooling, & Standard Power Train Systems (4)

This course covers the design, function and operation of automotive fuel systems, engine cooling, manual transmission, transaxle, and final drive that includes diagnosis, service, and maintenance.

VTM 103 Ignition, Electrical, and Transmission systems (4)

Deals with fundamentals of automotive electricity, conventional / electronic ignition, and basic automatic transmission. Cover diagnosis, maintenance, and service of automotive battery, charging, starting, and lighting circuits. Include operation and maintenance of automatic transmission and transaxles.

VTM 104 Brakes, Steering, Suspension, and Wheel Alignment (4)

The course covers operation and repair of drum/disc type brake systems, theory and operation of automotive suspension and steering systems including wheel problem diagnosis, component repair, and wheel alignment procedures.

VTM 150 Cooperation Education (6)

Prerequisite Course(s): Completion of VTM 101, VTM 102, VTM 103, and VTM 104 with a grade of "C" or better.

This is a semester long course designed to introduce students to all facets of motor vehicle repair and maintenance setting through internship. The course will place the student in the workplace to experience working in a real life scenario. Students will be expected to seek internships and fulfill 180 hours of On-The-Job-Training (OJT) before the semester ends. Application of knowledge acquired from lecture and lab instruction to gain relevant practical on-the-job experience to repair vehicle in an actual automotive service facility. The apprentice will be supervised by an experienced service individual within the sponsoring business who will work with the automotive program coordinator in evaluating student progress, performance and grading. Internship is required to complete certificate program requirements.

VWE 115 General Welding (4)

Prerequisite: VSP 121 or VSP 153a or Concurrently

This course introduces to students the technical understanding of shielded metal arc welding and oxy-acetylene welding. Provide intensive hands-on training to develop the manual skill in making quality weld on similar and dissimilar metals.

Refrigeration and Air Conditioning (RAC)

RAC 101 Refrigeration I (10)

This course introduces the students to the principles and practices as applied to domestic refrigeration systems. Discussion includes basic refrigeration system, refrigeration cycle, mechanical components, refrigerants, hand tools, instrument and equipment. It also includes the fundamentals of electricity, analyzing electrical circuits and testing electrical components. Practical exercises are dismantling/assembling of mechanical parts, refrigerant recovery and recycling, system reprocess and rewiring of system electrical circuits. Troubleshooting and repairs are concentrated mainly for refrigerators, freezers, drinking fountains and water dispensers for both mechanical and electrical defects.

RAC 102 Air Conditioning I (10)

This course primarily covers the fundamentals of air conditioning, installation, preventive maintenance and repair of air conditioning system. Practical exercises include dismantling and assembling of mechanical parts, refrigerant recovery, system reprocess and rewiring of system electrical circuits. Troubleshooting and repairs are focus mainly for window type and split type air conditioning units up to 5 tons of refrigeration (TR) for both mechanical and electrical defects.

RAC 150 Cooperative Education (4)

This course will provide the students with the opportunity to experience the actual world of work and enhance their knowledge and skills acquired in the classroom in order to become more responsive to the demands of refrigeration and air conditioning profession.
