## COMET Spring 2015 Statistical Exploration by High School

This document is an exploration of data from the College of Micronesia-FSM spring 2015 entrance COMET with a focus on individual high school and section statistics. In this document the word "sections" refers to high school sections. The word subsection will be used to refer to the different sections of the COMET entrance instrument. This document should be construed as an occasional informal paper by a member of faculty. Any opinions expressed are solely those of the author and do not reflect an official position of the college.

## Basic Statistics for All Candidates

The COMET consists of four subsections: a written essay, a vocabulary test, a comprehension test, and a mathematics placement test. Total possible for the essay is 50 points. The mathematics subsection has four sets of ten problems designed to help place students. The total possible for the sum of the mathematics scores is 40 . Nelson-Denny is used for the vocabulary and comprehension sections.

| Statistic | Essay | Vocabulary | Reading | MS1 | MS2 | MS3 | MS4 | Math sum |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| n | 1455 | 1456 | 1456 | 1456 | 1456 | 1456 | 1456 | 1456 |
| min | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 3 |
| max | 50 | 69 | 38 | 10 | 10 | 10 | 10 | 38 |
| mode | 30 | 22 | 15 | 8 | 6 | 2 | 2 | 18 |
| median | 30 | 23 | 16.5 | 7 | 6 | 3 | 3 | 19 |
| mean | 28.28 | 24.78 | 17.28 | 6.94 | 6.01 | 3.59 | 2.90 | 19.44 |
| sx | 12.80 | 10.18 | 6.37 | 2.28 | 2.20 | 2.32 | 1.87 | 6.88 |
| cv | 0.45 | 0.41 | 0.37 | 0.33 | 0.37 | 0.65 | 0.65 | 0.35 |

## High School Listing

The following is a list of the high school names used in tables in this report. For historical reasons, some tables and charts may differ.

| School | School Long | State |
| :--- | :--- | :--- |
| Berea | Berea | Chuuk |
| Catholic HS | Catholic High School Yap | Yap |
| CCA | Calvary Christian Academu | Pohnpei |
| CHS | Chuuk High School | Chuuk |
| CSC | Chuuk State Campus | Chuuk |
| Faichuk | Faichuuk High School | Chuuk |
| KHS | Kosrae High School | Kosrae |

| School | School Long | State |
| :--- | :--- | :--- |
| KSC | Kosrae State Campus | Kosrae |
| MHS | Madolehnihmw High School | Pohnpei |
| Mizpah | Mizpah Christian High School | Chuuk |
| NMHS | Nanpei Memorial High School | Pohnpei |
| Nukuno | Nukuno High School | Chuuk |
| OICA | Ohwa International Christian Academy | Pohnpei |
| OIHS | Outer Island High School | Yap |
| OLM | Our Lady of Mercy High School | Pohnpei |
| PICS | Pohnpei Islands Central School | Pohnpei |
| PLHA | Pentecostal Lighthouse Academy | Chuuk |
| PSC | Pohnpei State Campus | Pohnpei |
| SCA | Saramen Chuuk Academy | Chuuk |
| SDA Chuuk | Seventh Day Adventist Chuuk | Chuuk |
| SDA Pohnpei | Seventh Day Adventist Pohnpei | Pohnpei |
| SDA Yap | Seventh Day Adventist Yap | Yap |
| SNHS-Fefan | Southern Noumeneas Fefan | Chuuk |
| SNHS-Tonoas | Southern Noumeneas Tonoas | Chuuk |
| Xavier | Xavier High School | Chuuk |
| YHS | Yap High School | Yap |
| YSC | Yap State Campus | Yap |

## High schools and sections in descending rank order on the four subsections

The following table lists the high schools in descending rank order of the average (statistical mean) for each of the four subsections of the COMET: essay, vocabulary, reading, and mathematics. High school averages without a section specified are averages for all candidates at the school. High schools with a section code following the name are averages for that section. Section codes are those chosen by the high school.

| HS | Essay | HS | Vocab | HS | Read | HS | Math |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Xavier | 47.13 | NMHS A1 | 49.29 | Catholic HS | 31.20 | MHS A | 32.10 |

## Essay year-on-year for selected public high schools

The essay subsection is marked by two graders. The rubric produces a maximum of 25 points. The scores for the two graders are added, producing a score out of 50 . The following table provides information for high schools on their year-on-year performance including selected sections. Note that the college does not admit based solely on essay performance. Data for 2011 is not extant.

| High School | $\mathbf{2 0 0 7}$ | $\mathbf{2 0 0 8}$ | $\mathbf{2 0 0 9}$ | $\mathbf{2 0 1 0}$ | $\mathbf{2 0 1 2}$ | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ |

## Upward Bound

Upward Bound is a TRIO program operated by the college. The program includes students at MHS, NMHS, and PICS,.The following table provides the average performance for the Upward Bound seniors on the four subsections of the COMET. Twenty-one scores for Upward Bound students were reported in the COMET.

| Subsection | Pohnpei UB |
| :--- | ---: |
| Essay | 36.38 |
| Vocabulary | 37.76 |
| Reading | 23.95 |
| Mathematics average sum | 31.90 |

Break-outs of Upward Bound score averages by individual high school lose statistical significance due to small sample sizes. The essay average would put the UB students at eleventh rank against the overall high school scores. The vocabulary average is the third highest vocabulary average against the
overall high school scores. The reading average would be ranked sixth against the overall high school scores. The UB math average would be be first rank having scored higher than the best performing high school on the mathematics subsection.

The Upward Bound students significantly outperform the overall averages at their high schools. The averages are up among those achieved by private schools. Their vocabulary average is very high even against many private schools. The mathematics average is higher than any other overall high school average. Data thus far does not include school section data for MHS, NMHS, and PICS. Some sections at these high schools may have performed on par with the UB students as the UB students are in those sections.

The Upward Bound program works throughout the high school years to prepare students for college. In order to disclose any bias, this author has taught in the Upward Bound programs both in Kosrae and Pohnpei. The Upward Bound students are among the top students in the nation, and capable of working hard. They are well equipped with study skills. Where an Upward Bound student is also in an A1 or A section, the top students in a school, the combination produces some of the most academically capable students.

The following table provides data on placement for Upward Bound students versus their high school, for NMHS section data is also available.

| School | Sect | ACE | Certificate | Degree | Non-Admit |
| :--- | :--- | ---: | ---: | ---: | ---: |
| MHS | A | 2 | 1 | 2 |  |
| NMHS | A1 | 1 | 2 | 2 |  |
| NMHS | A2 |  |  | 1 |  |
| PICS | Unknown | 1 | 1 | 8 |  |

The NHMS A1 and MHS section A Upward Bound students should have their academic record in Upward Bound and their transcripts evaluated to make a more informed decision. This author has been rebuked in the past when he has suggested that the college only uses the COMET for degree level admissions. The above table is, for this author, indirect evidence that only the COMET is functionally considered. The college requires a transcript, but in the above data there is nothing to suggest the college used anything other than a set of algorithms on the COMET scores to make degree level admissions decisions. Indeed, when individual placements are questioned, the response of the college is usually to cite one or another score being too low - once again returning to the COMET to make the decision for the college.

The author has access to information that alleges one of the candidates denied degree level admission is one of the top two students at their school and could be either the salutatorian or valedictorian. The COMET is a measurement tool, an instrument, and should be used with an understanding of the types of errors that can occur. From an admissions perspective, a binary admit/not admit perspective, there are two types of errors, a false positive and a false negative.

Faculty have noted in the past that there appears to be times when candidates are admitted to a
program through the COMET process who do not have the academic ability to benefit from that program. This might be termed a false positive - the candidate gains admission to a program when they should not have gained admission to that program. A false positive can be viewed as giving a candidate a chance to challenge a program for which the candidate is not fully academically prepared. For example, a candidate gaining entry into a degree level program from a high school track that was not college preparatory might be identified as being at higher risk. The college could improve student success by identifying such candidates early and monitoring them more closely as they transition into college.

There will also be candidates who should have gained admission who do not gain admission, this could be termed a false negative. False negative results are potentially more challenging to detect. The school sections data provides a crude tool by which to potentially initially detect false negatives.
Candidates who have been in a college preparatory section in their high school should theoretically be placing into degree level programs, especially those candidates in the uppermost "A" or "A1" section of their high school. A placement below degree level ought to trigger a transcript review. If the grade point average is above a 3.0, then the result is likely a false negative. Certainly a candidate who have been in the college's own Upward Bound program, has an Upward Bound grade point average above 3.0 and is in a college preparatory academic high school track with a high school grade point average of 3.0 or better should essentially be an automatic admission.

## Requested Data: Program admissions numbers by high schools and sections

The following table is included as a result of data request.

| School | Sect | ACE | Certificate | Degree | Non-Admit | Row Sums |
| :--- | :--- | ---: | ---: | ---: | ---: | ---: |

The author thanks the College of Micronesia-FSM for their providing the data that forms the basis of this report. The author is also in debt to the departments of education and principals who have shared the section lists that make this report possible.

## Author and contact information

All errors are solely those of the author. This document should be construed as an occasional informal paper by a member of faculty. Any opinions expressed would be solely those of the author and do not reflect an official position of the college. Please contact Dana Lee Ling at dleeling@comfsm.fm or 691-320-2480 extension 228 if you have questions, corrections, or unmet data needs in regards the COMET instrument. If there is break-out aggregate data you require such as class level data not broken out above, please send the author a list of the names of the students/candidates and the author can generate the aggregate statistics for those students/candidates.

Originally produced on 31 March 2015. Edited on 07 April to include NMHS section level statistics and an additional table in the Upward Bound section. Edited on 09 April to include MHS section level statistics and an additional table based on a data request.
