

SC 111 Environmental Studies

**College of Micronesia-FSM
P. O. Box 159 Kolonia
Pohnpei FM 96941**

Course Outline

Environmental Studies	Division of Natural Sciences and Mathematics SC 111
------------------------------	--

Course Description: This course provides an understanding of the ecological principles that are basic to organism interactions and the flow of matter and energy in ecosystem. Principle of population structure and organization are developed with particular attention to the implications of these principles to growth and impact of human populations. The course emphasizes the impact of human activity on natural ecosystems by dealing with the major types of pollution and how it affects the health and welfare of humans and other organisms
