

Shift from whole class to small group instruction

Shift from all students learning the same things to different students learning different things

Shift from competitive to cooperative social structure

What do I Need to Do to Integrate Technology?

Shift from lecture/recitation to coaching

Shift from working with better students to working with weaker students.

Shift toward more engaged students

Shift from assessment based on test performance (objectivist) to products, progress, effort (constructivist)

Research

Integrating Technology

The One-Computer Classroom

Writing a Technology Plan

1. Hardware
2. Software
3. Curriculum Focus
4. Objectives
5. Ongoing Activity
6. Instructional Strategies
7. Classroom Management
8. Time Management

**Ask yourself these questions:**

1. How can one or more computers enhance what I already do in the classroom each day?
2. What area of the curriculum are you most comfortable with?
3. How flexible is your daily schedule?
4. At what points in the day do you teach the whole class?
5. When are students most likely to be working independently on various projects?
